### Dhaka Sanitation Improvement Project

**Project ID No.:** P161432

**Project Name:** Dhaka Sanitation Improvement Project

**Country:** Bangladesh

**Funding Agency:** World bank

**Last date for submission:** 31 Jan 2023

**Project Details:**

**Government of the Peoples' Republic of Bangladesh  
Dhaka Water Supply and Sewerage Authority (DWASA)  
Dhaka Sanitation Improvement Project (DSIP)  
IDA Credit Number: 6566-BD/AIIB Loan No.: L0240A  
RFP No.: WD5B  
Issued on: 01 December 2022  
Notice of Request for Proposals**

**Request for Proposals**

**Works**

**(Design and Build)**

**(Single stage two envelope process without Initial Selection)**

**Employer: Dhaka Water Supply and Sewerage Authority**

**Project: Dhaka Sanitation Improvement Project (DSIP)**

**Contract title: Design, Build Contract for Reconstruction /New Construction/Rehabilitation of Sewerage Networks for Zone W3 & W4 (Arambagh, Paltan, Shahidbag, Motijheel etc.) (Package No.: WD5B).**

**The Government of the People's Republic of Bangladesh has received financing from the World Bank toward the cost of the Dhaka Sanitation Improvement Project (DSIP), and intends to apply part of the proceeds toward payments under the contract for Design, Build Contract for Reconstruction /New Construction/Rehabilitation of Sewerage Networks for Zone W3 & W4 (Package No.: WD5B). This contract will be jointly financed by Asian Infrastructure Investment Bank. Procurement process will be governed by the World Bank's Procurement Regulations.**

Dhaka Water Supply and Sewerage Authority now invites sealed Proposals from eligible Proposers for the said package (Package No.: WD5B). The interested Proposers may visit DWASA website ([www.dwasa.org.bd](http://www.dwasa.org.bd)) to get more information.

The procurement will be conducted through international competitive procurement using Request for Proposals (RFP) as specified in the World Bank's "Procurement Regulations for IPF Borrowers" July, 2016, Revised November 2017, August 2018 and November 2020 ("Procurement Regulations"), and is open to all eligible Proposers as defined in the Procurement Regulations.

Interested eligible Proposers may obtain further information from Dhaka Water Supply and Sewerage Authority (DWASA) at the address mentioned below during office hours from 800 to 1600 hours (GMT+6) between Sunday and Thursday. A read-only copy of the RFP documents will also be uploaded in DWASA's website: [www.dwasa.org.bd](http://www.dwasa.org.bd).

A complete set of the RFP Document comprising 04 (four) volumes i.e., Volume 1: Part 1 & Part 3; Volume 2: Employer's Requirement; Volume 3: Conceptual Drawing; Volume 4: Supplementary Information in English may be purchased by eligible Proposers upon the submission of a written application to the address below which may be sent through email from the Proposer's official e-mail address to the Employer's email address specified below along with a copy of documentary evidence confirming electronic wire transfer or cash deposit payment of a nonrefundable fee of BDT 15,000.00 (Bangladesh Taka Fifteen Thousand) or USD 150.00 (United States Dollars One Hundred and Fifty) (the Bank Transaction Reference Number should be explicitly mentioned). The method of payment will be electronic wire transfer or cash deposit to the Employer's bank account specified below. Please clearly mention "Regarding purchase of RFP Documents for Design, Build Contract for Reconstruction /New Construction/Rehabilitation of Sewerage Networks for Zone W3 & W4 (Package Number: WD5B)" in the email's subject line. Within 3 (three) working days of receipt of the payment in the Employer's bank account, the Employer shall issue the Hard Copy of the RFP which the Proposers are advised to collect from the office of the undersigned. The soft copy of the same will also be sent through reply email. In case of discrepancy between hard and soft copy, the hard copy shall prevail.

A single-stage, two envelope RFP process will be used, and the Proposal will consist of (i) the Technical Part, without any reference to prices; and (ii) the Financial Part, as detailed in the RFP Document. The Technical and Financial Parts of the Proposals shall be submitted simultaneously in two separate sealed envelopes.

The Proposal, both the Technical Part and the Financial Part, in hard copy must be delivered to the address below on or before 1400 hours (GMT+6) of 31 January 2023. In addition, a soft copy of the Technical part of the Proposal shall also be submitted. Electronic Procurement will not be permitted. Late Proposals will be rejected. The Technical Part of the Proposals will be publicly opened in the presence of the Proposers' designated representatives and anyone

who chooses to attend at the address below on 1445 hours (GMT+6) of 31 January 2023. The Technical Part opening meeting will also be connected virtually through live video conference, for which the electronic connection link will be sent by the Employer at least two (2) calendar days before the Technical Part opening through email to all the Proposers who purchased the RFP Document and who may choose to attend through video conference. The Financial Part shall remain unopened and will be held in safe custody of the Employer until the second public opening of the Financial Part, following the evaluation of the Technical Part of the Proposals.

All Proposals must be accompanied by a Proposal Security of USD 400,000 (US Dollar Four Hundred Thousand) or equivalent in any freely convertible currency in favor of Dhaka Water Supply and Sewerage Authority.

All Proposals must be accompanied by a Sexual Exploitation and Abuse (SEA) and/or Sexual Harassment (SH) Declaration.

**Construction of six (06) new pastoral perimeters with six (06) dewatering systems for feeding, watering and livestock mobility in the regions of Kayes, Koulikoro and Segou in four (04) lots**

**Project ID No.:** MLI0140

**Project Name:** PROGRAMME FOR THE INTEGRATED DEVELOPMENT OF ANIMAL AND AQUACULTURE RESOURCES IN MALI (PDIRAAM-MALI)

**Country:** Mali

**Funding Agency:** Islamic Development Bank (IsDB)

**Project Details:**

**Specific Procurement Notice**

Sector Name :Livestock and Fishing

Method of financing :Loan

Funding No.:Istisna'an°2MLI0140

Title of the Contract: Construction of six (06) new pastoral perimeters with six (06) dewatering systems for feeding, watering and livestock mobility in the regions of Kayes, Koulikoro and Segou in four (04) lots on behalf of the Integrated Development Program of Animal and Aquaculture Resources in Mali (PDIRAAM).

AOI/PM N° 02/2022/MDR-PDIRAAM-MALI

The Government of the Republic of Mali has received funding from the Islamic Development Bank (IsDB) to finance the Programme for the Integrated Development of Animal and Aquaculture Resources in Mali (PDIRAAM), and intends to use part of this funding to make payments under the Contract relating to: Construction work of six (06) new pastoral perimeters with six (06) dewatering systems for feeding, watering and livestock mobility in the regions of Kayes, Koulikoro and Segou in Mali in four (04) lots and for an execution time of six (06) months for each lot.

