Food & Beverage technology solutions under one roof One-stop solution for the F&B processing industry

Technology solutions along the entire value chain in a concentrated and structured form for every buyer

With its 14 previous editions over the years, ANUTEC- International FoodTec India has established itself as "the biggest platform" for suppliers to India's food and drink industry. The leading names in the food and beverage processing industry gather to witness the brand-new technologies, exchange ideas that helps drive the industry forward.

The 15th edition of India's largest and most prestigious trade fair for food and beverage processing companies takes place in New Delhi from 2-4 December 2021.

www.anutecindia.com

PackEx India has seen impressive growth in exhibitor and visitor numbers year on year and has now become the largest platform for suppliers and users of packaging materials and machinery. With the focus on new product innovations coupled with new packaging solutions being the deciding factor in the current market, packaging has taken on an all-new meaning.

As the leading platform for packaging development professionals and decision-makers in the sub-continent, PackEx India brings together the best in the industry.

www.packexindia.com

Food Logistics India co-located with 15th edition of ANUTEC - International FoodTec India is an unmatched platform for companies to showcase the best in logistics, cold chain, intralogistics, warehousing, material handling, refrigeration, storage and automation solutions to key decision-makers from the food and beverage industry.

The who's who of the Food & Drink industry meets at this show to witness the latest technologies and update themselves on supply chain trends that define logistics in Food.

www.foodlogisticsindia.com

We invite you to be a part of India's specialised food ingredients and nutraceuticals show ANUTEC - Ingredients India. In the wake of the success of the first edition, this edition of the ANUTEC Ingredients India - International Ingredients and Nutraceuticals show for the Food and Drink Industry opens its doors.

Concurrent with India's leading international food and drink trade fair ANUTEC - International FoodTec India, PackEx India and Food Logistics India at IECC, Pragati Maidan, New Delhi, India, between 2-4 December 2021.

Supporting Associations

“

Dear Exhibitors, Visitors and Partners,

I am delighted to share the preview of the upcoming ANUTEC - International FoodTec India and its co-located PackEx India, Food Logistics India, and ANUTEC - Ingredients India. The events are physically scheduled from 2-4 December 2021 at IECC, Pragati Maidan, New Delhi.

We are grateful to the Government of New Delhi for allowing business-to-business exhibitions. As a result, B2B exhibitions have already begun in New Delhi and are gaining overwhelming success. Likewise, ANUTEC - International FoodTec India and its co-located events will be the first and most extensive food industry physical exhibitions. Therefore, we are seeing impressive responses from both exhibitors and visitors.

As a vital industry platform, it provides a chance to demonstrate the latest innovations in F&B processing physically and acts as a meeting place for the entire industry. In addition to the trade fair, powerful on-site seminars will be presented by Logistics Insider, Association of Food Scientists & Technologists (India) and Indian Flexible Packaging & Folding Carton Manufacturers Association.

The whole industry is invited to explore groundbreaking revolutions in the food industry, engage in discussions with industry experts, share insights, network with the juggernauts and much more, all under one roof, in a safe and healthy environment, without clicking any meeting link.

Coming together will serve as a reboot for the industry. We look forward to meeting you at ANUTEC - International FoodTec India.

KOELNMESSE: LEADING TRADE FAIRS FOR FOOD & FOODTEC. NO 1

AAVEG Technology Pvt. Ltd.

AAVEG Technology Pvt. Ltd. is a company engaged in manufacturing of Food Process Machine, Process Automation & Electrical Power Process Equipment's.

In 20 years of Engineering business, we developed Automation equipment's for bulk production of Potato

AAVEG®
Food Machines

Chips Frying Line, Snacks Frying Line, Sew Bhujia Line, Popcorn Process Line, Namkeen Extruder, Vegetable Frozen line. AAVEG is into manufacturing of Electrical Power Panel from Transformer distribution to Machine control, Real Time Power

Factor control, DG AMF Panel, DG Synchronizing, HMI based VFD Panel, Energy Management System. We are also into manufacturing of Food Process Machines, such as Popcorn Process Line, Pellets Snacks Frying Line, Potato Chips Line and providing assistance of Processed Food Production Line from food to packaging.

Authorised Exclusive Trading Partner for a German Company VITO in India, Manufacturer of Frying Oil Filter Machine and TPM/ TPC Oil Tester. The Portable machine works at a temperature 170C can be placed directly in fryer. VITO machine is very useful in Indian subcontinent where the use of Batch Fryer or Karahi is high. Higher version is also available for bigger fryer capacity more than 200 litre oil.

Adpak Packaging Solution Pvt. Ltd.

ADPAK is company which takes care of Spare part, Service management & other activity related to operation of GSPAK filling machine in India & continent's is Founded in 1985, as Shandong Bihai Machinery Technology/Packaging Materials Co. Ltd. is devoted to manufacturing of aseptic carton filling machine and auxiliary equipment for Beverages, Dairy & Alco beverages GSPAK also provide paper/AL/PE aseptic laminated packaging paper for liquid food,

GSPAK with a land area of 40 acres & fixed assets of 60 million USD, more than 670 employees is top manufacturing company in

China with Aseptic filling Machine, Maintenance module & Package Material for Dairy, Beverages & other liquid food packed in Aseptic packs. GSPAK is equipped with world most advanced German Davis laminating production line & can pack 9 billion packs

of Aseptic laminated paper for liquid food & more than 200 sets aseptic carton filling machine and auxiliary equipment in a year. GSPAK has sold more than 780 sets of machines in China & abroad countries like India, Korea, Thailand, Iran, Egypt, Russia, Mexico. GSPAK has global customer like Nestle, Coca Cola, PepsiCo & local giant FMCG customer like Parleagro, CG Group

Advanced Industrial Micro Systems

AIMS are the Largest Manufacturers & Exporters of High Precision Marking, Printing & Packaging Systems for coding variable information like Batch No., Mfg. Date, Exp. Date, Max. Retail Price, etc. on any substrate, which is stationary or moving. Ink-Jet Printers, Industrial .

Manufacturers of: Industrial Laser Printers, Jet Stamp, Compact/Hand-Held Ink Jet Printers, Sticker Labeling Machines, Manual/Semi-Automatic Batch Printing Systems, On-Line Coders for Packaging Machines, On-line Pipe Printers, Pad Printing Machines, Barcode Printer/Labelers, Carton Strapping/Taping Machines, Automatic/Manual Pouch Sealing Machines, Shrink Packaging Machines, Vacuum Packing Machines, Liquid/Paste Filling Machines, Induction Sealing, Cup/Bottle Lidding & Capping Machines, Bottle Labeling Machines

Allanasons Pvt.Ltd.

Allana Cold Chain Solutions, an Allana group company, is consistent in providing cold chain solutions with state-of-the art refrigerated trucks and cold storage infrastructure. Our experience & expertise spans over seven decades, where we have been passionate about preserving the quality and integrity of temperature-controlled food products.

66000 MT cold storage capacity, 100+ refrigerated trucks with a PAN India footprint, we deliver innovative and cost-effective solutions.

We aim to grow through partnerships and maintain an uncompromising approach towards excellence which includes inculcating an indomitable drive, a relentless determination and a persistent delivery standard in every aspect of the Cold Chain.

AmbaFlex Asia Pacific BV

AmbaFlex is the partner for customised material handling systems based on spiral conveying technology! Our unique SpiralVeyor® is used in a wide range of markets and applications for vertical transportation, temporary storage and the accumulation of single goods and packed products.

We are an independent global company that has developed, produces and also maintains the

SpiralVeyor® system to ensure that our customers receive the most cost-effective solutions available today. At AmbaFlex, we value our customer's business greatly and aim to create a long-lasting relationship. Our Global Customer Service is a worldwide network, with certified experts available on all continents.

Anval Valves Pvt. Ltd.

Anval an ISO 9001: 2015 company has built a reputation as the market leader in the design and manufacture of valves, feeders and airlocks for Bulk-Material handling applications. Born from the Australian thermal processing specialist, Anval is able to draw from over 35 years of industry experience to deliver the highest quality equipment into some of the most demanding applications across industries, worldwide.

From simple powder to raw coal, from sticky biomass to abrasive alumina, Anval's in-house engineering teams have provided solutions to a dazzling array of material handling problems. Committed to customer satisfaction, Anval not only provides an effective design

solution, but also ensure after sales support throughout the life time of the product.

Our products and solutions have proven themselves across a wide range of industries and in some of the most demanding applications. We are proud to be the preferred suppliers of valves for the world's top Cement, Mining, Food, Pharma and other Bulk material handling companies.

Rotary Easy Clean Valve Series

EASY CLEAN ROTARY AIRLOCK VALVES FOR HYGIENIC DAIRY APPLICATIONS

Tool-Less Quick & Easy Clean Rotary Valves for Dairy applications where frequent & quick cleaning of valve internals is necessary. RE Series valves can be used for contamination-sensitive applications in Food & Pharma processing where frequent disassembly and cleaning is required. All RE Series valves are best suited for Hygienic Dairy, Food, and Chemical applications.

The RE Series Rotary valves permit Safe & Tool-less removal of the internal components as one single piece for quick and easy cleaning. This eliminates time-consuming steps during opening and reassembly of internals instead of spending a long maintenance time. Upon reassembly, the Rotor and engages automatically without any complex adjustments and it maintains the original clearance values...

Investment casting for excellent surface finish

Tool-Less: Easy Reassembly

Mirror Finish Internals

Quick & Easy Cleaning

The Mirror Finish internals helps the cleaning process easier, effective and convenience in cleaning,

thus increasing operational efficiency while handling Sticky, Cloggy, and Hygroscopic applications

RE Series rotary airlock valves are available in opening sizes ranging from 150 mm to 300 mm with Circular flanges. The rotors are perfectly designed and manufactured to have a close radial and axial clearance. These valves are CE marked and designed in compliance with the provisions of all applicable Health & Safety Requirements across the globe.

#B-SAFE 4business

Your business is in safe hands

Our aim is to guarantee professional protection at the highest level and create an environment in which your business can grow again!

Armstrong Dematic

Armstrong Dematic is the result of a strategic partnership between two well established industry leaders- Armstrong Automation, which is India's #1, and Dematic, which is the world's #1 in the intralogistics and warehouse automation segment. This partnership combines 200 years of Dematic's track record of success delivering innovative solutions coupled with 20 years of Armstrong's stable Indian leadership presence.

Our main offering is Business Intelligence driven intralogistics automation. In this, we automate your inbound & outbound, storage and retrieval, palletization, sorting and conveying operations. The solutions we provide are uniquely crafted and designed to target your pain points and aimed at achieving operational efficacy, high visibility and space utilization, effort reduction with lowest TCO, to make your operations faster, smarter & cheaper. All of these are integrated with software tools implementing AI, ML and Video analytics and are compliant with Industry 4.0 / IIOT standards.

ARR Foods

HYWAY is a thought Brand from the house of ARR Food machines which is meant to Fabricate Hygiene Way for maximum needs of processing, Handling and Storing in industries like Food, Snacks, Confectionaries, Pharma, Dairy, Beverages, Meat, Chemical and ancillaries.

Our philosophy is to always look and apply the simplest solutions by using our

comprehensive range of standard reliable, easy to maintain and cost effective conveyors and automation devices. We have attached some of our product datasheets for your kind review and look forward to work with you soon.

What we do..**Snacks Machines (Fried / Baked)**

Washing/Soaking, Extrusion, Frying, Roasting/Baking, Cooling, Flavoring

Material Handling Systems in Multiple Infeed &**dropping points**

Belt , Roller, Chain, Screw, Bucket Elevators (Z,C,T,E,F-Type), Spiral Conveyor (powered / Gravity), Vibratory feeders, Bulk Material Handling

Aztec Fluids &
Machinery Pvt. Ltd.

Aztec: Single stop solution for your printing requirement. Best productivity with lowest cost of ownership identification manufacturer. We are committed to provide quality services for the identification technology and manufacturing companies worldwide.

We at Aztec focused on market oriented innovation, continuous improvement and pursuit of excellence since the beginning.

Belting Enterprises Pvt. Ltd.

From very inception Belting Enterprises prime agenda and priority is to serve Indian machine manufactures for **most ideal belt mechanisms** - whether transmission, conveyor, automation or very complex mechanisms. Our partners are world leaders, sharing with them partnership and experience for more than 3 decades.

Simple terms like 'conveyor belt' or 'transmission belt' are often

misnomer and do not reflect the true picture of the very intricate operations performed by simple looking - **state of the art belts**. New generation high tech belts make possible the most complex engineering solutions - permitting mechanisms which earlier thought to be mechanically impossible.

We at **Belting Enterprises** offer quality products and match the same with services and technical backup -

second to none in the world.

It's a pity to see that some machines completely fail resulting in disastrous consequences for machine manufacturers. Due to improper utilization, wrong selection & substandard products, there are heavy losses at user end. We at Belting Enterprises stand for high tech belting mechanisms, with all needed backup and expertise. **Product specialization** is a must-not mere a trade setup offering bunch of all hardware off the shelf - but you need the people who understand and stand behind.

Catalis Packaging Technologies Pvt. Ltd.

Catalis Packaging Technologies Pvt. Ltd. is engaged in manufacturing High speed packaging machinery and is based in Vadodara, Gujarat - India.

Catalis machines are engineered to offer high performance and reliable packaging solutions to a broad spectrum of industries.

Catalis

Packaging Technologies Pvt. Ltd.

Catalis has a proven track record of leveraging technology to its

clients' benefit by manufacturing quality machines and creating a competitive advantage.

High output, short changeover time, and minimal manpower requirements in our machines yield significant cost savings.

These qualities also minimize the risk of contamination, making the FFS process ideal for clean-room operations.

These are fully automatic servo driven vertical form, fill and seal machines suitable for packing of products like powder, pulses, spices, namkeen, wafers, grains, tea, sugar, salt & pesticides as well.

industry.

We supply prominent technologies such as Puffing, roasting, drying, toasting, cooking and material handling.

Our systems are designed and manufactured at CEREX headquarters in Switzerland to ensure highest possible quality standards.

"CEREX AG - Connecting nature & technology, since 1995"

Columbia Machine Engineering (India) Pvt. Ltd.