The Minister of Rural Development solicits tenders in sealed envelopes from eligible bidders and meeting the qualifications required to carry out the Construction of six (06) new pastoral perimeters with six (06) dewatering systems for feeding, watering and livestock mobility in the regions of Kayes, Koulikoro and Segou in Mali in four (04) lots and for a turnaround time of six (06) months for each lot. It should be noted that in accordance with clause IS. 32.1, there is no margin of preference.

The tendering procedure will be the International Call for Tenders reserved for IsDB Member Countries (IAO/PM) as defined in the Guidelines for the Procurement of Goods, Works and Related Services in IsDB-Financed Projects, and open to all eligible bidders from Member Countries as defined in the Guidelines. Prospective applicants are also invited to review Clauses 1.18 to 1.21 of these Guidelines regarding IsDB conflict of interest rules.

Interested and eligible Bidders can obtain information from the PMU of PDIRAAM-Mali in Torokorobougou Bamako (Mali) Street: 307 Door: 232 Tel: (+223) 20 28 26 08/ Cell: 75 28 85 42/ 76 48 15 97, Emailsba32@hotmail.com/ sdiarra007@yahoo.fr and read the tender documents at the address mentioned above every working day from 8 a.m. to 3 p.m. GMT.

The tender documents in French may be purchased by any interested Bidder at the above address against a non-refundable payment in cash or by certified check in the amount of 150,000 CFA francs. The files will be sent in physical copy.

Tenders must be submitted only to the address of the Contracting Authority: PMU of PDIRAAM Torokorobougou Bamako Republic of Mali Street: 307, Door: 232 Tel (+223) 20 28 26 08 Cell: 75 28 85 42/76 48 15 97, no later than December 22, 2022.

The submission of tenders electronically will not be permitted. Any offer that arrives after the deadline for submission of tenders will be rejected. The tenders will be opened in the presence of the representatives of the tenderers and the persons present at the address of the Client mentioned above at 10:00 GMT on 22 December 2022.

Tenders must be accompanied by a guarantee of offer issued by an authorised banking institution or a guarantee body authorised to issue guarantees in accordance with point 19 of the CIT. The amount of the guarantees will be in CFA francs or an equivalent amount in a freely convertible currency. The amounts will be:

Lot n°01: two million seven hundred and fifty thousand (2,750,000) CFA francs;

Lot n°02: Five million four hundred thousand (5,400,000) CFA francs;

## **Reconstruction of the Soesdyke-Linden Highway (72.43Km)**

**Project ID No.:** GY-1025

**Project Name:** Reconstruction of the Soesdyke-Linden Highway (72.43Km)

**Country:** Guyana

**Funding Agency:** Islamic Development Bank (ISDB)

### **Project Details:**

#### **SPECIFIC PROCUREMENT NOTICE**

##### **Invitation for Pre-qualification**

The Co-operative Republic of Guyana  
Reconstruction of the Soesdyke-Linden Highway (72.43Km)  
Loan Agreement GY-1025

This invitation for prequalification follows the general procurement notice for this project that appeared in the Chronicle, Stabroek News, Guyana Times, Kaieteur News and Mirror Newspapers on October 09, 2022 and on the UNDB, DGmarket, and IsDB website.

The Government of the Co-operative Republic of Guyana has applied for financing from the Islamic Development Bank (ISDB) toward the cost of the Reconstruction of the Soesdyke-Linden Highway, and it intends to apply part of the proceeds of this financing to payments under the contract for the Reconstruction of the Soesdyke-Linden Highway. The Work Services Group (WSG) of the Ministry of Public Works (MoPW) intends to prequalify contractors and/or firms for the reconstruction of the existing 72.43km two-lane, single carriageway, rural arterial highway. It is expected that invitations for bid will be made in September 2023.

Prequalification will be conducted through prequalification procedures specified in the Islamic Development Bank's Guidelines for Procurement of Goods, Works and Related Services, April 2019 and is open to all bidders from eligible source countries, as defined in the guidelines.

Interested Eligible Applicants may obtain further information from and inspect the prequalification document at the Ministry of Public Works (Address 1 below) from 8:30am to 3:00pm. A complete set of the prequalification document in English may be uplifted by, interested Applicants on the submission of a written application or email to the Address 1 below.

Applications for prequalification should be submitted in sealed envelopes, delivered to the Address 2 below by 09:00 Hrs GYT (Guyana Time) [UTC/GMT – 4 hours] on December 07, 2022, and be clearly marked “Application to Prequalify for the Reconstruction of the Soesdyke-Linden Highway.”

Note:

All submissions must be in English and include three (3) hard copies [one (1) original and two (2) copies] and one (1) un-editable .pdf copy on a flash drive.

**For the Construction of the New Skills Development Headquarters Building on  
Plots M892 & M893**

**Project ID No.:** UGA-1022

**Project Name:** Business, Technical & Vocational Education & Training (BTJET) Support Project

**Country:** UGANDA

**Funding Agency:** Islamic Development Bank (IsDB)

**Project Details:**

SPECIAL PROCUREMENT NOTICE (SPN)

FOR THE CONSTRUCTION OF THE NEW SKILLS DEVELOPMENT HEADQUARTERS BUILDING ON  
PLOTS M892 & M893 IN KYAMBOGO, KAMPALA

Procurement Reference: IsDB-MOES/WRKS/22-23/00001

Country: REPUBLIC OF UGANDA

Name of Project: Business, Technical & Vocational Education & Training  
(BTJET) Support Project

Sector: Education

Procurement of Works: For the Construction of the New Skills Development Headquarters  
Building on Plots M892 & M893 in Kyambogo, Kampala

Modes of Financing: IsDB Instalment Sale Loan and GOU Counterpart financing

Financing No: UGA-1022

The Government of Uganda (GOU) has received financing from the Islamic Development Bank (IsDB) toward the cost of the BTJET Support Project, and intends to apply part of the proceeds to payments for construction of the New Skills Development Headquarters Building, on Plots M892 & M893 off Kigobe Road in Kyambogo-Kampala, particularly Lot 1 (Office Towers). Lot 2 (Parking Deck & External Works) and Lot 3 (Conference Block) are to be financed by GOU.

The Ministry of Education and Sports now invites sealed bids from eligible bidders for executing the required civil, structural, electrical and mechanical works, as summarized below:

Lot 1: Two Office Towers of 12,272 sqm (eight and ten levels)

Lot 2: Parking Deck of 2,224 sqm (two levels) and External Works

Lot 3: 600-seater Conference Block of 1,260 sqm (stepped ground & mezzanine levels)

Bidding will be conducted through the International Competitive Bidding (ICB) procedure as specified in the IsDB Guidelines for Procurement of Goods, Works and related services under Islamic Development Bank Project Financing 2019 ("Procurement Guidelines"), and is open to all eligible bidders as defined in the Procurement Guidelines. In addition, please refer to paragraphs 1.18 to 1.21 setting forth the IsDB Policy on Conflict of Interest.

Interested eligible bidders may obtain further information from the Projects Coordination Unit for the IsDB, OPEC & Arab-funded Projects, f.a.o. Arch. Norman Ajiri of email address [norman.ajiri@education.go.ug](mailto:norman.ajiri@education.go.ug) or [normanajiri@hotmail.com](mailto:normanajiri@hotmail.com), and inspect the bidding documents during office hours, from 09.00 to 16.00 hours, at the address given at item number 8.

A complete set of bidding documents in English may be purchased by interested eligible bidders per lot, upon submission of a written application to the address given at item number 8 (including contact details of the bidder's assigned local representative) and upon payment of respective non-refundable fees as follows in Uganda Shillings: Seven Hundred Thousand (UGX 700,000) for Lot 1, Four Hundred Thousand (UGX 400,000) for Lot 2 and Four Hundred Thousand (UGX 400,000) for Lot 3. The method of payment will be by Bank Payment Advice Form (BPAF) issued by the Ministry. This document will not be sent, but should be collected by the bidder's assigned local representative from the address given at item number 8.

Bids must be delivered to the address at item number 8, before 15.00hrs on 9th December 2022. Electronic bidding will not be permitted. Late bids will be rejected. Bids will be publicly opened in the presence of bidders' designated representatives and anyone who chooses to attend at the same address provided at item number 8.

The planned schedule for this procurement is as follows:

7. Each bid must be accompanied by a Bid Security in the format provided in the bidding document, in the following amounts per lot.

Lot 1: UGX 750,000,000 (Seven Hundred and Fifty Million Shillings)

Lot 2: UGX 125,000,000 (One Hundred and Twenty-Five Million Shillings)

Lot 3: UGX 125,000,000 (One Hundred and Twenty-Five Million Shillings)

8. The address referred to under item numbers 4, 5 and 6 above is:

The Head, Procurement and Disposal Unit,

Ministry of Education and Sports,  
Floor 3 Room 3.7, Embassy House,  
Plot 9/11, King George VI Way,  
P.O. Box 7063 Kampala (Uganda)

**Construction work on a double 30 kV HV underground link in 630 mm<sup>2</sup> Alu cable between Sirakoro and Sotuba substations**

**Project ID No.:** MLI 1013

**Project Name:** Construction of a 100 MW heavy fuel oil thermal power plant at Sirakoro and its disposal structures

**Country:** Mali

**Funding Agency:** Islamic Development Bank (IsDB)

**Project Details:**

**NOTICE OF INVITATION TO TENDER**

**COUNTRY:** Republic of Mali

**PROJECT NAME:** Construction of a 100 MW heavy fuel oil power plant in Sirakoro and its disposal structures

**SECTOR :** ENERGY

**Acquisition of Goods and Works**

**FINANCING METHOD :**Leasing

**FINANCING NO.** MLI 1013

**TITLE OF THE MARKET:**

Construction work of a double underground link HTA 30 kV in 630 mm<sup>2</sup> Alu cable between the substations of Sirakoro and Sotuba

**AOI/PM Number:** 05-2022/DPGT/EDM-SA

The Government of the Republic of MALI has received financing from the Islamic Development Bank (IsDB) to finance the turnkey construction of a 100 MW heavy fuel oil thermal power plant in Sirakoro and its disposal works, and intends to use part of this financing to make payments under the Construction work on a double 30 kV HV underground link in 630 mm<sup>2</sup> Alu cable between the Sirakoro and Sotuba substations.

Energie du Mali – sa sollicite tenders in sealed envelopes from eligible bidders who meet the qualifications required to provide the following services:

The construction of about 12 km of trenches, the construction of structures for junctions and crossing of tracks,

The supply and installation of underground aluminium cables with a cross-section of 630 mm<sup>2</sup> between the new 30 kV substation under construction in Sirakoro and that of Sotuba;

The supply, the making of junction boxes;

The supply and installation of optical fibers between the Sirakoro and Sotuba substations over about 12 km with the necessary junctions;  
The supply of two circuit breaker cells for 30 kV line departure;  
The construction of a shut-off station (in a cabin built of masonry) equipped with cells equipped with disconnectors and surge arresters);  
Supply of spare parts, maintenance tools and two operating vehicles.  
Companies should provide evidence of their experience, their know-how for similar work and their financial capacity to perform the services within nine (09) months.

The tendering procedure will be by International Tender reserved for IsDB Member Countries (IOA/PM) as defined in the Guidelines for the Procurement of Goods, Works and Related Services in the Context of IsDB-Financed Projects, September 2018, (the "Guidelines"), and open to all bidders from eligible countries as defined in the Guidelines. Prospective applicants are also invited to review Clauses 1.18 to 1.21 of these Guidelines regarding IsDB conflict of interest rules.

Interested and eligible Bidders can obtain information from:

Ousmane Coulibaly, Coordinator of the Project Management Unit;  
Abdramane Cissouma, Line and Position Expert of the Project Management Unit;  
Sirakoro Meguétana (site of the 100 MW thermal power plant under construction);

# THE DOUTCHI-NIGERIA BORDER ROAD DEVELOPMENT AND ASPHALTING PROJECT

**Project ID No.:** NER1042

**Project Name:** THE DEVELOPMENT AND ASPHALTING PROJECT OF THE DOUTCHI-NIGERIA BORDER ROAD (KURDULA).

**Country:** NIGER

**Funding Agency:** ISLAMIC DEVELOPMENT BANK (IDB)

## **Project Details:**

The Government of the Republic of Niger has obtained from the Islamic Development Bank (IDB) resources in the form of a loan (Instalment Sale) in the amount of Twenty Million Four Hundred and Ninety Thousand (20,490,000) Euro for the financing of the Douthchi-Kurdula Road-Nigeria Border Development and Asphaltting Project.