Columbia Machine Engineering (India) Pvt. Ltd. specializes in the manufacture and supply of Concrete Product solutions and Palletizing solutions to a variety of industries in India and several countries throughout Asia and Africa. Columbia is a wholly owned subsidiary of Columbia Machine Inc., USA an over 80-year-old; worldwide leader in the design, manufacturing and support of equipment for a variety of industries, with customers in over 100 countries around the world.

Columbia offers a proficient range of Palletizing Solutions. We manufacture and supply high speed, fully automatic

complete range of line, Floor Level, High Level & Robotic Palletizing Solutions for Material Handling with state-of-the-art technology from Columbia Machine Inc., USA, for use in a variety of industries including food, beverage, chemicals, paper, edible oil, packaged water, distilleries, soaps and detergents, FMCG and many more. Since the early 1960's Columbia Palletizers have developed a reputation as a world leader offering superior construction, maximum flexibility, easy operation and speeds from 1 to 100 cases per minute.

Columbia
MACHINE ENGINEERING (I) PVT. LTD.

Cerex AG

CEREX manufactures processing technologies for the food, feed and nonfood industry. CEREX offers project engineering from integration of single machines in existing process lines to the complete turn-key factories.

CEREX

Connecting nature + technology since 1995

We manufacture highly durable equipment that has proven over the years in terms of seamless energy efficiency, food safety and hygiene which

allows to meet & exceed highest standards in the

Exhibition key segments

Condot Systems Pvt. Ltd.

Established in 1994, Condot Systems Private Limited is a one-stop solution company with a global presence in the coding and marking technology space. CSPL specializes in TIJ and DOD Printing, Track and Trace solutions & Print and Verify Systems including requisite product transfer and

CONDOT[®] conveying systems. We offer these solutions primarily to Foods & **SYSTEMS PVT. LTD.**

Beverages, FMCG, Printing, Pharmaceutical and Agrochemical segments for primary, secondary, and tertiary applications on wide variety of substrates like laminates, plastics, paper, cardboards, foils, etc. We also offer innovative solutions for customer retainership programs, Brand loyalty programs, Serialization, Authentication, and Barcode printing for brand promotion.

Detectronic India Pvt. Ltd.

Fastest growing metal detector in India. Detectronic a/s is a privately owned Danish company has started their own subsidiary "Detectronic India Pvt. Ltd." to serve Indian customers better and provide swift technology support. This fascinating story of achieving 300 happy customers & the reason for this astonishing success is that we made available European Technology & revolutionary products at affordable prices.

DETECTRONIC

At Detectronic, we haven't restricted our self but, customized our design to adapt Indian Market & customer's real need. We have 32 years of experience in the field of metal detection supported with more than 12000 installations worldwide means proven technology. A vast majority of the first machines produces are still fully operational almost 30 years later. We have probable the strongest metal detector in the market which can withstand any harsh environment still providing top detection and durability years after years.

DMN India Pvt. Ltd.

We are glad to introduce ourselves as DMN INDIA PRIVATE LIMITED, 100% subsidiary of DMN-WESTINGHOUSE, Netherlands.

DMN-WESTINGHOUSE has been designing and manufacturing Rotary Valves, Diverter Valves, Morris Couplings and other related components for the bulk solids handling industry for more than 45 years. We are one of the largest independent manufacturers for Rotary & Diverter valves with no involvement in system design, our sole activity is the development, manufacture and sale of these components. We offer tailor-made solutions to the global Food, Dairy, Plastics, Petrochemicals, Chemicals & Specialty Chemicals, Pharmaceutical, Minerals, Aquaculture, Power and Biomass Industries.

We are having two production facilities, one in Noordwijkerhout (Netherlands) exclusive for Rotary valves, and one in Altshausen (Germany) exclusive for Diverter valves. These very modern production facilities enable us to guarantee a constant high quality, maintain an efficient stock level and ensure

short delivery times. Our products are distributed worldwide. The past decade DMN has been continuously expanding, resulting in its own sales offices in the Netherlands (head office), France, Germany, UK, India and the USA. Since 1995, DMN have been ISO 9001 approved for the development, manufacturing and sales of components used in pneumatic conveying systems for bulk solids handling. Several DMN-WESTINGHOUSE components have been accepted by the USDA (United States Department of Agriculture) for use in dairy applications.

We are strongly focused on Research & Development and Rotary valves and Diverter valves in the DMN-WESTINGHOUSE product range have been developed in-house. The development of new products often takes place together with major customers. Of course, all components are continuously under review about value engineering and functionality.

Our Indian headquarter is in Chennai (Tamil Nadu) with two state-of-art Service Centers at Chennai (Tamil Nadu) & Vadodara (Gujarat) to serve customer needs across PAN India. We have all related spares readily

Domino Printech India LLP

Founded in 1978, Domino Printing Sciences has established a global reputation for the development and manufacture of coding, marking and printing technologies, as well as its worldwide aftermarket products and customer service.

The Domino Group employs more than 2,800 people and operates in over 120 countries. The company has manufacturing facilities in the UK, US, China, Germany, India, Sweden and Switzerland.

DOMINO

Domino
Printech India
LLP (was
Domino

Printech India Pvt. Ltd. earlier) is fully owned subsidiary of Domino Printing Sciences and was established in the year 1996.

Over 300 employees are supporting customers across India through 14 branch offices & over 50 resident sales & support locations.

Domino always believed in providing best technologies at affordable prices to the Indian manufacturers by leveraging best of talent, technology and state of art manufacturing facility in Manesar, Haryana. With over 12,000 customers and 25,000+ printers installed across the country Domino is the Industry leader in Coding & Marking industry. We are the undisputed leaders in Continuous Inkjet coding and printers - having set the industry standard for quality, reliability and versatility for over 30 years - we can provide a printing solution that's exactly right for your needs.

DPH Engineering

DPH Engineering was established in 2008 and since then we have specialized into a one stop shop for all your material handling needs. We represent top companies from all over the world

producing world class products. DPH Engineering believes in being a solution provider and we prefer to work closely with our customers to give them a right solution to their problems. Some of the companies we represent are Syntron Material Handling, USA (formerly known as FMC Technologies, USA); Ingersoll Rand, USA; Dust Solutions

Incorporated, USA; OMB Vibrating Motors, Italy; Tecnidea Cidue, Italy. As we continue to grow into these markets we believe in giving credit to our customers who share and believe in the same values with which we do our business.

Formerly known as FMC Technologies is a 125 years old company and their Syntron and Link-Belt brands have been the industry standards for excellence in bulk material handling. FMC products have paved the way and set the standard for quality, dependability and efficiency.

- Link-Belt Idlers are interference-fit pressed head minimizes circular runout of the roll
- Design accommodates various bearing sizes and bearing seal arrangements
- Pressed heads eliminate welding problems such as distortion and misalignment

- Capable of successfully achieving belt speeds of 9 meters/sec
- Syntron brand offers Heavy Duty Electromagnetic and Electromechanical vibrating feeders
- Capacities range from 75tph to upto 4000tph across 11 models with a variety of trough styles and sizes available at our Warehouse in

Chennai (Tamil Nadu) to cater any immediate requirement from Customer. We have very strong Technical Sales, solution oriented After Sales & Service and efficient Business operation team.

Further more, there is strong Distributor network each looking after Northern, Southern and Western, Central & Eastern part of India. DMN-WESTINGHOUSE India is responsible for South-Asian countries including India, Pakistan, Nepal, Bhutan, Myanmar, Bangladesh, Sri Lanka & Maldives.

Dynamech Engineers

Dynamech Engineers is a pioneer in the field of Snack Making machine, Since its inception in 1985 we have introduced new products and solutions at regular intervals. Having expertise in providing turnkey solutions for Namkeens snacks, Potato Chips, Extruded snacks. We offer the whole range of machines from semi automatic systems to full

automatic lines. Our forte is in designing and manufacturing continuous fryers for various items capacity ranging from 25 kg/hr to 1000 kg / hr. We offer continuous fryers for indian namkeens, Potato chips, Extruded snacks, Pellets, Lentils, Dals etc, We also offer fuel efficient heating systems (Heat Exchangers) based of

Diesel, Gas, LDO, Thermic fluid, these heat exchangers are being offered along with batch and continuous fryers. New products in the pipeline are continuous de oilers and further automation in namkeen processing industry. New Products Developed are Mini potato chips line along with Advanced potato chips slicer and dehydrator, Recently we have started manufacturing wood based heat exchangers which provide the lowest fuel cost in the snack food industry.

Economode Food Equipment (I) Pvt. Ltd.

Established in the year 2004, Economode Food Equipment (I) Pvt. Ltd., in a short span of time has been able to carve a name in the Snack Food Processing market in India & Overseas.

Promoted by Mr. Arun Dadda, a first-generation Food Technocrat and the core team consisting of highly qualified and skilled engineers and technocrats, have pooled their technical process, extensive experience and continuous research to develop a superior

technology that is highly innovative and cost effective for manufacturing machines for the snack food industries.

We have dominant presence in India and Overseas market. We currently export our products to more than 33 countries worldwide and known as a trusted solution partner to snack business houses.

Following are our mainline products and machineries.

- Fully Automatic Potato Chips Line (Up to 1000 Kg/Hr)
- Semi Automatic Banana Chips Line (Up to 300 Kg/Hr)
- Semi Automatic Potato Chips Line (300 / 500 Kg/Hr)
- Pallet Frying Line (Up to 1000 Kg/Hr)
- Kurkure Production Line (300/500/ 1000 Kg/Hr)
- Multi Purpose Continuous Frying Line (for Indian Ethnic Snacks / Namkeen / Chanchur etc.)
- Circular & Rectangular Fryer with IHE (Indirect Heating) & with HE
- Circular & Rectangular Fryer without HE (Direct Heating Type)
- Sev Murmura Line
- Other Food processing equipment suitable for snack food processing
 - Snack Food Processing Mixing
 - Namkeen Processing
 - RTE Snack Processing
 - Slicing
 - Mixing - Dough Mixer, Coating Pan & Namkeen Mixer
 - Slicing - Potato, Banana, Yam, Cassava
 - Cooling Conveyer
 - Water Removal - Hydro & De Oil
 - Boondi Attachment
 - Coated Peanut Attachment
 - Nylon Sev

Other important Statistics are as follows:

- Over 40,000 sq.ft of shop floor area spread across 2 distinctive state -of -the art of manufacturing facility
- More than 40 qualified engineers and ocrats from various discipline taking care of sales, design solution development, production, QC, I & C and after sales service
- More than 120 trained and skilled workers who give their best to produce machine of finest quality
- Over 6000 successful installations and more than 300 installations in overseas market

Eka Pak Global (India) Pvt. Ltd.

Since 2003, Eka Global is the pioneer & leader for Rigid Barrier Packaging in Asia. With expanding Global footprint and Local reach, Eka Global provides innovative products meeting international standards. Using distinctive and advanced technology we deliver packaging solutions for food safety,

convenience and more importantly, up-to-date and contemporary image. This is a key to consumers' desire for "Live a healthier lifestyle". Our ongoing research has developed solutions that are

designed in accordance with the principles of Circular Economy and provide Sustainability for future.

Eka Global amicably acquired Printpack's Rigid Asia operations. This acquisition has made Eka Global as one of the largest & most advanced producer of Rigid Barrier Packaging in the world. With access to the shared unique production technologies and combined facilities in Thailand, China & India; Eka Global offers our customers best of the solutions, sourcing security and capacity. The emphasis on producing packaging solutions for extended shelf life "Longevity Packaging" has lead us to offer novel products & designs that are capable of meeting needs for broad range of food products. Our experience in the international Rigid Barrier Packaging business, profound knowledge, and visionary thinking can support the success of your business. We can offer total packaging solution and provide the latest technology designed for each specific market. Please connect with us to discuss winning solutions for you!

Egli Fasa

EGLI AG, Switzerland (www.egliag.com) has vast experience and the latest technology in the field of Butter and Margarine equipment.

PROCESSING TECHNOLOGY SINCE 1888

PACKAGING TECHNOLOGY SINCE 1959

Egli product range includes,

Butter Processing Line:

Continuous Butter Making - 500 Kg/Hr to 10,000 Kg/hr for White and Table Butter, Butter Silo and Butter Transfer pump, Butter Reworking line for spreadable butter of capacity upto 10,000 kg/hr, Butter Packing Lines - Butter plate of 1 Kg to Blocks of 25 Kg with accuracy of +/- 5 gm Margarine Processing Line: Crystallization of margarine, shortening, low fat spreads and yellow fats, Fully automatic Oil

Butter Processing Line

Butter Reworking Line

margarine in aluminum foil, parchment paper or ecoline. Two product feeding options are available: hopper with augers or direct feed from the production line via resting tube. ARM-B2 machine offers a dosing range 100 - 250 g. The upgraded ARM is more convenient for the operator: it has an integrated lubrication system, partial CIP option, quicker, more comfortable package height change adjustment, and more comfortable change of foil.

<https://youtu.be/IHHKtWxETBc>

BUTTER homogenizer - BH: BH homogenizer is designed to homogenize bulk butter before re-packing. This function is necessary to restore butter properties as they were before freezing. When butter is homogenized, it is ready for packaging into customer brick size portions. Robust design allows reprocessing cooled butter blocks, the temperature of which is: 0 - +10 °C. Capacity: 800 -2000 kg/hr. Exceptional feature of Fasa homogenizer is the CIP system.

<https://youtu.be/Jv-2uqDmEvY>

PROCESSED CHEESE FILLING AND WRAPPING MACHINE - ARU: ARU is an automatic packaging machine for foiling of processed and cream cheese with aluminum foil with or without easy opening system and labeling. Compact design, durability and easy technical maintenance are exceptional features of this machine. Processed cheese is packed into rectangular packages. Machine's output: up to 50 pack/ min; Dose 16,6g, 20g, 30g, 50g, 70g, 90g, 100g. <https://youtu.be/7rZzJhuZr6k>

Our Valuable Client

Fabcon India

Established in the year 1981, we, Fabcon India are one of the renowned ISO 9001:2008 certified manufacturers and exporters of Food Processing Machinery and Conveying Systems. Fabcon India has emerged to be a powerful and a respectable name in the global pavilion of the Snack Processing Industry serving its customers with the topnotch quality at Value for Money (VFM) prices. Fabcon strongly stands for the quality and innovation and aims to bring an elevation in the Food industry.