## **Project Objectives**

As part of the implementation of its sectoral transport policy, the Government of the Republic of Niger has decided to give priority to the rehabilitation and improvement of existing infrastructure and the construction of new communication routes. The Douthchi-Kurdula - Nigeria Border Road is one of the priority routes under this policy. It will contribute to opening up the project area and reducing poverty by enhancing agro-sylvo-pastoral and commercial activities.

This road is a very important link in Niger's road network. Indeed, it makes it possible to significantly improve the conditions of trade with neighbouring Nigeria, particularly in terms of reducing the distance of travel and improving the average speed of traffic.

## **Project Components**

The project is structured around the following five (5) components:

Component 1: civil works

### **Civil works**

The works consist of the development and asphaltting of the Douthchi-Nigeria Border Road (Kurdula) 30 km long. For this purpose, a platform, asphalt pavement and shoulders are provided for a maximum authorized speed of 100 km/h in open country and 80 km/h in built-up areas.

In addition, there are crossing and sewerage works, the construction of toll booths/weighing, the development of junctions and car parks at built-up areas and vertical and horizontal signage.

#### Related work

These works include the construction of 10 km of rural roads, the construction of at least two boreholes, the construction of 2000 ml of fence walls of schools and health centers.

#### Component 2: Advisory Services

A consultant will be recruited to help the Directorate General of Public Works to ensure:

- control and supervision of the works;
- project procurement;
- monitoring of environmental aspects;
- updating the project procedures manual;
- monitoring of road safety aspects.

#### Component 3: Capacity Building / Project Management Unit

This will mainly involve:

- raise road users' awareness of road safety;
- provide support to the Road Maintenance Department by acquiring a deflectograph;
- raise awareness among users about HIV prevention measures;
- training, in the field of roads and procurement, for the benefit of the Project Management Unit and the Administration;
- and to acquire equipment (office automation, computers and wheels) for the benefit of the project management unit.

#### Component 4: Compensation and Eviction

This is the liberalization of the project's footprint. As such, all those impacted will be compensated by the project and displaced accordingly.

#### Component 5: Complementary Initiatives

These initiatives will consist of providing the project site with material and human resources to ensure the safety of people and property throughout the life of the project.

#### Composante 6 : audit technique et financier

The selection of the Technical Audit Firm will be made on the basis of a shortlist of approved national or international audit firms, after notification to expression of interest and on the basis of a Selection Based on Quality and Cost.

The recruitment of a Procurement Expert, a Chartered Accountant, a Road Safety Expert and an Expert for the update of the project procedures manual will be made on the basis of a national Call for Applications;

## **Design & Construction for Road Rehabilitation, Arrangement of Pedestrian and Bicycle Infrastructure**

**Project ID No.:** P150696

**Project Name:** Third Regional Development Project

**Country:** Georgia

**Funding Agency:** World bank

**Last date for submission:** 29 Dec 2022

### **Project Details:**

### ***SPECIFIC PROCUREMENT NOTICE***

#### ***INVITATION FOR BIDS***

*Municipal Development Fund of Georgia*

*Country: GEORGIA*

*Name of Project: Third Regional Development Project (RDP3)*

*Contract Title: Design & Construction for Road Rehabilitation, Arrangement of Pedestrian and Bicycle Infrastructure in Bakuriani*

*Loan No: 8494-GE*

*Contract/Bid No. IBRD/RDP/III/DB/NCB/01-2021*

*The Government of Georgia has received a loan No.8494-GE from the International Bank for Reconstruction and Development (IBRD) toward the cost of the Third Regional Development Project (RDP3), and it intends to apply part of the proceeds of this loan to payments under the contract for Design & Construction for Road Rehabilitation, Arrangement of Pedestrian and Bicycle Infrastructure in Bakuriani.*

*The project implementing agency, the Municipal Development Fund of Georgia now invites eligible bidders to submit their Bids electronically through Georgian E-Procurement system for Detail Design Preparation and Execution of Road Rehabilitation, Arrangement of Pedestrian and Bicycle Infrastructure in Bakuriani. Implementation period is 11 months.*

*Bakuriani is a town located in East Georgia, 190 km south of Tbilisi, in Borjomi Municipality and 30 km away from Borjomi city. Bakuriani is one of the most visited mountain and ski resorts in Georgia, famous for its climate and nature. Diverse possibilities for summer and winter activities supported tourism growth.*

*Over the years, the resort has developed without proper urban planning, resulting in heavily built settlements characterized by high density, lack of public spaces, problems of traffic congestions and lack of parking facilities. The urban area of the region lacks a well-defined grid of roads network and infrastructure standards, which are in continuous decay.*

*Some of the main, and many of the secondary, roads do not meet minimum standards and physical qualities are poor (e.g., a high per cent of the roads are unpaved, missing sidewalks, lighting, missing parking spaces which are solved in individual ways, etc.), resulting in traffic congestion, especially during high tourism season and lack of connectivity for pedestrian.*

*Currently, the town of Bakuriani, village Mitarbi and its adjacent areas suffer from major traffic congestions during the peak tourism season due to the narrow roads, network and road infrastructure standards. Apart from the traffic congestion, lack of good connectivity (pedestrian and vehicle), vibrant public spaces, and parking spaces and low maintenance of infrastructure facilities are some of the main issues faced by the resort. Ski lift access roads are suffering from traffic challenges.*

*Mobility improvement in Bakuriani has been developed within the framework of the investment package. In the context of this project, it is planned to rehabilitate selected streets of Bakuriani, arrange pedestrian zones and bicycle lanes and regulate intersections. A full-fledged drainage system will be built on the rehabilitated streets to ensure water removal from the road surface. The engineering communication channels that are currently stretched in the air, such as gas, electricity and internet, will be dismantled and placed underground in the appropriate trench. Bus stops will be arranged in various locations in Bakuriani, approximately 50 locations, so that the buses can fully serve the residents and tourists.*

*All design solutions shall be agreed with the beneficiary – LEPL Bakuriani Development Agency, Borjomi Municipality, Roads Department of Georgia under the Ministry of Regional Development and Infrastructure, and approved by MDF.*

*In particular, the following road sections are going to be rehabilitated under this assignment:*

- *9 April and Tsakadze roads crossing/junction*
- *9 April road urban upgrade (from the crossroad in the direction of Kokhta). Road length 885m*
- *Kumaritashvili Road (Tamar Mepe Road) length 610m*
- *Mtis Road. length 530m*
- *Kostava Road (Road Near the 25-meter skiing rink) length 287m*

*Expected interventions shall include:*

- *Arrangement of road pavement and sidewalks*
- *Intersection improvements*
- *Arrangement of drainage system*
- *Arrangement outdoor lightening*
- *Arranging road markings and road signs*
- *Dismantling of Existing utility wires and installation new lines under the ground*
- *Arrangement of bus stops at approximately 50 locations throughout the town*