Our product portfolio consists of Snack Processing Machinery and Equipment, Conveying Solutions and Food Processing Equipment, that are massively appreciated and welcomed in the market for their

consistent performance, low power consumption, longevity, ease of operation, rugged exterior, minimal maintenance, functional fluency and huge production rate. For the manufacturing process, we make use of fine quality raw materials that are procured from our most trusted and dependable vendors. Furthermore, to ensure that the quality is not compromised at all, we make sure that all the set industry standards are diligently followed.

We are backed by the state-of-the-art infrastructure and are equipped with the latest technology like Laser Cutting & CNC. The testament to our quality and dedication is our reputation earned in USA, UK, Canada, UAE, Gulf Countries, SAARC Nations, Africa and so on

Our Specialization lies in the Complete Automatic Processing Line for Snacks, Packaging, Product Conveying & Distribution.

Our major focus lies in:

SNACK PROCESSING:

Snack Food Processing for Convenience Snacks & Indian Ethnic Namkeen:

Extruded Fried & Baked Snacks
Pellets

Crisps / Chips

Tortilla / Nachos: made from Massa & Flour

Multigrain based Chips & Crisps like Pita/Namak Para

Indian Snacks like Sev, Bhujia, Peanuts, etc

Online Weigh Based Continuous Mixing & Coating System

Indian Mixes / Bombay Mix / Chevdo Mix / Chanachur Mix

Flavoring Systems for Ready to Eat Snack;

Dry Dosing

Slurry Based

CONVEYING:

Packaging Applications: Conveying, Distribution & Feeding by using Bucket Elevator, Vibratory Conveyors, Flexible Screw Conveyor, Drag Conveyor, Conveying & Handling of Solids like Snacks, Fruits & Vegetables, Grains, Spices, Pulses, etc.

Tea Grits, Flakes of food, etc.

Warehouse Applications End-of-line Conveying for online transfer of pouches / cases / cartons. Various configurations can be designed.

We offer complete solution for the Modern Snacks & Traditional Indian Snacks & Savories.

We have been serving and catering to our clients' needs to the best of our abilities and always believed in upholding our commitments towards them.

**FBF Homogenizers India
Pvt. Ltd.**

Since 1987, FBF Italia has established itself as a leading manufacturer of high-pressure homogenizers, positive displacement pumps and laboratory homogenizers having more than 4000 installations worldwide. The Buffalo Series homogenizers are used for dairy, food, ice-cream, cosmetic, chemical, pharmaceutical and petrochemical industries.

FBF Homogenizers India Pvt. Ltd., is a part of FBF Italia's global sales and service network, and is solely responsible for sales and servicing of FBF homogenizers in India. FBF boasts of a first-class technical assistance network, with highly qualified and expert technicians, available round the clock for any customer request of start-up or maintenance.

Flavi Dairy Solutions

We are dealing mainly into following activities for Dairy/Food Industries in Any Length

Turn Key Projects, Products development projects, Plant capacity expansion, Value addition projects, Process Mechanization, Due diligence, Energy Audits, Optimization of resource consumption, Skilled manpower resources, Sourcing of Ingredients and packaging materials for Dairy/Foods.

**FLAVI
DAIRY SOLUTIONS**

We are consulting on following products:

Fresh Milk in Sachets/PET/Glass Bottles, Fresh Cream, UHT Milk/Cream, Paneer, Cheese- Various cheeses and its derivatives, Dahi and Dahi based products like Lassi, Butter Milk, Shrikhand, Yogurts, Greek Yogurts etc., Ice Cream, Frozen desserts, Butter and Spreads, Ghee, Condensed Milk & Milk Powders, Traditional Sweets, Kheer etc..., Halwas etc..., Flavored Milk & Milk Shakes, Thick Shakes etc...

**Flexible Steel Lacing
Company Pvt. Ltd.**

As an industry leader since 1907, we understand that conveyors play a critical role in an operation's productivity. And we know that when the conveyors run efficiently, they make a real impact on a company's bottom line. That's why Flexco focuses on making belt conveyor as reliable as possible. Our products help to maximise belt conveyor performance and correct potential problems before they become serious issues. From its inception, Flexco has focused on just one thing, maximising belt conveyor productivity.

*Partners in Productivity***Mechanical Belt Fastening Systems:**

At Flexco, we've spent decades developing a wide range of Mechanical Belt Fastening Systems that get your belts up and running fast and provide long-lasting performance for maximising uptime

Endless Splicing Systems:

With the most advanced technology on the market, Novitool® endless splicing tools help you quickly prepare your light-duty belt and produce strong, long-lasting splices in as little as 8 to 12 minutes

**FGP Food Grade Precleaner:**

FDA approved FGP Food Grade Precleaner meets the highest standards for food processing. FGP can be easily tensioned to minimize blade wear, eliminate belt damage and maximize belt cleanability

Segmented Transfer Plate:

Segmented Transfer Plates from Flexco can help prevent product loss at the transfer point, preventing potential damage to the product as well as the belt and conveyor structure.

Fresh O Veg Pvt. Ltd.

Fresh-O-Veg, founded in 1996, excels in providing end to end project consultancy & solutions for various domestic and multi-national food processing and agro industries, Agriculture and Farm management, Procurement management services and trading of premium quality of fruits and vegetables from farmers to the end users and much more...

As one of the India's foremost food consultation company, we have worked with several esteemed clients nationwide which include renowned multinational food chains, several national

and regional snack producing companies, frozen food industries, governmental and semi-governmental food processing companies and many more still counting on. At Fresh-O-Veg, we offer following services: Strategic and financial Consultancy, End to end food processing Consulting services, Farm Management Service, Procurement management & Supply Chain Management TEAM FRESH-O-VEG

Fresh-O-Veg has in house dedicated team of employees who excel in their respective fields like architecture, processed engineering, utility engineering such as fire, ETP, HVAC, water solutions, food technology, creating New Product Development (NPDs), setting up of standards, standardization of different food equipments, farm management services, accounting and financial etc.

Gemtech Projects LLP

We are manufacturers and exporters of Dryers and ancillary equipment for Spices, Agro and Food Products.

We manufacture the following products:

Continuous Tray / Belt Dryer, Baking Oven, Vibratory Fluid Bed Dryer, Stainless Steel Grinder, Novatex Screener / Grader, Stainless Steel Screw Conveyors, Freeze Dryer, Full Turnkey setup for the Food Processing Plant

Common Applications for the dryer include Desiccated Coconut, Nuts and Seeds, Fruits Processing, Pet Foods, Snacks etc.

We regularly export our products globally and our equipments are efficiently running at Franklin Baker - Philippines, ACP-Vietnam, to name a few.

Goma Process Technologies Pvt. Ltd.

Goma Process Technologies Pvt. Ltd., is a sister concern Company of GOMA Engineering Pvt. Ltd. An ISO 9001 company more than 37 years old, provides Turnkey solutions & projects for Dairy, Ice-cream, Yoghurt, RTS Fruit Juice, Pulp, Tomato Ketchup, Coconut Milk & Coconut Water processing etc.

Also, GOMA manufactures equipment's like Homogeniser, Pasteurizers, UHT Aseptic Sterilizers, Tanks, Cup Filling & Sealing machine (Rotary & Linear), Centrifugal Pump, Continuous Freezers, Crate Washers, Evaporators, Storage tanks / Silos etc.

Goma's manufacturing facility are as under

Head Office at Mumbai -	2000 sq.mtr
Unit 1 & 2 at Wada, Mumbai -	6500 sq.mtr
Unit 3 at Pune Fabrication of Tanks/ Silos -	3000 sq.mtr
Unit 4 at Vapi Building Area -	3000 sq.mtr
Unit 5 at Surat SEZ for exports -	2000 sq.mtr

Goma is backed by:

More than 50 well-qualified and experienced Technocrats and Engineers from Food Industry
125 trained skilled, experienced employees.

Goma Sales & Service network: Mumbai, Kolkata, Bangalore, Chennai, Delhi, Jebal Ali, Dubai, Nairobi, Kenya.

Exports To - Kenya, Tanzania, Uganda, Ethiopia, Nigeria, South Africa, Madagascar, Mozambique, Zambia, Algeria, Congo, Malawi, Sudan, Australia, France, Malaysia, Vietnam, Indonesia, Switzerland, U.K, U.S.A, U.A.E., Oman, Algeria, Tashkent, Nepal, Bangladesh, Sri Lanka, Bhutan, Burma, Ukraine etc.

Gopal PrintPack Solutions

We, Gopal PrintPack Solutions, based in Rajkot, Gujarat, India. A five-year-old one of the leading Flexible packaging manufacturing and converting company. Our aim is to provide a sustainable packaging & wrapping the future with creative joy. We are offering a wide range of products as below.

Food Packaging: Snacks - Chips, Biscuits & Confectionery, Cheese packing, Spaghetti & Macaroni Packaging, Dates & Nuts Packing, Tea & Coffee, Juices,

Dips and Sauces, Dairy & Ice cream, Edible oil, Pet Food, Sea Food & Vacuum Pouches, vegetables packing. Non-Food Packaging: Seed & Fertilizer, Soap & Cosmetics, Detergent & Chemical, Incense Sticks, Pharma Products, Lubricant Oil. Gopal PrintPack Solutions is certified with ISO 9001: 2015 & BRCGS Standard for Food Safety & Hygiene. We also take immense pride in our world-renowned clients like Amul, Dabur, Gopal Namkeen, Haldirams, Sanchi, Evita (RP Group), Top N Town, Cycle Agarbatti and many more.

Heat and Control (South Asia) Pvt. Ltd.

Established in 1950, Heat and Control is a privately-owned company with a global team that has built an extensive knowledge bank and developed a wealth of experience and expertise. Access to production and technical support from a network of engineers, food technicians, field service technicians, skilled tradespeople, and support teams provide food manufacturers with confidence to achieve production goals.

HEAT AND CONTROL®

- Ten manufacturing facilities, 11 test centres, more than 30 offices globally
- Testing, design, engineering, manufacturing, installation commissioning, user training, spare parts, and provision of after sales service.

Advancing food processing technology with creativity, passion, and unmatched expertise at a global scale. For 70 years across food industries and applications, Heat and Control's specialised equipment solutions have set the standard for yield, efficiency, and safety.

Offering complete processing and packaging lines that feature integration from start to finish ensures full line efficiency and performance. With complete equipment lines for snack foods, including Namkeen, corn products, nuts, French fry and potato products, meat, seafood and poultry, fruit and vegetable and other food products.

Food Processing: From raw produce preparation and value-adding to frying, cooking, thermal processing,

seasoning, and coating. Includes support and ancillary equipment to maintain high quality taste and consistency.

Product Handling: Maintain efficient production at optimal capacity. Smart design and line management that achieves accurate feed, accumulation, and distribution flow. Includes conveyors, elevators, and proportional feeding systems.

Packaging and Inspection: High speed and accurate weighing and packaging systems for all kinds of food products. Followed by the highest sensitivity X-ray and metal detection technologies for quality control and food safety requirements.

Snack Foods: Producing the world's best tasting snack food products, our industry leading end-to-end systems process and package the highest quality product. From raw to packaged product, complete snack lines produce high quality natural potato chips, corn and tortilla chips, taco shells, corn tortillas and tostadas, roasted nuts, coated nuts, namkeen and many more.

Prepared Foods: Our value-added systems prepare and cook consistently superior beef, pork, poultry, and seafood to create a distinctive quality that stands out in the marketplace. Our French fry systems are the workhorse of the industry. We process a broad range of styles, including straight cut, crinkle cut, curly fries, potato wedges, and a variety of potato co-products. Whether you measure success by flavour, efficiencies, improvement, or innovation, count on us to deliver results. Whatever your product needs, we can meet it with precision and passion.

With over 30 locations worldwide, Heat and Control support our customers with locally based manufacturing, engineering and product development, along with field service, parts, sales and training services. Our commitment is to provide the latest technology and excellence in our standard of equipment as a means of achieving productivity, flexibility and accuracy in the design and manufacturing environment.

Hexagon Manufactures

Hexagon manufactures 3D Tumbler Mixer Alphie for uniform powder mixing application. We have a mixer range starting from 2 Ltr hand operated to as big as 3000 ltr fully automatic one. We offer various designs like - removable mixing drum, provision of liquid dosing while mixing, mixing for explosive powder etc. Having exported in more than 35 countries

ALPHIE®
3D TUMBLER MIXER

and served more than 20 industries, Alphie is the choice of mixer for mixing homogeneity

requirements. Alphie mixer operates on the principle of kinematic inversion and does mixing with low shear force. There is no rotating agitator / blade in the mixer. Highest quality of uniformity is achieved by 3D Tumbling movement. We continuously improve and develop new applications and solutions. Contact us for any specific or customised mixer requirement.

HRS Process Systems Ltd.

HRS Process Systems Ltd., is part of the UK based HRS group, an established name in the field of innovative heat transfer solution. HRS Group is globally known for providing energy efficient range of heat exchangers and heat exchanger-based systems. We are equipped with a strong network all across domestic and international market like UK, Spain, USA, India, Australia, New Zealand and Malaysia to fulfill technology needs of process industries. HRS PSL is ISO 9001:2015 certified company and accredited ASME 'U' stamp in heat exchanger design and manufacturing, with a state-of-the-art facility near Pune, India.

Our focus continues to be in the key growing segments of chemical and agrochemical processing,

pharmaceuticals, fruit and beverages processing, dairy nutraceuticals, prepared food, etc. Our innovative range of ECOFLUX* corrugated tube heat exchangers, Shell & Tube heat exchangers, HRS FUNKE Plate heat exchangers, Hot water system, UNICUS scraped surface heat exchangers, systems for food processing and evaporation application processing solutions are required across the industry spectrum and hence we are able to capture the growth in industry in any segment. We plan to have investment in expanding our

facility and other resources, to cater to the growing market demand for our products and services.