*The estimated cost of the proposed assignment is GEL 7,038,379.00 including all taxes, duties and other governmental levies as elaborated under clause ITB - 14.7.*

*Bidders shall meet the following minimum qualifying criteria to qualify for award of the contract:*

*1. Minimum average annual construction turnover calculated as total certified payments received for contracts in progress or completed, within the last three (3) years shall be GEL 7,000,000.00 equivalent.*

*2. Access to, or availability of, financial resources such as liquid assets, unencumbered real assets, lines of credit, and other financial means, other than any contractual advance payments to meet the following cash-flow requirement: GEL 1,280,000.00.*

*3. Participation as a JV member, contractor, management contractor, or subcontractor, within the last five (5) years prior to the bid submission deadline (starting from the 1st January, 2017) in at least*

*1 (one) road construction/rehabilitation contract, with a minimum value GEL 4,800,000.00 or less than or equal to 3 (three) road construction/rehabilitation contracts with a value of at least GEL 1,600,000.00 of each contract, but with total value of all contracts equal or more than GEL 4,800,000.00 that have been successfully and substantially completed and that are similar to the proposed Works.*

*4. A minimum experience in the following key activity: N/A*

*5. The bidder may meet the following requirements by a proposed specialized subcontractor(s) or sub-consultant(s):*

*At least one (1) successfully completed contract of Detailed Design preparation for a road construction/rehabilitation project for a road with a minimum requirement as stated in 2.4.2 (i) and*

*At least one (1) successfully completed contract of Conceptual Design preparation for a road construction/rehabilitation project with a minimum requirement as stated in 2.4.2 (i) that is successfully implemented.*

*These requirements may be met by one contract or two separate contracts. Design preparation for pit repair of the road will not be considered as similar experience.*

*The bidder may meet the following requirement by proposed subcontractor(s):*

*experience in meeting with environmental and social standards and Employer's requirements (environmental and social) within infrastructure projects.*

*Additional Qualification Criterion as defined in Section III – Evaluation and Qualification Criteria of Bidding Documents.*

*All Bids must be accompanied by a Bid Securing Declaration. Bid Security Declaration shall be valid for 28 days beyond the validity of the Bid (i.e., 120 days+28 days = 148 days). Bidders shall carefully read ITB 19.8 as failure to comply with this ITB may be grounds for bid rejection.*

*Bids shall be submitted electronically as outlined in ITB 25.1. Late bids will not be accepted. Deadline for electronic bids submission is: as stated in the state E-procurement system. Government procurement procedures SHALL NOT apply for this procurement. Interested eligible Bidders may obtain further information through the Georgian E-government procurement system.*

*The complete set of bidding documentation in the English Language is available on E-Procurement website of Government of Georgia free of charge.*

*Bid submission and bid opening will take place electronically using Georgian E-Government Procurement System with certain modifications. Major modifications to the Georgian E-Procurement System are:*

*Functionality of the three rounds of e-Reverse auction is removed. Rounds will not be applicable. The estimated cost of the contract is disclosed in the e-Procurement system and bidders can submit a bid price, which could be below or above the estimated cost, however pricing the bid is the responsibility of the bidder which shall be based on the current market prices and any other factors which may influence the pricing of the proposed works. Requests for clarification should be submitted through the Georgian E-Government Procurement System.*

*Bidding will be conducted through the National competitive bidding procedures specified in the World Bank's Guidelines: Procurement under IBRD Loans and IDA Credits, May 2004, and is open to bidders from all countries as defined in the guidelines. In addition, please refer to paragraphs 1.6 and 1.7 setting forth the World Bank's policy on conflict of interest.*

**Last date for submission:** 19 Dec 2022

**Project Details:**

### *Part I: Scope of EPC*

*The Export-Import Bank of India (Exim Bank or the Bank), on behalf of the Government of India (GOI) has approved financing of a project out of a Line of Credit extended to the Government of the Republic of Maldives for of Cricket Stadium Complex in Maldives, for which Exim Bank now seeks applications for prequalification from eligible Indian entities. Refer Part II ITA 4 for eligibility provisions.*

### *A] Background and Major Components of the Project*

#### *Site and other Data*

*The Republic of Maldives, is a small island nation in South Asia, located in the Arabian Sea of the Indian Ocean. It lies southwest of Sri Lanka and India, about 1,000 kilometres from the Asian continent. The chain of 26 atolls stretches from Ihavandhippolhu Atoll in the north to Addu Atoll in the south. Comprising a territory spanning roughly 298 square kilometres, the Maldives is one of the world's most geographically dispersed sovereign states as well as the smallest Asian country by land area and population, with around 515,696 inhabitants.*

*Hulhumalé is the first fully reclaimed, pre-planned city of the country located within 3 kilometres from Malé, the capital city. Curving a welcoming path for its development in early 2015 Hulhumalé Phase II was reclaimed with the additional 244 hectars. The newly reclaimed addition to the existing conurbation promises diverse development opportunities. Hulhumalé Phase I currently houses 57,000 people with the target population of 93,000 people. With the new developments, Phase II plans for a population of 117,000 people.*

*The International Cricket Council elected Maldives to be a member country for Twenty 20 matches, for the purpose of promoting the game in the island nation. This coincides with the aims of the Government to promote the game and develop a 10,000-spectator capacity, International Standard cricket stadium complex that can be used both locally, and to also host international Twenty 20 cricketing events in Hulhumale’.*

*The Cricket Control Board of Maldives (CCBM) was established on 1 January 1983 by the government to promote and develop the game of cricket in the Maldives. The Maldives became*

*a member of the Asian Cricket Council in 1996, and an affiliate member of the International Cricket Council in 1998.*

*The proposed site is in Hulhumalé suburb, which is well connected with roads, bridges and ferries with the capital city of Male’.*

#### *Project background*

*The stated objectives and goals of the stadium are:*

*1. To develop a stadium on design and build basis with a capacity of 10,000 spectators for a range of uses including, but not limited to: Cricket, concerts and other entertainment events. The Contractor is expected to supply and install 5,000 seats as part of this Project.*

*2. In addition to the standard codes, the stadium shall meet the requirements of the following codes:*

*ICC Guidelines for cricket stadium*

*BCCI Guidelines for cricket stadium*

*As specified in the DPR*

*BREEAM Good rating (Refer to Chapter 9: Sustainability of Detail Project Report) Codes listed in Chapter 9: Codes of Compliance of the Detail Project Report Relevant safety guidelines as prescribed by the Government of Maldives. Local Statutory Guidelines, Rules and Regulations*

*3. To provide a highly cost-effective low maintenance facility.*

*a. To complement a sports and entertainment precinct that can be used seven days a week by ensuring the stadium integrates with, and makes use of, adjacent civic spaces and commercial and community facilities.*

*4. Strengthen the national infrastructure capacity in tourism and hospitality business by allowing the nation to be able to host international cricket tournaments and events frequently, i.e. Indian Premier League or Asia Cup.*

*5. To act as a catalyst for complementary development in the surrounding area.*

*6. To provide a facility with a fifty year useful life.*

*7. To provide a facility that can be utilised all year for a number of events, in order to maximize opportunity for revenue generation and sustainability.*

*8. To provide an “Iconic” stadium facility that reflects the growth of sports in Maldives and is a showcase for sports and the state both nationally and internationally.*

*9. To provide a facility that will allow Maldives to effectively compete for international sports events against comparable facilities in Asia.*

*10. To provide a sustainable development that will enhance public utilisation of facility and ancillary structures.*

*11. That will control and mitigate effects on local communities surrounding the stadium.*

*12. Roof coverage for 75% of the seats.*

13. The seating bowl shall be provided to maximise the atmosphere and locate patrons as close as possible to the field of play.

14. The seating bowl shall be column free and allow excellent viewing conditions for sports and events held in the stadium.

*In addition to the stated Objectives, the complex should also achieve the following goals:*

1. To create a multi-use, 10,000 spectator stadium enhancing the event experience for spectators for all sports.

2. To create a stadium that is internationally recognised as a world-class venue for the showcasing of professional sport and entertainment.

3. Sufficient infrastructure to allow for safe entry and egress for the site.

4. To provide a design that adheres to the principles of Environmentally Sustainable Design with a minimal ecological footprint.

5. To provide an iconic design solution in consultation with Government of Maldives, as per the DPR.

#### *Scope of EPC*

- The components described under this Section are considered to be minimum requirements of the Deliverables that the Contractor is required to deliver under the scope of this Contract.
- Design and Build of an ICC Compliant Cricket Stadium including but not limited to the following works in accordance with the Detail Project Report:

#### *Major Components of the Project*

##### *1. FIELD OF PLAY*

*A minimum of 2 emergency vehicle access routes onto the playing field, 6-meter wide and fitted with suitable security gates, shall be provided.*

##### *1.1 Cricket Ground*

*The Cricket Ground should follow the ICC minimum standards for new cricket grounds.*

##### *1.1.1 The Field*

*The playing surface shall be natural grass incorporating permanent drainage and irrigation points. The field and pitch must drain well and the grass be cut short to result in a fast outfield.*

##### *1.1.2 The Pitch*

*Pitches will be orientated north to south. A total of 5 pitches will be provided with the spacing of 3.66 meters between the pitches. The pitch should have 'true bounce' throughout for the*

*duration of the games, and be of reasonable pace. The pitch cover shall be provided to cover all pitches and shall have a raised rim built into its edge, and have 4 discharge outlets at its corners to allow water that collects on the cover during rain to be discharged into the field drainage system. The bowler's run-ups shall be provided with adequate covers.*

#### **1.1.3 Boundary & Moat**

*A continuous Fence / Moat will be provided around the stadium in front of the spectator seating. It is important under emergency circumstances to allow access across the moat on to the playing area and therefore a method of bridging the 'gap' will be incorporated, either on a permanent or temporary basis.*

#### **1.2 Turf Protection**

*Turf protection is to be provided to allow for the change in events from cricket to a concert and back again. Turf protection tiles are used to achieve this change. These tiles are Translucent which allows for photosynthesis to continue and therefore not damaging the turf.*

#### **1.3 Turf Drainage Design**

*The cricket field should be constructed with the most optimum sub-surface drainage solution for the cricket fields to sustain extreme climatic conditions. The System should provide the ability to promote healthier, stronger, and safer turf by accelerating moisture removal and increasing the amount of oxygen to the root zone. The system should help in providing an optimal growing environment for any playing surface – increasing playability and producing a more enjoyable experience for players and spectators.*

### **2. SEATING BOWL**

*The total minimum ground spectator capacity upon completion is upto 10,000. The functional requirements are summarized here:*

- A variety of seating types will be configured around the circular ground, consisting of a combination of general admission seating, members seating, private boxes, dine & view seating and press seating.*
- Seating for people with disabilities will be available within each seating category and distributed at various locations within the seating bowl.*

### **3. SITE REQUIREMENTS**

- The playing field is to be oriented within the optimum parameters for field orientation. Orientation should also maximize external circulation / evacuation space. To maximize the multi- use nature of the field the relevant sporting codes has indicated that the North/South Orientation of the cricket pitches are acceptable.*

- *On-site parking to be provided for non-event day. This parking will serve as an enhancement to the surrounding developments. On an event day, use of these car parks will be restricted. The public plaza of the stadium should create an area for pedestrian circulation and other activities. Any adjacent car parks and kerbing to be designed to accommodate pedestrian flow and the finishes of the car park will be integral with the plaza so it appears as one space, but should align with local road policy. In addition, dedicated stadium parking will be provided for administration, operations, media, team, and possibly VIP parking.*
- *Event day vehicular access to the site will need to be accommodated within the design as it will be required primarily for media, services and operational teams, VIPs and emergency vehicles.*
- *Boulevard-type atmosphere. The plaza is to be designed as an open space to allow for maximized and safe pedestrian circulation during events. Some hard landscaping components, such as benches, may be integrated in strategic locations to enhance the plaza and break down the scale of the open space.*
- *Power outlets for plaza use to be incorporated into the enclosure of the stadium exterior.*
- *The main public entries to be located to respond to the largest influx of spectators.*
- *Environmentally sustainable design: Provisions for storm water retention to be included.*
- *Adequate Storage tanks to be included for fire protection*
- *Provision for large external Video Boards.*

#### 4. TEAM FACILITIES

*Team facilities shall be located in the North Pavilion and will have direct access to the playing field. There will be ramped entrances for player's access onto the field. Team facilities shall be completed to include air conditioning, finished walls, floor finishes, ceilings, general lighting, furniture, electrical sockets and media requirements. Parking for two team buses will be required as close as possible to the team change facilities.*

##### 4.1 Teams Changing Rooms – Cricket (2 Nos)

*Air conditioned changing room that will accommodate 25 players, including locker space (25) hanging space and benches in front of lockers with direct access to shower area.*