We are looking at expanding in the growing international market in ASEAN countries, Africa and Latin America, apart from working with group companies in developed economy of Europe and USA. We are investing in technology driven pilot units for trials and product development at customer's premises. Our product portfolio is being enhanced to take care of complete process plant requirement in the food and beverage industry for complete process line. We are already executing some projects for mega Food Park and beverage processing.

HRS, truly a one-stop-shop for all your heat exchange requirement!

Infinity Automated Solutions Pvt. Ltd.

We are a Pune based ISO 9000 -2015 certified manufacturer of End of line packaging solutions, secondary packaging systems, Cartoning machines, check weighers and conveying solutions.

We have 300+ successfully installed packaging lines in the various industries in past 6 years such as Spices, Namkeens, Tea Industry, Dairy industry, FMCG, Soap, Seed and Fertilizer Industry, Cosmetic, Pharmaceutical.

We have a team of 80 talented and committed engineers who works to their heart and soul to deliver the promise.

Our total effort is to provide automated solutions for all your end of line packaging and process challenges to avoid the stressful manual work with simplified automated working environment.

We have a state of the art work facility which uses most advance and cutting-edge manufacturing processes to deliver the best quality product.

As we promote automated and systemized way of working in production, we at our works use the SAP system for all the company operations to serve our customers in a more organized way.

We have a full-fledged design studio with Solid.

Our valued customers include Hindustan Unilever, Godrej Consumer products, ITC Spices, TATA consumer products, MTR Foods, Balaji Wafers, Parle, Adani Wilmer, Mars, Marico, Everest spices, Patanjali, DS spices, Coromandel, WELSPUN, Goldiee, Wagh Bakri Tea, Vikram Tea, Dairy Day, etc..

Jaivik Food & Research Pvt. Ltd.

Jaivik Foods was started with the vision to offer world-class technologies at a competitive price under one roof. Backed by a team of 25+ highly skilled experts and led by founders (Ex-CEOs) with global experience with more than 100 years of combined experience, we're one of the leading companies offering quality processing solutions along with equipment manufacturing for the food industry. At Jaivik Foods, we blend our expertise, passion, and

commitment to quality to deliver turnkey solutions to local, national and international clients.

Jaivik offers customized solutions for food processing - grinding, sieving, mixing and classifying with our state-of-the-art mills. We're experts in food technology and help food businesses throughout concept to commissioning. As a Process solution provider, we specialize in turnkey projects and building long-term client relationships on the foundation of trust and technology. Our focused approach, innovative and value-driven solutions and the team of experts come together to deliver engineering excellence in the food industry.

Jaivik verticals

Technology Solutions

Jaivik offers a wide range of processing solutions for the food and spices industry with an economic value-driven approach and made to order end-to-end solutions by using its diagnostic measures. We provide concepts to commissioning solutions for greenfield and brownfield projects.

Production & Trading

Jaivik owns a dehydration plant in Rajasthan with all the leading machinery for dehydration of vegetables like onions. We also offer a cold storage facility for all the products to be stored until they are transported. Streamlined engineering, food safety, advanced machinery and multiple drying methods for different foods and vegetables make us a preferred choice for dehydration in India.

Research & Development

We ideate on multiple levels to bring new revolutionary solutions for our clients. R&D is an integral part of our business, and it builds the foundation of our continuous success and innovation. Our research projects help to enhance the quality of good food at an affordable price.

Jay Instruments and Systems Pvt. Ltd.

Jay Instruments and Systems Pvt. Ltd. is one of the leading manufacturers of Industrial Weighing Solutions for the industries. We also provide different Inspection and Packaging Solutions like X-Ray Inspection, Metal Detector, High Speed Checkweigher, Flow Wrap Machines, Auger Filling, Tray Filling, Pick-Fill-Seal

Systems for the industrial. Our portfolio expands to Continuous Inkjet Printers (CIJ), Thermal Transfer Overprinters (TTO), Thermal Inkjet Printers (TIJ), Piezojet Printers for primary and secondary packaging. We have Color and Gloss Measurement Solutions like Spectrophotometers, Glossmeters, Color Reader. We also provide Laboratory Spray Dryer and Beadmill for R&D. Our sales and service team are present across India serving clients in the industry.

Jeevika Food Machinery Co.

Jeevika Food Machinery Co., Chennai, India is a young and dynamic Company founded with the motivation to offer a world class high end optical sorting and packaging technology to Grains & Food Industries such as: Rice Industry, Wheat Industry, Maize Industry, Pulses Industry, Nuts Industry, Dry Fruits Industry, Spices Industry, Seeds Industry, Tea & Coffee Industry, Salt Industry, Sugar Industry, Pasta Industry, Snacks Industry, Confectionery Industry, Cookies Industry, Frozen Fruits & Vegetables Industry, Dehydrated Vegetables & Fruits Industry, Fresh Vegetables & Fruits Industry and Ready to Eat Food Industry.

Jeevika Food Machinery Co., Chennai, India is exclusively dealing in Optical Sorting and Packaging Machineries for Grains & Food sectors since 2010 from the consortium of world class organizations from various countries like Italy, Czech Republic and The Netherlands.

Quadratic Sorting Technology, World Fastest VFFS Packing Technology, High Speed Multilane Stick/Sachet Pack Technology, Automatic Rotary Pre-Made Pouch Filling Technology, World Innovative Packaging Concept for Trays and Cup

IT'S TIME TO CHANGE VISION

3U Vision is a young company but with unparalleled experience management. Antonio Uzzo, current Owner and Managing Director, was the owner of SEA, the largest Italian company of the sector, then merged into the Danish multinational CIMBRIA for

which he held the role of CEO until December 2018 with extraordinary results. The constant search for innovative technological solutions led him in 2019 to create a team of excellence and found 3U VISION with the aim of redefining the quality standards of the optical sector once again.

We aim to create a technology that has the ability to capture even the smallest detail, to improve nutrition, health and the environment in which we live. FENIX optical sorter is the combination result of 40 years experience in vision systems and the latest technologies, in some cases developed exclusively by 3U VISION SRL, Imola, Italy.

FENIX is the first 4 colour single camera optical sorter. It is also available with an additional 3 wavelength SWIR (InGaAs) patent pending system to figure out all the problems of the selection: from the color to the foreign bodies, from the shape to the transparency, up to the dimensions.

50 years of experience in packaging industry

Viking Mašek:
Future of

packaging. Since

the foundation of the company in 1964, customer's satisfaction has been VikingMašek's highest priority. We achieve this goal by continuously improving the cost effectiveness and performance of all our machines, as well as focusing on innovation for faster and more effective machines and new attractive bag styles. VikingMašek's machine portfolio makes us a single source for all your needs - from simple VFFS machines, through product handling up to turn-key packaging and processing lines. Whether you are looking for a standard single machine or a customized solution, VikingMasek offers packaging equipment tailored to your requirements.

With worldwide network of sales, service and support VikingMašek belongs to the leaders of the market of packaging machines. VikingMašek develops intelligent packaging technology at the highest technological level, to meet the most stringent demands. That is why VikingMašek already today looks at tomorrow and beyond. Hence, the following points are very important for us.

The Innovative Packaging Concept with an authentic look Abarka Packaging Solutions started developing and

Abarka
packaging solutions

innovating in the food sector during the last century. Back then we were already pioneering ways

to improve the shelf life of prepared fruit and vegetables by 50%. We were also responsible for introducing: the 1st salad dish, laser-perforated film and a new generation of steamed meals. We also developed the Fresheur process (a very gentle form of pasteurization) for fruit juices and vegetable soups, followed by the patents for IPS® (intelligent preparing solutions) and the SkirtAll® design.

We created these packaging designs while we were developing food concepts which are still successful on the market today. Successful packaging developments led to the creation of Abarka Packaging Solutions BV in 2009. The packaging concepts are improved and suitable for more market segments and region.

Abarka is now working together with renowned international packaging companies, machine manufacturers and knowledge institutes. Whatever your food/product range, Abarka can offer attractively priced solutions to make your products stand out, with a focus on convenience, health and design. As well as industrial manufacturers, we also offer solutions for small-scale retailers, regional producers, restaurateurs and caterers.

June Enterprises Pvt. Ltd.

JUNE was born with an Eagle's eye for quality and to become preferred source with various but apt solutions. Our product serves critical needs of Pharmaceuticals as well as Food & Beverages.

Food & Dairy products need efficient and quality handling at each step of manufacturing. Right from the basic step till

packing one needs to ensure strict manufacturing compliance and standard process. To support manufacturer's efforts in producing high quality products, June offer's wide range of product for manufacturing to hygiene control and process monitoring.

Good cleaning is always a critical control point in all HACCP control. Hence, we have Vikan's fully color-coded brushes which minimize risk of cross contamination. Its helps with HACCP compliance & also approved by FDA.

Dycem's contamination control mats and flooring are scientifically proven to be the most Effective, long lasting and high-performance method of minimizing foot, wheel and airborne Contamination.

MWE swab for Microbiology sampling testing.

We do also have ready to use Microorganisms from Microbiologics. Our BST range of metal detectable products - pen, marker, first aid kits, knife, cable tie & many more improves food safety. The materials used in detectable items are designed to trigger a metal detection or x-ray inspection system, in case the item is accidentally, or deliberately introduced to food during the food production process.

Positive drive belt with flights and scoop for Snack food application, Spiral freezer in feed and down take conveyors and spiral conveyor for Frozen Food, Non-stick belt dough ball and automatic belt tracking system conveyor for Bakery and confectionary, lastly Bucket Elevator and horizontal Incline conveyor for Packing Section.

Kiron Servepreneurs Pvt. Ltd.

The Value Link in the Food Chain - We connect the best food processing systems manufacturers from around the world to India's flourishing food industry!

Over the past decade, Kiron Food Processing Technologies (KFPT) has played a vital role in finding innovative solutions by representation

and connecting the best food processing systems manufacturers from around the world to India's flourishing processed food Industry.

With our forte in broad-spectrum Engineering and Indigenous knowledge, we have set high standards in our core values of Global Technology, Project Engineering Capabilities, Simplified Solutions, prompt support, and after-sales service, thus maintaining a long-term association with our clients. Our involvements cover a wide variety of Snacks, dairy products, Dried Fruits and Nuts, Fruits and Vegetables, Grains, Bakery and baked goods, candy and other Product Categories such as Powders, Frozen, etc.

We also deal with vibratory feeders and conveyors that are capable of conveying a wide range of particle sizes. Designed to be robust, either of an open or enclosed trough design. The trough-shaped structure is particularly suitable for conveyors used in extreme environmental conditions, due to its easy cleaning ability, and is also suitable in the chemical and food industry. Based on our product knowledge, our sincere relationship with the industry and thanks to our in-house group of Engineers and Designers, we also carry out license manufacturing for global equipment manufacturers including Lindor, Intralox, etc., at our 50,000 sq. ft. state of the art facility in Ahmedabad. Headquartered in Mumbai and with our regional presence in Ahmedabad, Chennai, Kolhapur, New Delhi, and Pune, we also have a well-equipped testing facility for our customers to test and validate their products with our solutions.

Kanchan Metals Pvt. Ltd.

D-9/3, Surajpur Industrial Area
Site-V, Kasana, Greater Noida-201312, U.P.
www.snackfoodmachines.com

Kanchan Metals is a leading end to end solutions provider for food processing equipment. Based on over 30 + years of proven experience, we help shape the food processing industry of tomorrow, through advanced systems and services, line engineering, eco-solutions, and other innovations. We provide equipment for the food processing industry specializing in the fields of:

Snack foods, Bakery, Meats & Plant Based Products, Instant foods, Confectionery, Packaging & Hygiene. We launched a varied number of snack machines with an aim of providing global technology with local support. We have launched automatic bhujia/sev production line, automatic moong dal processing line, mixture line, extruded snack frying line, sabudana frying line, corn cooking and steeping line and bucket elevator system.

The bhujia/sev machine is a fully automatic line for producing ethnic Indian wet dough based snacks from 500kg/hr onwards, whereas the automatic moong dal processing line would take 500kg/hr onwards upto 3,000kg/hr. The mixture line machine which is a fully automatic line for weighing and blending of traditional Indian snack mixtures can take 500kg/hr onwards. The automatic random extruded snack lines which are built as an interface with extruders from American Extrusion International USA, deliver consistent results for production of random fried extruded snacks which are unmatched in texture. These lines are designed for continuous production runs.

We also offers conveying solution under four major categories like Snack food application conveyors, Frozen food application conveyors, bakery and confectionary conveyors, and Packing section conveyors. Within these four categories, there are different types of conveyor belts like Wire Mesh belts,

KP Automations

Starting with a simple beginning in year 1998, Today K.P. AUTOMATIONS has also marked its Presence in Various Sectors like Food Processing, R&D, Packaging, engineering, fully plant automations.

We would like to introduce ourselves as one of the largest Manufacture of Pasta line & Pasta Equipments, Vermicelli & Macaroni Machines Since 1998 : OVER 250 pasta lines in the world.

Magnam Netlink Pvt. Ltd.

Magnam acts as an EPC contractor for providing turnkey, custom solutions to its customers for processing, packaging and utilities for dairy and beverage industry.

MAGNAM

Engineering food to perfection

separation, pasteurization, packaging, storage & utilities.

Magnam has also custom-built plants for processing of various dairy products such as Ice Cream (Candy, Cup-Cone, Extrusion), Paneer (Fresh, Frozen), Butter/Ghee (CBMM, Brick, Chiplet, Reworker), Yoghurt, Flavoured Milk, Shrikhand, Cheese

Magnam also provides individual equipment like pasteurizer, CIP systems, Butter packing, ice cream freezer & packing on demand.

Experienced professional teams provide economical customized solutions for product handling, ergonomic feeding, integrating upstream and downstream systems and many more. MAKEWELL also upgrade any existing machines for latest features with better productivity, manpower saving etc.

Business Motto:

We focus more efforts on customized solutions and develop world class machines to achieve higher productivity and efficiency. Company's vision is to develop and maintain lifelong customer relations and ensure machines for trouble free operations for long years.

Existing Customers Base

More than 250 machines operate efficiently in India and many parts of the world. Major part of sale is for Biscuits industries where biscuits are produced in large quantity in daily three shifts continuous operations.

Various industries we serve are food industries (Viz Biscuit, bakery products, chocolates, cereal bars, Noodles etc.), FMCG industries, (for eg. Detergent bars, bath soaps, mosquito repellent coils, sanitary napkins, hair dye sachets, tooth paste tubes and sachets, etc) Electrical industry for switches, contactors etc, Pharma industries for pouch packing applications manually for tablet blisters.

Novelty of Makewell Machines

- Tailor made machine design concept helps customer's to achieve their special requirements including space optimization, ergonomics etc.
- Simplified, PLC servo based drive systems to increase packing speed with better energy, with less efficiency noise, vibration, easy changeover, better hygiene etc.
- Introduce customized feeding systems to individual customers according to their among needs
- Share knowledge with customers in finalizing layouts and machines for trouble free operations.
- Visit customer sites regularly to get multi-level feedbacks and sort out technical issues of various kinds.
- Committed in maintaining quality and schedule

Makewell Engineering

Makewell Engineering is an India based manufacturing and solution provider in the field of primary and secondary Horizontal Flow Wrap Packaging. The founder has a vast and versatile experience of Inland and overseas customer demands in packaging industry.

**Menon Technical Services
Pvt. Ltd.**

Get a perspective of the best in the food processing technology the world has to offer from MTS.

mtsfoods.

Vanmark has been designing and manufacturing food processing

equipment since 1954. Best known for its peelers, Vanmark also makes machinery to store, destone, convey, wash, inspect and fry many food products. For example, Vanmark's storage bins have unique 'let downs' and fill conveyors that virtually eliminate product damage during filling. Bins are available with belt conveyor auger discharge. The new model 2920 peeler/washer/scrubber most efficient industrial peeler on the market. The natural flow gate and maintenance free drive, quick change roll system and proprietary peeling technology all contribute to its high efficiency.

FAM® Cutting Machines: Innovation and advanced machine design are two words normally associated

kg paper cartons. A typical line can reach a capacity of 4th..

TEMKE is one of the main raisins machine manufacturers in Europe and due to its long experience in the product and good reputation for building reliable production line it has earned the trust of its clients and manage to expand its customer based to the whole continent and beyond. United Kingdom, The Netherlands, Italy, Spain, South Africa, Israel, Turkey, Egypt, Iran, Australia, China, India and some of the countries where TEMKE's machines have been exported to.

TOMRA: TOMRA Sorting Solutions is the preferred supplier for the food market's sensor-based sorting, peeling and analytical needs.

ODENBERG and BEST, together in TOMRA Sorting Food, design and supply innovative world-class sorting, peeling and process analytics solutions for a wide range of applications. Through continued investment in research, development, people and knowledge; ODENBERG and BEST have acquired prominent positions in several sectors of the food processing industry such as the dried fruit, nuts, fresh cut, fruit, potato, meat, seafood and vegetable market.

**TEMKE**
CHRISTOS KATSIYANNIS

with FAM®. With worldwide more than 3,000 machines in operation and 50 years of experience, we will be happy to help you improve your cut quality and reduce your production cost by increasing your production.

Meyer Industries offer a family of integrated companies that provide a single source of bulk material handling and food processing equipment. The combined knowledge and experience of Meyer Machine Co., and Garrouette. Inc. offers a full resource for virtually all you are handling and processing needs. Garrouette, provides top-of-the-line food processing equipment including mix-blink systems, blanchers, hydro-chillers, washers, dryers, trim & inspection equipment and more.

TEMKE: TEMKE is operating as a raisin processing and packing machine manufacturer for raisins with high standards of quality and safety. Its machines are designed according to European Union rules and restrictions for the food industries.

In more detail, the process line for raisins includes machines for washing and breaking the lumps, automatic, sulphuring (if it is necessary), removing stones and wood-sticks, drying in automatic dryers (if it is necessary), oiling, cutting and removing the stems, cleaning and grading, hand picking and finally automatic weighing, sticking and packing inside 5-15

With over 30 years of experience in the food industry, TOMRA Sorting can offer customers an integrated approach maximizing yield, quality and efficiency; collecting real-time information from farm to fork.

TOMRA Sorting Food has more than 7,000 machines installed worldwide and now has an even more comprehensive support and service network ensuring good customer service. In addition, customers can rely on eight test and demonstration centers worldwide where they can trail their own products to ensure our sorting solutions meet their specific requirements.

The unrivalled strength of ODENBERG and BEST gives TOMRA Sorting the possibility to continue

on meeting customers' need by developing state-of-the-art technologies that optimize the customers' production flow and support a consistent high-quality output.

Milton Instruments

MILTON INSTRUMENTS is ISO Certified Manufacturer and Exporter of 'MILTON' Weighing Balances, Moisture Analysers, Density Meters, GSM Meters, Weighing-Printing-Shipper-Check weighing Scales and Password Protected Data Printers with Date-Time.

Milton also develops Softwares for Daily Calibration, Uncertainty, Eccentricity,

Statistical Evaluations, Flow Measurement, Density Measurement, Check-Weighing of Tablets/Capsules etc. MILTON is serving across India & across various business verticals including Laboratories, Pharmaceuticals, Chemicals, Diamond & Gold Jewellery, Agriculture, Food Beverages, Dairy, Paint, Oil, Adhesives, Plastic, Metal, Textiles, Engineering, Healthcare, Hospitals, Education and Research Institutions for After Sales Service, Major Repairs, Annual Maintenance, Calibration, Verification, Validation and Certification.

Minipack

INDIA's PIONEER (since 1969) & Leading manufacturers of complete range of Shrink & Stretch Wrapping Machines. Over 9000 machines supplied globally.

In terms of performance, we have been honoured by the M/s IIP & M/s IPMMI vide their prestigious INDIA STAR, PAC MACHINE, IMDR & PAPEREX awards continuously since 1977, 1979, 1984, 1988, 1992,

1996, 1998, 2000, 2005, 2008, 2010, 2011, 2012, 2013, 2014, 2015, 2017, 2018 & 2019, MODI AWARD & INDIA'S MOST ETHICAL PACKAGING MACHINERY Mfg. Co. AWARD.

INDIA's first ISO certified SHRINK & STRETCH WRAPPING MACHINE MANUFACTURER.

ALL SYSTEM CE Certified.

The Total machine being offered includes :-

High Speed Online Auto Collating systems.

Automatic Tray Loaders where so required.

Fully Automatic Wrapping Machines for sleeve wrapped (2 bulls eye openings at the side) or totally enclosed packs with or without tray.

Different types and sizes of Shrink Tunnels compatible

in all respects to pack and product requirement.

Automatic Neck Band Shrink Sleeve / Label applicators
Pallet Shrink Wrapping Machines.

Complete range of Automatic / Semi Automatic / Manually operated Pallet Stretch Wrapping Machine, Reel/ Roll Stretch Wrapping Machines.

Reel / Roll Stretch Wrapping Machines

Spiral Banding Machines for length profiles.

Individual Carton Stretch Wrapping Machines.

Doughnut Wraps (For Wrapping Through the Core ID) for tyres, Wire & Pipe coils, etc.

New Imperial Associates
Exim Pvt. Ltd.

New Imperial Associates Exim P. Ltd. are manufacturer, supplier, exporter, service provider, industrial automation solutions, innovative & customized industrial equipment, fully automated food processing units, hand held coding solutions and complete range of packaging machines. We offer products to our clients that are sourced from world's well known vendors so that we could distribute outstanding product range in all possible areas. Further, our team of employees works in coordination with our vendors and clients to deliver

(SPECIALISED PACKING & AUTOMATION SOLUTIONS)

an excellent output in the market.

Utilizing the services of experienced industry professionals, we have been able to ensure a flawless delivery of products in the retail sectors. Our quality products and efficient customer queries solving ability help us to gain immense recognition among our clients. We always look forward to form long-term business relationship with our clients and build their trust & confidence in us.

Our company is dedicated to bring & introduce world class technologies to the market for the over whole development of the industrial sector. When it comes to the quality of the equipment and services our company doesn't compromise on this and only procure and provide the best technology and cost efficient equipment and machinery. Our products and durable and long lasting performance that exceed expectations of customers and delight them in the best possible manner. We believe in strengthening & maintaining our relationship with our customers through excellence in our quality & service.

Our Excellence

We are the well experienced in the field of packaging machines & coding equipments. We deals in only world class and best technologies available in the market today. We never compromise on the quality and efficiency of the equipments, we supply as we believe that making one clients is as hard as losing existing clients as easy. We always focus on to provide the best value or return on the investment done by our clients and customers.

Our Range of Products

Rotary Pick-Fill Seal-Vacume Packing Machine, Blister MAP-Vacume Thermoforming & Tray Sealing Machines, End of Line Packaging Automations, Aseptic Carton, Gable Top, Spout Pouch & Cup Liquid/Paste Packaging Solution, Metal Detector & Check Weigher Inspections Systems, Multi Head Weigher - Imperial Brand (Certified by Legal Metrology Department Gol), Handheld Inkjet Coding Printer - EBS System - Germany Make, Secondary Packaging Solutions and other dedicated trunk solutions.

Some of our valued clients

Nichrome India Ltd.

Since we developed India's first indigenous milk packaging machine in 1977, we have been at the forefront of next-generation packaging technologies; a brand trusted for its rich legacy of pioneering innovation, extensive domain knowledge and

manufacturing competency in packaging systems. For

enterprises big

and small, for applications existing and emerging, we offer infinite possibilities in integrated, automated packaging solutions - as we partner with customers through the complete lifecycle, offering application-specific solutions, backed by dependable service and support. Based in Pune, India, our sales & service network spans India and the world. We have presence in 45 countries and more than 7000 successful installations worldwide.

Nihira Food Engineering LLP

NIHIRA FOOD ENGINEERING LLP, manufacturer of food processing machinery and complete food processing plant. We are located in Pune, India and Manage by team of young, dynamic, dedicated Engineers, technologists having vast experience in designing, manufacturing of food processing machinery and complete plant. Our main focus is towards providing the best, economical and internationally acceptable engineering solutions with an aim to minimize the initial capital investments in food and pharma sector.

Our major product range includes -

Jelly candy making plant, Jelly toy plant, Hard boil deposited candy line, Fruit jam plant, Tomato ketchup plant, Complete RTS plant, Cake mix plant, Complete milk dairy plant

Our individual machines -

Liquid/ Powder filling and capping, Candy depositor, Cup filling and sealing machine, Jelly toy filling and sealing machine, Modified atmosphere packaging (MAP) machine, Cooling/warming tunnel, Spout pouch filling and capping machine, Steam shrink tunnel etc.

Why we?

All our machines are of the global industry standards and we able to attract huge client in the country as well as out of country.

All our machines are made from Stainless steel material, which gives the machine strong and long lasting.
our machineries provides satisfactory output and can be customized as per the need.
Our machineries come with simple instructions manual which makes it easy handling.
And we say "ENGINEERED TO AN EASY LIFE".

Nxt Trade & Agency Services India Pvt.
Ltd. + Jonge Poerink Conveyors BV

Established in 1932, Jonge Poerink Conveyors has developed into globally acknowledged specialist in reliable internal conveying systems. Our strength is in developing, manufacturing, and supplying high quality Spirals and Curve conveyors. With thousands of installation globally, we are a trusted partner for our clients in empowering them to automate their production lines. We cater to multiple industries like Food & Beverage, E-Commerce, Warehouses, General industries, automotive and many more. Our conveyors are compliant with USDA and FDA guidelines. Our speciality is in offering best material conveying solutions that are power efficient, robust and consume minimal floor space to maximize your operational efficiency.

MWE swab for Microbiology sampling testing. We do also have ready to use Microorganisms from Microbiologics. Our BST range of metal detectable products - pen, marker, first aid kits, knife, cable tie and many more improves food safety. The materials used in detectable items are designed to trigger a metal detection or x-ray inspection system, in case the item is accidentally, or deliberately introduced to food during the food production process.

Nxt Trade & Agency Services India
Pvt. Ltd. + Ashworth Bros. Inc.

Ashworth - With 75 years of revolutionizing the future of conveyor belts, Ashworth continues to lead the market with the most conveyor belt patents in the food processing, can making, and material handling industries. Ashworth offers a full range of belts, for various applications from freezing, cooling, and heating tunnels to ovens, pasteurizers, and steamers.

As the inventor of the lotension spiral system. Ashworth developed the true-tracking CB5 Baking Band®--a baking industry standard. Companies around the world depend on Ashworth's quality products, reliable customer service, innovative solutions, supported by a worldwide network of direct sales and independent representatives.

Omidi Industrial Machinery

Omidi Industrial Machinery was established in 1990.

We are the designer and manufacturer of:

Complete semi and full automatic line for encrusting and co-extruding machinery (center filled cookies, biscuits & confectionery products).

Complete semi and full automatic line for cupcakes.

Complete full automatic line for sponge layer cake (mini roll & swiss roll).

Complete full automatic line for biscuit sheeting (Hard biscuits) & rotary molder for soft biscuits.

Complete line for choco pie machinery.

Complete line for bread (center filled bread).

We exported our Machinery & equipment to over 55 countries worldwide.

Pace Packaging Machines Pvt. Ltd.

Pace Packaging Machines is an organization dedicated to manufacture high quality Vertical Form Fill Seal Machine (VFFS) of international standards. With more than 2200 Installations in India & Abroad in 30+ Countries & with high rate of repeat orders, PACE is one of the leading

PACE

supplier of Machines in Snack Industry.

PACE has ISO 9001-2008 quality certification and all PACE machines are CE certified.

Technical Capabilities

Robust, rugged, simple & open frame design & construction.

First packaging machine to adopt electronic coming through Motion Controller.

First to offer network-based

machine & network capabilities for SCADA &

Other MIS products.

In-house manufacturing with CAD-CAM for all parts.

Efficient spares & service

back up with large

inventory of spares.

PACE is technological leader for setting up new

standards in high-speed baggers in challenging

products.

Packmech Engineers

We are Leading Manufacturers of world class Tray Sealing Machines with MAP - Technology & Vacuum Packaging Machine. Installed more than 2100 machines across India. The machines designed to carry out the tray sealing operation vary in terms of size and

POWERVAC

output all designs currently available. Also the company manufactures customised packaging solutions according to client requirements.

New technologies presented by

Pakona Engineers (I) Pvt. Ltd.