##### 4.2 Umpire / Referee Changing Rooms

*Air conditioned changing rooms shall be provided for match officials. The room will be located with direct access to the Field of Play.*

##### 4.3 First Aid

*Provide an air conditioned first aid treatment suite for use by players (spectators in extreme emergencies) as needed on match days. The main first aid suite shall be situated at pitch level on the team changing room side of the service level with direct access to the field through the*

*pitch access vomitories for the transfer of injured players by Ambulance. Two ambulance bays shall be located adjacent to the facility.*

#### *4.4 Doping Control Room*

*A doping control room shall be provided adjacent to the Team Changing Rooms. The facility will be located away from media accessible areas to provide players privacy.*

#### *4.5 Player's Lounge and Family Room*

*An air conditioned player's lounge will be shared by all teams, and shall be located in close proximity to the central drop off area for the teams with access to both changing areas. A serving counter and a finishing kitchen to serve snacks and light meals.*

#### *4.6 Entrance Lobby and Hall of Fame*

*The Main Entrance Lobby to the Players / North Pavilion will include a dedicated display space for trophies and memorabilia.*

#### *4.7 Player's Benches*

*Two team portable benches shall be located with direct access to the centre line Player's Tunnel to the team changing rooms.*

### *5. SPECTATOR FACILITIES*

#### *5.1 Capacity*

*The approximate net seating distributions, including wheelchair positions are currently being planned. It is proposed to offer various levels of season ticket and associated amenity packages which will be incorporated into the General Admission and VIP seating configurations.*

#### *5.2 General seating requirements*

*A variety of seating types will be configured around the playing field, consisting of a combination of general admission seating, reserved seating, corporate seating including corporate boxes and suites, press seating and team seating.*

- A variety of seating types will be provided and configured around the circular ground (arena), consisting of a combination of disabled seating, general admission seating, corporate box and dine & view seating.*

#### *5.3 General admission seating*

*New general admission seating shall have Bucket seats with backs. Removable public seating adjacent to all disabled seating spaces to be provided to allow maximum of 6 disabled spaces in a group. Additional banks of seating to be provided to allow for use in disabled seating space, when disabled spaces are not being used.*

#### *5.4 Corporate suite seating*

*Corporate Suites having enclosed Air Conditioned private hospitality space with fixed pitch view seating in front of the suite glazing. Suites shall be located to allow an excellent viewing angle to the pitch.*

#### *5.5 Accessible (Disabled Seating)*

*Seating for People with Disabilities will be distributed at various locations within the seating bowl within all seating categories and all tiers of the stadium.*

#### *5.6 Public & Corporate Dining Rooms*

*The public and corporate dining areas should be provided with various amenities.*

#### *5.7 Public Toilet facilities*

*Adequate public toilets shall be provided throughout the stadium evenly distributed off the public concourses located behind the seating tiers.*

#### *5.8 Corporate & VVIP Toilets*

*VVIP Seating / Dining areas and Private Box toilets shall be of a higher quality finish.*

#### *5.9 Prayer Rooms*

*Prayer Rooms are provided at multiple locations throughout the stadium. Prayer room is a quiet location set aside in a busy public place (stadiums, hospital, university, airport, etc.) where people of differing religious beliefs, or none at all, are able to spend time in contemplation or prayer. Many of these spaces are "small, clean and largely unadorned areas", which can be adapted and serve for any religious or spiritual practice.*

#### *5.10 Merchandising outlets*

*It shall be provided at locations within the public concourses.*

*11*

#### *5.11 Public first aid rooms*

*Satellite first aid stations will be distributed throughout the public concourses.*

#### *5.12 Signage/graphics*

*A comprehensive, visible, readable, flexible and effective signage system shall be provided both outside and inside the building.*

#### *5.13 Match Day Public Information Office*

*Match Day Public Information Office to be provided. It is to be accessible both externally and internally to the ground. This facility will be used for Lost Children, Lost & Found etc. All power, data, and telephone outlets shall be provided.*

#### *5.14 Ticketing Windows*

*Ticketing windows will be provided at all Main Gates into site. Non-event day ticket sales will be in the club facility.*

#### *5.15 Public Telephones*

*Public telephone booths shall be located on the main concourse adjacent to the entry points. These shall be free standing units and shall be contained within acoustic shrouds at designated locations close to the main entry points.*

#### *5.16 TV Monitors*

*Provision of Space and Support for large size Flat Screen TV monitors, including all power, data and MATV cabling requirements should be located in the following locations:*

- Throughout the public concourse*
- Adjacent to food and beverage concessions.*
- Within all Corporate Suites*
- Players Areas*

12

## **6 FOOD AND BEVERAGE CATERING REQUIREMENTS**

*The planning requirements of the Food & Beverage Services shall meet the catering needs of the stadium in an efficient and effective manner. The needs of all the different user groups identified have to be incorporated into the detailed design. The location of the various areas that make up the Catering System shall be carefully considered to ensure easy distribution of food and beverages from loading dock to end-user.*

#### **6.10 Food and Beverage Service**

*An efficient and effective system for serving food and beverages to spectators, suites and boxes, hospitality spaces, and athletes is an important component of successful stadium operations.*

#### **6.11 Catering Support**

*The main kitchen / kitchens and commissary will be located with immediate access to the loading docks and service lifts and shall be designed to accommodate all match day catering requirements.*

#### **6.12 Catering Staff Facilities**

*Space will be provided within the commissary for Catering administrative offices, staff lockers, uniform distributing, and event-day briefing. Laundry facilities are to be included within the facility. Space will be provided for temporary catering staff in close proximity to the main catering facilities and a briefing room on the service level of the stadium*

### **7 ENTRANCES AND CIRCULATION**

#### **7.10 Entrances / Ticketing & Ticket Booths**

*An efficient and effective control system for access into and exit from the stadium will be provided for all users, including both Event-day and non-Event day times.*

##### **7.10.1 Turnstiles**

*Provide provision for a minimum of 1 turnstile for 660 spectators at public entries.*

##### **7.10.2 Access and Circulation**

*A system for the efficient and effective control of access into and out of the Stadium and circulation around the outside and within the Stadium shall be provided for all users.*

##### **7.10.3 Corporate and VIP Entrance**

*A separate entrance lobby is to be provided for the Corporate Suite, Corporate Box, VIP, sponsors and guests on the main public access level and preferable in close proximity to car parking*

##### **7.10.4 Players Entrance**

- *A secure Players' entry within the building with bus drop-off. This entrance shall be protected from public exposure and shall be able to accommodate at least two team buses parked in front of the Main entry or Secondary entry.*
- *Direct access from the entrance area to the changing rooms shall be provided.*