Pakona Engineers, an ISO 9001 Certified Company is a leading manufacturer of packaging machines from India with world wide installations in over 80 countries. Pakona provides High speed packaging

machinery, for a wide range of products like powders, Granules,

**PAKONA
ENGINEERS**

solids, Liquids & pastes serving a variety of industries like food, Bags, Pharmaceutical, cosmetics-FMCG & Agro Chemicals.

With over thirty years of experience in packaging machines, Pakona has become industry leaders in the Design, manufacture and integration of Horizontal & Vertical Form Fill Seal Machines, Bag Filling Machine. Horizontal Cartoners, Vertical Balers, Fully automatic Rigid Packaging Lines for Bottles, Pets Jars & Cans.

We also serve the Construction Industry by supplying complete plants for manufacturing Reinforced Concrete Pipes.

Paradise Rubbers Pvt. Ltd.

Paradise Rubbers P. Ltd., is a Professional organization, managed by a Team of Technocrats based at Waghodia (Office & Factory) and Mumbai (Office).

Paradise has a long-standing experience in the field of Specialized Industrial Belts, and is known for Quality / Service/ Solution Provider with End consumers & OEM's.

Rubber Division; The company houses all rubber processing machines to compound, build and construct, cure and finish the belts to individual specs capable to manufacture Special Purpose Niche Elastomer Coated Belts having its application into both Primary and Secondary Stage of Food Packaging; Like the VFFS Machines - Friction and Vacuum Types, Package Labelling, Package Bottling and Labelling, Folder & Gluer Equipments.

Light Belting Division; The Company has technical tie-up with ESBELT, Spain for - PVC, PU, Polyolefin Conveyor Belts The Belts confirm to USFDA, EU FDA Compliances, Cut and Abrasion Resistance, High Resistances to Vegetable and Animal Oils and Fats, Mineral and Corrosive Oils, Antistatic Properties. At the

factory the Company houses state of art equipments for Jointing and Value Addition using High Frequency Equipments for Fixing of Cleats and SW.

The Company boasts a large Customer Base into numerous Industrial Sectors.

The Rubber Conveyor Belts too have a large spread application with the Customized Made to Specificity facility, the company manufactures Chevron Belts, Cleated and Side Wall Belts, Patterned and Rough Top Belts to suit various rigorous applications.

Our USP - Team of Technocrats qualified to the exact purpose and one Mind Set - Made In House with Independent Capabilities - Substituting the Imports intern Making Ourselves Self Reliant

Products:

Rubber Section - VFFS Belts, Labelling Belts, Caterpillar and Pull Belts, Feeder Belts, Folder Gluer Belts, Patterned Rubber Belts, Foam Coated Belts, Rubber Coated Belts

Light Belting Section - PVC, PU, PO Conveyor Belts; Timing Belts, Stretchable Belts, High Temp Belts.

Piab Vacuum Technology Pvt. Ltd.

Piab is evolving automation through progressive gripping, lifting, and moving solutions. Piab provides smart solutions for the automated world, helping thousands of end users and machine producers in e-commerce, logistics, food, pharma, automotive and other manufacturing industries to improve energy-efficiency, productivity and working-environments. With over 650 employees and SEK ~1.5 bn in sales, Piab is serving customers in 100 countries from a network of subsidiaries and distributors. By leveraging the technological development in automation and robotics, and targeting high-growth segments and geographies, Piab's vision is to become the global leader in gripping and moving solutions.

Evolving ourselves. Evolving you. Evolving automation.

Permag Product Pvt. Ltd.

Permag Products Private Limited" established in 1985 - a leading Manufacturer of Magnetic Equipments for food & pharma processing industries having 1000 plus Customers in India & overseas.

We have 36 years of experience in wide range of Separation Equipments to remove ferrous contamination from dry particulates, liquids, and slurries etc. We are highly

concerned with the quality; we use optimum quality raw material and follow the industrial standards & norms during the manufacturing process.

Our equipments are used in various application such as Biscuits, Candy, Sugar, Catch Up, Chocolate, Coffee, Coffee Beans, Grains, Juices, Milk, Oil, Pickles, Pulses, Soft Drinks, Spices Etc.

Permag always assist customers to understand, evaluate and specify their applications, as well as to select and maintain magnetic equipments.

Purity Flexpack Limited

Purity Flexpack Limited is an ISO9001:2015 Certified, Registered MSME Company (UDHYAM-GJ-17-000114 & CIN-L25200GJ1988PLC010514) involved in the field of manufacturing of flexible packaging materials in Gujarat, Western India.

Our philosophy is to produce premium quality product in least amount of time at a good price performance ratio. In our 32years of journey, we have catered & delivered multi-layered laminates to various sectors from Food, Dairy, Confectionery, Pharma, Health and Hygiene to Pesticides & Other Industrial segments. Our multi layered flexible laminates are supplied in roll form & with variety of pouch forms. Delivering packages of excellence in quality and service!

4business

Rajshree Polypack Limited

With more than a decade of experience, Rajshree Polypack Ltd. are one of the leaders in manufacturing of rigid plastic sheets and thermoformed packaging products to the industry segment we cater to. We aim to continue to build our

strengths in the field of rigid and semi-rigid plastic sheets and plastic packaging products. We manufacture customized thermoformed packaging products

which are tailored to the client's requirements. Our products range from yoghurt & ice cream containers, food packing, QSRs, coffee cups, bakery products and confectioneries, beverage cups & containers, generic bowls, punnets & trays for fruits and vegetable packing, lids etc. We have a wide range of sizes and designs to meet the customers' need. Our incessant commitment to design and development continues to add new products to our existing product-line.

With an annual capacity of over 10,000 MT and more than 100 products, we are fundamentally committed to the ongoing technical advancement, whilst aiming to stay updated on the technology used in our business. Our manufacturing facility (Factory Unit - II) at Daman has been equipped with the state of the art machinery.

Rathi Engineering
Solutions Pvt. Ltd.

At Rathi Engineering Solutions, we design and manufacture Size Reduction Systems and Powder Processing Solutions for the Food & Spices, Pharmaceutical, Pigment, Pesticide, Cosmetic, Plastic & other Specialty Chemical Industries. As a leader in Grinding Technology, we are benchmarked in process solutions for dust-free, coarse to ultra-fine grinding and mixing, sieving and classifying in Specialty Chemicals, Food and Plastics. Our team was also instrumental in bringing cool-

grinding technology to India. From concept to commissioning, we combine our collective experience of 100+ years in Grinding Technologies to provide the best, value oriented and fully customized Grinding Solution for over 50 different applications. We continue to work with the leading powder processing technologists, to provide improved and forward-looking solutions to our customers Grinding Needs.

Repute Engineers Pvt. Ltd.

REPUTE is a leading engineering company involved in design, manufacturing and supply of dairy & food processing plant and machineries since 1998. Since inception, we have designed, manufactured, installed, and successfully commissioned hundreds of Milk & Beverage Processing Plants & Equipment of various capacities.

REPUTE is led by professional technocrat management team comprising of the board of Directors, having vast experience in the business areas of Dairy & Beverage Processing Segment. The management team lead by the Managing Director, Mr. Dinesh C. Nambiar, drives the company towards its overall growth ambitions, while inspiring the operating staff with sound strategies and ethical entrepreneurship zeal.

urge to progress...

thrust to succeed
Since 1998

Rieco Industries Limited

RIECO Industries Ltd., A wholly-owned subsidiary of Sudarshan Chemical Industries, builds solutions for a cleaner, better, and safer world.

The company offers a host of solutions including Powder Handling Solutions, Clean Air Solutions, Grinding Solutions, Fans and Blowers, and AMC

Services. Its world-class solutions maintain a strong global footprint in over 40 countries including India, Nepal, Bhutan, the Middle East, Indonesia, Egypt, Malaysia, Oman, Bahrain, and Sri Lanka alongside others.

Founded in the year 1975, RIECO Industries has set itself to become a leading project engineering and manufacturing company in India. In the last 45 years, the focus of Rieco Industries is on delivering sustainable and reliable solutions to its customers across the globe. RIECO's state-of-the-art solutions range from chemicals (bulk powders and solids) to industrial equipment and systems, which are tapped by multiple segments including Cement, Food, Powder, Iron and Steel, Minerals, Pharmaceuticals, Chemicals, Agrochemicals, Pigments, Mining, Foundry, Paints, Fertilizers, Pesticides, Petrochemicals, and Polymers and Plastics.

The company operates with a highly skilled team of more than 200 people and is well-equipped to meet the requirements of the most demanding projects, thereby making RIECO the go-to solution for all its clients. The

benchmark-defining systems developed by RIECO have been used by notable names such as ISRO, which has deployed its grinding system for processing the Oxidizer Ammonium Perchlorate (used in the Solid Stage Boosters for the lift-off sequence of #PSLV and #GSLV rockets). RIECO has proven its expertise in handling challenging and varied applications with over 5,000 successful installations in India and abroad. Some of its esteemed clients include General Electric, Asian Paints, Tata Steel, HUL, Adani Wilmar, Parle, Britannia, Nestle, and DRDO amongst others.

RIECO incorporates several leading standards of design and manufacturing practices into its products and solutions. They include ISO standards for welding, safety, and hygiene as well as compliance with GMP standards, ATEX, CE certifications, and others.

RIECO's effective partnering with its clients leads to repeat business and has been a key driver of growth over the years. The company generates 70% of business from repeat customers. RIECO's mission is to be the leading global player in the field of Powder and Bulk Solids Technology. With its motto being '*Responsive. Efficient. Accountable.*', RIECO ensures that it goes an extra mile to be responsive, continuously explores efficient ways for diverse use cases, and takes accountability for its actions, both internally and externally. Today, the company is constantly extending its reach to actively drive its mission. In January 2020, RIECO partnered with TECAM, Spain for the supply of Regenerative Thermal Oxidizers (RTO) for VOCs and Odour Abatement Systems. In Aug 2020, RIECO further partnered with RSBP to offer a comprehensive range of solutions for explosion and fire protection systems in India and the Indian subcontinent. RIECO also partnered with ETIA - Eco technologies - Safesteril in France to jointly offer a complete range of steam sterilization and pasteurization systems for Food, Spices, Pharma, and Pet food.

The company's Works Facility is located in Alandi and spread across an area of over 4 acres. It houses its Assembly Shops, Product Trial Laboratory (*recognized by Department of Science and Technology, Government of India*), Stores, and Equipment Repair Booth with an SAP/HANA-enabled ERP system that streamlines the internal processes.

S. M. Food Engineering Pvt. Ltd.

SM Food Engineering Pvt. Ltd, incorporated in the year 2019, aims to cater the local and global demand for providing its customer the best engineering solutions from the farm to the fork. Though the company is newly formed but the team behind this is most experienced in this segment. Invested approx USD 3.5 Mn to build its state-of-the-art new facility in Indore, central part of India. Our workshop came into force from the month of

February 2021 including shop area of 40,000 Sq. Fts. with an office block, workers utility section and time office. 30,000 Sq. Fts. Shop are expansion is planned for year 2022. A work force of more than 60 people including a team of around 15 Engineers in Design, production, and service departments. **PRESET PRODUCT RANGE**

SMFEPL deals in the field of the following range of plant and equipments:

Plant and Equipment	Capacity
Continuous Potato chips making plants	Upto 1000Kg/Hr
Continuous Pellet Frying Lines	Upto 2000 Kg/Hr
Ethnic Indian Snacks Frying Lines	Upto 3000 Kg/Hr
Kettle Chip Frying Lines	Upto 200 Kg/Hr
Frozen French Fry Lines	Upto 3000Kg/Hr
I Q F lines for vegetables	Upto 5000kg/Hr
Refrigeration on contracting and designing basis	
Closed loop dynamic weighing systems for various mixing and flavouring applications	

Saurabh Flexipack Systems Pvt. Ltd.

Saurabh stands for creative innovation manufacturing packaging machine since 1998. We are driven by the search for excellence, the focus to achieve goals and challenges set by customers and the determination to strengthen the long-lasting relationships in confidentiality with customers. We are a Pune (India) based company with sales & service offices across India and abroad.

Being in the industry for 22 years with 4500+

installations. We strive to provide solution for

packaging technology through research and development with cost effective low maintenance performance driven machine. We are proud of our legacy of innovation and ability to produce low maintenance and competitively superior products. Even today, our well-established machines Kawach and Smart-Ex are the trusted brands in the industry of manufacturing snacks, Nankeens, flours, biscuits, food grains, cosmetics, tea, fertilizers, seeds, ground spices, chemical & pharmaceuticals etc.

For enterprises big and small we offer infinite possibilities in integrated, automated packaging solutions - as we partner with customers through the complete lifecycle, offering application specific solutions, all project aspects can be provided in house mechanical and electrical engineering, manufacturing, assembly and integration and testing and commissioning and after sales support.

Scholle IPN - Bossar

Bossar Packaging has been manufacturing Horizontal Form Fill and Seal [HFFS] & Pick Fill Seal [PFS] machines for flexible packaging since 1992.

Bossar Packaging S.A. based in Barcelona, Spain belongs to Scholle IPN group.

Scholle IPN - Bossar together offer **Total Packaging Solutions** and aim at introducing innovation and value-added products in flexible packaging.

Commenced in Jan 2018, Bossar Packaging India has manufactured 20+ machine till date from our Chakan, Pune plant. Bossar India soon to launch Pick Fill Seal Machine for RETORT Pouches. Scholle IPN expertise in designing and manufacturing various innovative dispensing valves for pouches, as well as Bag-in-Box for aseptic and non-aseptic applications. Headquartered in US, have manufacturing plant in Palghar in India.

Serac Packaging Solutions Pvt. Ltd.

Serac designs, assembles and provides packaging solutions (Filling, capping and blow molding machines, turnkey lines) to industrial companies and end-users, mainly in dairy products, edible oil and home and personal care products.

Serac has 6 factories located in the United States (1), France (3), Brazil (1), Malaysia (1) and 10 sales offices in the United States, France, Brazil, Malaysia, India, Indonesia, the United Arab Emirates, Japan, China and Spain.

More than 6,000 machines have already been installed in more than 120 countries.

Shri Vibracion Technologies Pvt. Ltd.

VIBRACION has installed 800+ units since 2017 for various application in different industries like Snacks, Grain, Food, Pharma, Chemical, Mineral, Packaging and many more.

The Advantages of Our equipment's are maintenance free, easy to installed, Low power consumption, Quality and the most important

is there trouble free Performance. Our Strength is we understand end product characteristic and also flexible to design the machine as per the application requirement. With a small amendment in our equipment we can make the product cost effective and reliable if the customer want to increase the existing foot print. Manufacturing: *Electromagnetic vibrating conveyor, *Motorised vibrating conveyor, *Counting and Lane system, *Seasoning System, *Natural Frequency Conveyor, *Dewatering & oiling conveyors, *Vibrating screen.

S.S. Equipment

S.S. Equipment was started by Late Sh. Sanjay Jain in 1988 & achieved its goals to become number one maker in the field of S. S. Fittings in terms of both quality and quantity. Since 1988, we have been making rapid progress towards becoming not only a centre for all aspects of piping.

We are supplying a variety of applications, ranging from large scale projects, such as- the dairy industry :- (all type of S.S. Valves, Fittings, Pipeline setup etc.). The Juice plants, Beverage plants, Packaging machinery, Pharmaceutical, Textile, Sugar, Automobiles, Furnace roller, etc.

We also deal in S.S Grades 304, 304L, 316, & 316 L. In this field, it is not enough to be merely a bulk stockist of pipes, fittings & valves and all types raw material for completing a project. We keep each and every product in stock. Some of the purchasers are also attached below for references.

Swastik Valves & Pumps

Swastik valves & pumps, a well-established, reputed & well-known manufacturer of valves, pump & pipe fittings since 1972. Swastik is today successfully voyaging through the dairy & food industries in India & overseas.

A leading manufacture of sophisticated equipments for the dairy industry, Swastik has always built the latest technology & has never cut corners where quality is concerned.

Swastik has over the past 3 decades, continued to be at the face front in its fields. The company has maintained an unwavering commitment to its customers by being proactive in supporting their needs & by providing quality individualized solutions according to their specific need. The company also maintains a rigorous quality assurance program along with R&D efforts in order to provide cutting edge in the manufacture of valves, pump & pipe fitting.

Technofour Electronics Pvt. Ltd.

Technofour Electronics Pvt Ltd. (TEPL), a part of the Technofour Group which was established in 1972, is a solution provider in Product Checking Systems.

First Industrial metal Detector in India developed by TEPL in 1982

We are leading manufacturers of "Product Checking Systems" for the Food, FMCG and Pharmaceutical Industries. TEPL manufactures Metal Detectors, tablet Deduster, Dynamic Checkweighers and Combi-Checkers (combination of Metal Detector & Checkweigher).

With over 15,000 Metal Detection Systems and 4,500 Checkweigher Systems installed and operating successfully in various Pharmaceutical, Food, Soap and Chemical Industries in India and around the globe.

Tetra Pak India Pvt. Ltd.

Tetra Pak is a world leading food processing and packaging solutions company. Working closely with our customers and suppliers, we provide safe, innovative and environmentally sound products that each day meet the needs of hundreds of millions of people in more than 160 countries. With more than 25,000 employees around the world, we believe in responsible industry leadership and a sustainable approach to business. Our promise "PROTECTS WHAT'S GOOD™," reflects our vision to commit to making food safe and available, everywhere.

Products we are specialists in complete solutions for the processing, packaging and distribution of food products. Our solutions are specifically designed to be as economical with resources as possible. Dairy products, beverages, ice cream, cheese, food and vegetables and pet food are examples of products that can be processed or packaged in our processing and packaging lines. We focus on keeping the consumption of all raw materials and energy to a minimum during both the manufacturing process and distribution. The processing solutions are also designed to treat the products gently.

Topline Food Equipment LLP

Topline was launched 15 years back with the aim of servicing the needs of the small to large food business which was from a Sweet shop to a complete modern food processing unit. The ideas delivered by the company have added major value to

TOPLINE FOOD EQUIPMENT LLP

hygiene and convenience in handling ready to serve food and processed food. The concepts introduced in processing and packaging have benefited several companies amongst which some of the prominent names are - Haldirams, Bikanerwala Foods, Global Gourmet, ITC hotels, Kohinoor Specialty Foods, Capital Foods Karachi Bakery Namaste India Ajanta Sweets, Gwalia Sweets, Pramod Ladoo etc. Further Topline has also been exported to overseas users in the UK, Newzealand, Iceland, Canada, Netherlands amongst other countries.

Top Line have been offering a novel range of food and packaging equipment such as Top Sealing machines for

cups and trays which are being widely used by restaurants, Sweets Shops and fast-food outlets.

Top line also provides high quality semi- automatic sealing machines With Modified Atmosphere Packaging Equipment or "MAP Equipment" for producing sealed trays, bowls is changing the way food products are preserved. Topline co-operates with Supersealer (Y-Fang Group, Taiwan).

TOP LINE has a full line of Modified Atmosphere Packaging Equipment to meet every budget or application requirement. If you are producing and product that needs a modified atmosphere from bulk products to "ready to eat" fresh produce, we can provide the Modified Atmosphere Packaging Equipment you need for your project. Table-Top Modified Atmosphere Packaging Machine for start-up companies looking to extend shelf-life of food products. This entry level MAP machine is capable of producing Max containers a minute with a residual oxygen level of 0.1%. This is the lowest cost Modified Atmosphere Packaging Machine of this type on the market.

Topline is well represented across India through its distributors who provide the equipment to potential customers and also after sales service support. The company also has a team of engineers to support its clients for installation, training and after sales service. The company attaches a lot of significance to proper and efficient after sales service.

Tosca

We enable a future where sustainable solutions for packaging and transport are essential, and disposable is a thing of the past. Only Tosca has a portfolio of reusables that

covers your entire supply chain. We have six individual product lines in all: Crates, Pallets, Dollies, Bulk containers, Displays and Trays. Each drive higher performing supply chains—reducing shrink, protecting quality, and lowering costs.

Trimech Engineers Pvt. Ltd.

T Trimech Engineers Pvt Ltd is one of the premier Manufacturer and Exporters of Air- Gas, Material Handling/Conveyors and Air Pollution Control Equipment with a strong presence in India and Abroad.

TRIMECHTM
Innovation Inevitable

Certified with ISO, CE, FDA we Assure our performance in Quality, Support and Engineering

Expertise.

We have many happy customers around the globe. We have exported our machinery to numerous regions like Asian countries, Egypt, U.A.E, Sudan, Oman, Guinea, Syria, Lebanon, south Africa, Srilanka and Republic of Indonesia, Also Pan India Regularly etc. Over the years, our organization has strengthened its position within the market and this has been achieved by sheer hard work and building solid business relationships with our esteemed customers across India and overseas.

Founded in 2010, Registered at Ahmedabad Gujarat, Available at whole pan India, find us on www.trimechindia.com for more details.

Unique Equipments

We have the privilege of introducing ourselves as the leading manufacturer & exporter of Metal Detectors for various applications. Over twenty years, UNIQUE EQUIPMENTS has been synonymous with quality and precision assurance. We have evolved our interactions with our clients beyond the mundane client-supplier relationship. This has enabled us to establish UNIQUE EQUIPMENTS as an icon

of metal detecting equipments with consistent quality and unmatched after sales services. We have established and successfully maintained business alliances with several reputed groups due to the strict adherence of delivery schedule and most important is that quality parameter of the product is achieved through long years of experience, high skilled labour, motivated work-force and dedicated R&D team. The vast Know How and experience that has been accumulated over the years, adds to the efficiency of the equipments manufactured. Over the years, the company has turned out quality products to high efficiency and long life, this reputation is the result of strict adherence to the long-established policy to build the highest quality into the equipment. Unique Metal Detection systems are in daily operation in several industries where these are efficiently handling a wide and diversified variety of products. Encouraged by your response and patronage and equipped with the best manpower resources and technology, we are ready to give the best to the world by introducing our new range of Metal Detectors.

Over years, UNIQUE EQUIPMENTS have manufactured the largest range of metal detecting systems in the country. Undoubtedly, today the excellent metal detecting systems are UNIQUE EQUIPMENTS ensuring easy installation, quick modifications or change in existing places. All the products that we manufacture are coming after stringent quality control and with that factor remaining constant quality; we have grown systematically and steadily. With the same factor Quality and good services, our clients have repeatedly placed their faith in us. Apart from the popularity all over India, our Metal Detectors are been exported worldwide.

Uflex Ltd.

Uflex is India's largest multinational flexible packaging materials & solution company and a global player in polymer sciences. Since its inception in 1985, Uflex has grown from strength-to-strength and created a presence

across all verticals of the packaging value chain - Flexible Packaging, Packaging Films, Aseptic Liquid Packaging, Holography, Cylinders, Engineering and Chemicals. The company has earned an irreproachable reputation defining the contours of the 'Packaging Industry' in India and overseas by providing end-to-end solutions to clients in over 140 countries.

Headquartered in Noida, Uflex enjoys a global reach with sophisticated manufacturing facilities in India, UAE, Mexico, Egypt, USA, Poland & Russia with two more packaging films plants coming up in Nigeria & Hungary.

New technologies presented by
Live Demonstrations

Urschel India Trading Pvt. Ltd.

The Global Leader in Food Cutting Technology
Since 1910, Urschel Laboratories has been
designing and manufacturing precision size
reduction equipment including: commercial Potato

chip slicers, dicers for Fruits and Vegetables, French-fry cutters, Meat dicers, Peanut-butter manufacturing mills, Poultry dicers, crumbles for bakery rework, wet and dry milling equipment for the food and pharmaceutical industries, and a wide array of other cutting applications.

If you need to slice it, dice it or strip-cut it, Urschel has the precision cutting machine you want and backed by a world-class support and service. Urschel offers a complete range of cutting equipment and test cutting is done free-of-charge.

Product Highlight

The Comitrol Processor Model 1700 accommodates all three types of reduction heads which enables a broad spectrum of product processing capabilities. It is recommended for free-flowing dry and semi-dry product applications including textured vegetable protein, peanut butter, chicken slurries, surimi, baby food, dehydrated potato flakes, fruit and vegetable pastes, horseradish and dressings, extruded products, biscuits and cookies, nuts, fruit pulp, various spices, corn masa, hard cheeses, and a variety of gels, ointments, and creams. This precision cutting principle has proven to be a processing breakthrough, with the versatility to meet your size reduction needs from coin size particles to fine emulsions. Standard operations include comminuting, granulating, milling, flaking, slicing, liquefying, dispersing, and pureeing. Sealed enclosure deters escape of dust, vapor, and liquid when the Comitrol Processor is installed in conjunction with a collection system. Stainless steel construction ensures maximum durability and sanitation. The machine features continuous operation for uninterrupted production, and is designed for easy cleanup and maintenance.

The new Sprint 2™ Dicer builds on the popularity of the DiversaCut Sprint and is inspired by the longstanding success of the Urschel Model G Dicer. The Sprint 2 offers food processors an alternative to the industry-proven Urschel Model G Dicer and additional benefits compared to the DiversaCut Sprint. The Sprint 2 uniformly dices, strip cuts, granulates, or slices a wide variety of vegetables, fruits, bakery goods, and meats. Motor choices include a stainless steel 3 HP (2.2 kW) motor controlled by a VFD (variable frequency drive) -

more power versus the standard Model G or DiversaCut Sprint. New dial-in slice adjustment with lock-down knob ensures closer tolerances throughout production runs. Sanitary in design, the food cutting zone is completely isolated from the mechanical zone; rounded tube frame and sloped sheet metal contribute to overall sanitation. Hinged access panels promote sanitation and ease of maintenance. The machine accepts product input up to 6.5" (165.1 mm) in any dimension.

The Urschel \$ Model CC uniformly slices, strip cuts, shreds and granulates a wide variety of food products at high production capabilities with excellent results. Among these products are potatoes for chips, shredded cheese for pizza topping, mushrooms, cabbage, lettuce, onions and carrots for salad ingredients, and a wide variety of nut meats for bakery ingredients. The versatile machine features interchangeable cutting heads that enable the processor to change the type of cut in just minutes. Specially designed knives do not require sharpening and are inexpensive to replace. The Model CC features continuous operation for uninterrupted production and is designed for easy cleanup and maintenance. The Model CC will accept products measuring up to 4" (101.6 mm) in any dimension.

Capture latest trends with **Technical Seminars** by industry leaders

Valco Melton Engineering India Pvt. Ltd.

Established in 1952 and renamed in 2008, Valco Melton is one of the world's leading manufacturers of adhesive application and quality assurance systems. We help our partners manufacture, package, seal, and inspect a wide variety of products ranging from corrugated boxes to cartons, bags, books, paper towels, pharmaceuticals, and more. Our customer base spans nearly every major industry: corrugated, packaging, envelope, folding carton, print finishing, nonwovens, tissue, automotive, textiles, and bag manufacturing, among others.

VALCO MELTON™

Along with our world headquarters in Cincinnati, we have direct sales, Service,

and manufacturing facilities throughout Europe, Asia, and the Americas. Valco Melton maintains a presence in over 90 countries worldwide. Valco Melton has dedicated and a strong Manufacturing facility in Bangalore INDIA. We have Sales and Service offices strategically place across the INDIA to serve our customers.

Vedic Pac Systems

Vedic Pac Systems: An Integrated Services Company. Vedic Pac Systems brings over 40 years of experience and expertise and a strong client

focused approach in delivering turnkey solutions to the confectionery, chocolate, bakery, spice and food industry. We are the exclusive partners & representatives of renowned European manufacturers for following applications: Solid Processing: Feeding, screening, conveying,

storing/silos, vacuum weighing/batching, particularly for powders with difficult flow characteristics. Automated plants for the spice/bakery/pre-mix industry, from AZO.

Powder Mixing: Blending/mixing of powders & granules for spice/bakery/pre-mix industry from Amixon.

Liquid Mixing: Homogenizing & Dispersing solutions from AZO Liquids.

Processing of confectionery masses: Continuous and Batch cooking for various sugar masses, such as hard candy/lozenges/nougatine/jelly/fondant/toffee/caramel from Chocotech & Nuova Euromec.

Cocoa & Chocolate: Refiners/conches/tanks from BSA

Schneider.

Bar lines, Tempering, Enrobing, Sprinkling & Decorating and other forming equipment, from SOLLICH.

Depositors & Moulding Lines for all types of sugar masses (jelly, toffee, hard candy) & chocolates from Winkler und Dünnebier Süßwarenmaschinen.

Gum based products: Rolling, Scoring and Extrusion Lines for gums from Nuova Euromec.

Licorice/ Fruit Snacks: Confectionery Extruders for Licorice and fruit-based products from ExtruFood.

Lollipops: Forming, Cooling, wrapping (bunch and twist wrapping) for flat, round and 3D shape Lollipops and VFFS Packaging of confectioneries from GEA Aquarius.

Bakery products: Duplex depositors, wire cutters, extruders and moulder for regular and centre-filled cookies from OKA.

Wafer & Extruded Snacks: Fully automated wafer line with baking, batter/cream preparation systems, spreading, forming, cooling & cutting of wafer and Extrusion Snacks with various shapes and sizes from Hebenstreit.

Metal Inspection, X-ray & Check-weighing Systems: Quality checks to meet the food safety standards, from Loma Systems (Division of ITW).

Primary Packaging: Complete range of primary packaging solutions, including Fold wrapping, flow wrapping and twist wrapping from Theegarten Pac-Tec. Secondary Packaging: High speed cartoning solutions with automation and robotics from Cama Group.

Vedic Pac Systems has a team of qualified service engineers for installation and after-sales support.

Vinsyst Technologies

We VinSyst Technologies established in 1985 as one of the Leading Manufacturer & Exporter of Industrial ConveyORIZED & Free Flow Metal Detector Equipment's across Globe. We are one stop shop for complete range of Metal Detector Systems.

VinSyst®
Technologies

We, VinSyst already Possesses 30 years of Experience by now with ISO 9001:2008

Certificate & Product Certification like NTEP, OIML, EC, FDA, GMP, HACCP, CE, RP, etc. to Quantify the Quality of our systems.

We with our Experienced Team pledge to provide our customers with the best of Customized Systems with Excellent post sales service. l winder-rewinder, Nonstop labelling solution.

Ystral gmbh maschinenbau +
processtechnik

Ystral is a strongly growing, owner-managed company in the field of engineering and plant construction. For you, we focus on the conception and construction of individualized mixing, dispersing and powder wetting machines as well as special mixing, dispersing and powder wetting plants for fluid mechanical process engineering. In addition to mixing, dispersing and powder wetting, our process technologies also include emulsification, homogenization and mixing dispersion. Our headquarters are located in the South West of Germany. We are a medium-sized company with subsidiaries in China, India and Singapore, as well as numerous representatives all over the world.

110% MIXING SOLUTIONS

Addendum

Agrawal's Machines

Agrawal's 420 Machines established in 1985 anchored by Mr. HukumChand Agrawal also the founder of Agrawal Papad Pvt Ltd(420 Papad).

Agrawal's 420 Machines offers a complete customized solution for continuous automatic line of frying, mixing, conveying, grinding. Fully/Semi automatic frying lines like potato chips line, french fries line, pellets line, kurkure line, sev bhujia line. Mixing solutions like Batch type and continuous mixing with

packing system ranging from 10kg to 1000kg. Conveying solution like Uniform feeder, Pneumatic conveyor, Chain and spiral conveyor. Impact pulverizer, three stage spice grinding, automatic suction pulverizer for grinding solutions in Masala and chemical industry. With our decades of experience and expertise, we are proud of our ever growing standards of quality and customer satisfaction.

Cipriani Harrison
Valves Pvt. Ltd.

Cipriani Harrison Valves is a manufacturer of high quality, sanitary, forged 304L and 316L Stainless Steel Valves. All of Cipriani Harrison's Valves are serialized for full traceability, even 304L valves. Cipriani Harrison's documentation program makes Material Test Reports and Spares simple and easy for processors.

Utilizing the latest Generation Multi-tasking CNC Machines from the world's most reputable manufacturers, all of Cipriani Harrison's Valves are manufactured in a state of the art cGMP factory - a TUV NORD ISO 9001 : 2015 approved manufacturing facility.

Many of Cipriani Harrison Valves are 3A Authorized for food and dairy use. From prototyping to production Cipriani Harrison's team of engineers work hard to ensure the quality and performance of each and every valve produced - Cipriani Harrison Valves are 'Engineered for Quality'.

With a broad range of Hygienic Processing Valves and Flow Devices Cipriani Harrison successfully serves the Food, Dairy, Wine, Beer, Cosmetic, Pharmaceutical and allied sanitary industries. From basic 304L to high purity 316L ASME BPE specifications, Cipriani Harrison has the experience and dedication to meet your sanitary valve requirements. In addition to their standard product offering Cipriani Harrison has the engineering expertise and resources to provide custom product solutions.

Hilda Automation

Entire product range:

- Filling machines. (for Water, Juice, Milk, Yoghurt/Dahi, Jelly/Jam/Ketchup/ Oil,
- Sealing machines. (Pre-cut Al. Foil type & Laminated Film type)
- Shrink Sleeve Applicator (100BPM & 200BPM) (Body & Neck Sleeve)
- Labelling machines (Single side, Front & Back, Wrap Around & BOPP-Hot melt)
- Shrink Tunnel
- Shrink Wrapping machines. (Fully Automatic & Semi-Automatic)

Prochem

We are a fast-emerging business group offering Powder / Solid Handling Engineering solutions for various industries vertical around the world. With experience spanning over 15 years, we have emerged as trusted partners for several industries around the world in manufacturing and supplying of Powder Handling Solution, where the raw material or intermediate or finished product is in powder form. Our offerings include Raw material unloading, Milling, Blending, conveying (Mechanical & Pneumatic), Powder transfer systems, Small and Jumbo Bag weighing and bagging systems.

Rotolok Valves Pvt. Ltd.

Rotolok India having manufacturing facility which is having the most advanced computerized numerically controlled (CNC) manufacturing machines available, thereby ensuring quality control, component interchange ability and prompt deliveries located at Sri City(Tada), Chittoor Dist. (AP) which is approx. 67 kms from Chennai which is a group company of Rotolok Ltd, Tiverton, Devon, EX16 6SB, UK., established in the

year 1973 to design, manufacture and supply Bulk Handling specialists we offer products like Rotary Airlocks, Conveying Diverters, Double Dumps, Blowing Seals, Fabricated Slides and Screw conveyors.

More details on the company can be found on our website <https://rotolok.com/india/>

We also take this opportunity to inform you that we have a got a 100% Track record of delivering on Time being we keep stock of all components including the Housing for all the sizes.

The Size range starts from 150 mm to 915 mm in Cast Iron and in stainless steel 50 NB to 915 mm.

Standard Features of Rotary Airlocks:

Maximum number of blades in contact with body at one time without affecting throughput, Good throat opening at valve entry allowing high pocket filling

efficiency, Minimum clearance at rotor tips and sides with body, Robust body adequately stiffened to prevent distortion, Heavy shaft diameters minimising deflection, Outboard bearings for non-contamination. Packing gland type seals, Maximising valve speed to 25 rpm -prolonging life, ensuring good throughput, Precision machining of components

Visitor Testimonials

“ANUTEC - International FoodTec India focuses on all aspects of food production, making it a one-stop-shop. We are looking forward to visiting the upcoming physical exhibition in New Delhi. Having the opportunity to connect with the industry again after a two-year absence due to the pandemic is invaluable.

Indraneel Chitale
Partner
Chitale Bandhu Mithaiwale

“We are constantly visiting Exhibitions done by Koelnmesse India. Our last visit to the Food Logistics India exhibition turned out to be beneficial for us as in past. Every year we come across new product and solutions. We could analyse and decide to opt for the advance solutions showcased at the show, which significantly impacted our overall process, increasing efficiency, and saving costs. We have already planned our visit to the exhibition for September 2021.

Balraj Dubey
President Commercial & Procurement
Desai Foods Pvt. Ltd.

“Being in the Food processing industry, this is one exhibition that my team and I won't miss wherever the location may be. Very informative and helps us to interact with experts from all over the world for all our needs.

K B Ninan
Sr. Vice President(Projects)
Accelerated Freeze Drying Co. Ltd.

In conversation with
Mr. Nishant Bansal
CEO & MD
FABCON INDIA

The dynamics in the food and beverage industry has changed considerably due to the global pandemic. How has your company dealt with the change?

The Pandemic has left no stones unturned when it comes to affecting the industries at large. Pandemic has certainly changed the business landscape and conventional ideology attached to it and has driven the industries towards modernity and self-reliance. Previously, the F&B processors were not that keen towards keeping surplus on the production lines, but due to the labour migration and the increasing consumer demands the scenario has changed. There is a need for upgradation to increase the production capacity and in order to address those needs the facilities should be well equipped. The Pandemic has caused major concerns especially to the food industry and how it could avoid the risk of contamination and same goes for the manufacturers of these machinery. With the advent of the automation especially in the pressing times, has definitely boosted the confidence in the manufacturers to take a different and more competitive approach as with the current times, it has become imperative to be updated with the technology especially when the aim is to generate greater outputs with increasing quality standards. In fact, during the lockdown, Fabcon witnessed an unprecedented growth and received many orders for the automated lines from the existing and new customers and saw it as a perfect partner to provide the State of Art technology at Value for Money (VFM) prices. We did not face any problems or struggled with the migration or availability of parts as such since we are already equipped with sufficient inventory and have the in house state of the art infrastructure that includes robotic cutting via laser and computerized bending.

Even during the most difficult times, Fabcon has not even once shied away from its responsibility towards the Industry and has always worked towards elevating its technology and its services with the changing times.

What are the challenges faced by your sector?

The major challenge faced by us as technology manufacturers and suppliers is to sell the quality

technology due to the cost it incurs. Anything which is a quality comes with a price. Even though the industry wants to venture into the cutting edge of modernity and automation, the companies are still not willing to accept the change in the pricing.

The industry is yet to experience the world of automation but for that they should have a long term vision in which their current investment will harbor great results in the future.

Many customers have not fully comprehended the need for technology upgradation especially in the contemporary situation where the major focus should be on the hygiene, revival and growth of the industry and increasing productivity against the rising consumer needs. The customers desire the best technology out there but simultaneously they want to acquire the technology at very low prices, comparing it with the local Indian and Chinese manufactures that are incapable of supplying the quality or any kind of support to the customer.

Which are your fastest growing/moving products?

We focus heavily on our Snack processing technology that can cater to the manufacturing and processing of any kind of Snack one can imagine. We provide complete solutions for the Snack processing & Conveying system and provide our equipment to the F&B industry. Fabcon's machinery is massively appreciated and welcomed in the market for their consistent performance, low power consumption, longevity, ease of operation, rugged exterior, minimal maintenance, functional fluency and huge production capacity. Our Snack Manufacturing Frying Line has been a major success across many countries like USA, UK, Canada, UAE, Gulf Countries, SAARC Nations, Africa and so on and we had and have been supplying to some of the biggest names both in the domestic as well as the overseas market.

Our main specialization/ focus lies in:

Pellets based quick fry healthy snacks, Nut based healthy snacks, New age mixes, Popcorn & Popchips, Baked Snacks

Automation in Conveying and Handling

We have been serving and catering to our clients' needs to the best of our abilities and always believed in upholding our commitments towards them.

How long have you been associated with ANUTEC - International FoodTec India and your views on this platform?

ANUTEC has always worked meticulously towards introducing and showcasing the potential of Indian companies to the Global market. ANUTEC has opened many avenues for the Indian companies because of

which the international market has become more accessible and is brimming with opportunities. ANUTEC International FoodTec has already done 14 editions and witnessed astounding success every year which shows how ANUTEC has grown and made its mark in the F&B industry. ANUTEC is not only limited to showcasing one aspect of the industry but it also dives into and provides the complete solutions for the F&B industry and binds them together under one roof.

We have been associated with ANUTEC since two years and it is our complete honor to continue associating ourselves with such a respectable name known to the world and we hope to nurture this bond and grow with ANUTEC as more years pass by.

In conversation with
Mr. H P Katrak
Director
MINIPACK

What are the common packaging materials / techniques used in the food processing industry?

Other than Shrink and Stretch Wrapping Machines, Flow Wrapping, Liquid Filling RFC systems with Labelling FFS systems, Coding and Sealing etc.

The dynamics in the food and beverage industry has considerably due to the global pandemic. How is your company coping up with the sudden surge in the demand?

By mass producing certain fast moving machines which are required in Food and Pharma Industry. Also moving more towards making system modular in design.

What trends are we likely to see in the food packaging industry in India Post Covid-19?

Growth in Ayurvedic and Organic based product. Health Care Noosting (immunity) products.

How long have you been associated PackEx India and your views on this platform?

Since 2015

In conversation with
Mr. Sanjeev Gupta
Director
Kanchan Metals

What are the future trends in the market that you foresee?

Over the past few years there'd is an increasing trend towards healthier food across segments. This trend has gained momentum after the pandemic. In addition again out of forced changes in living styles and daily life because of pandemic processed ready food has also created a bigger demand for itself. Hence Helthier foods, Processed food and Food with immunity characteristics are really the trend now.

Your thoughts on the global prospects of national and global processed food market

Processed Food with healthier recipes and made with state of Art technology with focus on Hygiene and safety is the need and will Conti new to have huge global prospects including national prospect. Processed Food market has been increasing globally and the pandemic situation this growth rate has further increased. Hence I feel the prospects are really very positive. We should see double digit growth in a sustainable manner.

How do you plan on improving production capacity, supply chain and productivity in your company post COVID-19

It is a challenge. However the focus is on AUTOMATION to increase Productivity and Capacity. This has yielded very good results both in terms of Volumes and profitability. Mega proc using lines re being set up with optimisation of equipment's, secondary packaging automation. These are the main actions.

How long have you been associated with ANUTEC - International FoodTec India and your views on this platform.

If I am not wrong it is 20 years. This platform has the first mover advantage and had been well recognised by the Industry in India. However, now more platforms are there. Anutec India needs to be pro active and also focus on segment wise focus instead of clubbing all segments together.