##### **7.10.5 Staff Entrance**

*A single entry point will be provided for all event staff and catering staff with direct access to the external plaza areas surrounding the stadium. This space shall be adjacent to the events offices and catering offices, including changing rooms, dining room and uniform distribution.*

#### *7.10.6 Media Entrance*

*Media parking to be located as close as possible to the media access/egress point. A lift is to be available for use by the media staff to allow the vertical circulation of media personnel and equipment. All media facilities are to be separated from the public by secure means. All doors into the media areas are to be controlled with electric locks and proximity card readers.*

#### *7.11 Access and Egress*

*A public egress system shall be provided so that in emergencies it allows the public to leave the Stadium by smooth unimpeded exit routes to adequately lit and clearly indicated assembly points in safe areas. The emergency egress system shall be designed in accordance with the "Guide to Safety at Sports Grounds" (The Green Guide)*

#### *7.12 Concourses*

##### *7.12.1 Public Concourses*

*The main public concourse shall be located behind all main seating tiers and shall serve directly all vomitories, concessions, and toilets. The concourses shall be designed to ensure the safe passage of spectators in the event of an emergency to appropriate exits. The basis for the width of the concourse shall be as set out in the United Kingdom "Guide to Safety at Sports Grounds" (Green Guide) and in accordance with good international practice and local and national regulations.*

##### *7.12.2 Corporate Suite Concourse*

*Private corridors will provide access to the Suites and Boxes and associated toilet facilities. These corridors shall feature upgraded finishes, similar to the suite finishes.*

#### *7.13 Passenger Lifts*

*Passenger lifts shall serve all main levels of the stadium. All lifts shall conform generally to National Building Code and other safety guidelines.*

#### *7.14 Service Elevators*

*Service Elevators will be provided with fully opening doors and durable stainless steel finish. Goods lifts will have a minimum 3500 kg load capacity. Goods lifts required to be close to kitchens, storage and service areas.*

#### *7.15 Stairways and Ramps*

*Stairways will be distributed throughout the building, from lowest level to the upper floor, allowing for both public and service use.*

#### *7.16 Field Entrances*

*A minimum of two pitch access points shall be provided from the Service Road to the FOP. These shall provide access for service vehicles, pitch maintenance vehicles and emergency vehicles as well as providing alternate means of egress from the field of play for events where patrons are located on the field (Concerts, Opening Ceremonies etc.).*

*These access points shall also be designed to assist the natural ventilation of the field to promote healthy grass cultivation.*

### *8 PRESS FACILITIES*

#### *8.10 Media Access*

*Media parking is to be provided on the entry level and is to be located as close as possible to the media access/egress point.*

#### *8.11 Written Press Box*

*A written press box shall be provided with a clear elevated view on the field.*

#### *8.12 Media Facility – Lounge*

*Provide a lounge area within the press area.*

#### *8.13 Toilets*

*The press shall have dedicated male and female toilets adjacent to the media lounge.*

#### *8.14 Player Interview/Conference Room*

*A conference & interview room will be provided for interviewing players and coaches in an 'official' setting with appropriate lighting, backdrop, air conditioned and adequate space for reporters and cameras.*

#### *8.15 Interview Areas at Pitch Level*

*In addition to the main press conference room located in close proximity to the players and media facilities on the service level the following zones shall be provided at pitch level.*

### *9 BROADCAST FACILITIES*

#### *9.10 Television Broadcasting Box*

*Two television broadcasting booths shall be provided with special acoustic treatment to walls and ceilings. Allow for the maximum flexibility for the producer's camera positions and*

*presenters back- drop of the arena. Sufficient height shall be provided to ensure adequate lighting positions.*

**9.11      *Television Pre/Post Production Studio.***

*The studio shall be sized to accommodate 4 presenters (located at the front of the booth), camera operators and sound engineers, for a total of 10 persons at one time. The front of the booth shall be fixed with anti-reflective glass to allow the presenters to be shot with the pitch as a backdrop. These spaces shall be built as shell space only to be fitted out by the TV networks.*

**9.12              *Radio Broadcaster Booths***

*Radio broadcasting booths shall be provided for radio commentators and shall have builtin counters and special acoustic isolation treatment on walls and ceilings to each box. The spaces shall be flexible to accommodate the varying broadcasting media requirements*

**9.13              *Third Umpire Room & Scorer***

*Third Umpire Room shall be located at an elevated position with preferential view to pitch and scoreboards.*

**9.14              *Production Control Room***

*The Production Control Room will be located in the lower level of the building to facilitate ease of movement of Heavy Equipment.*

**9.15 *Camera Platforms***

*Final camera positions will be subject to the requirements of individual broadcasters and producers for each particular sport. The camera and cabling requirements positions shall be located around the ground as per ICC Guidelines. Camera positions to be designed to minimize obscuring sightlines from seating and shall not reduce the spectator capacity of 20,000.*

**9.16 *Television Outside Broadcast Vehicle***

*Parking for OB Vans shall be provided within the stadium compound within 100m of the main TV Box and with minimum clearance height 4600mm. Patch room to be provided within the OB Van parking area with direct link to all camera outlets and Broadcast Box and interview rooms.*

**9.17 *Cabling/Service Provisions***

*The cable route from the OB Van compound and parking area into the building will allow for easy access to cabling routes. Permanent fibre optic cabling shall be installed to the primary broadcast facilities between Broadcast Room, OB Van Area and all the camera positions.*

## **10 STADIUM OPERATIONS FACILITIES**

### **10.10 Stadium Management**

*The stadium management requirements shall be developed further in consultation with the stadium operator as the design progresses. At this feasibility stage the following provisions shall be made:*

#### **10.10.1 Stadium Management Offices**

*Stadium Management offices shall be provided with access to natural light and ventilation. A space allocation shall be made at this stage.*

#### **10.10.2 Maintenance Staff Lockers**

*Locker/shower/toilet rooms for full-time staff, including grounds keeping and maintenance personnel, will be provided. Separate shower facilities will be required for male and female staff.*

### **10.11 Security**

*This brief allows for the inclusion of separate facilities for privately contracted Stadium Security and the Maldives Police, which shall work jointly during events.*

#### **10.11.1 Main Security Office**

*The main security office suite will be located on the lower level in close proximity to the main entry. It will be used for coordinating security personnel and stewarding operations on event days. It must be able to accommodate all emergency services in case of building evacuation, so all basic facilities within the event control room will be duplicated, in a reduced fashion. It will be located in a different quadrant than the Event Day Command Post.*

#### **10.11.2 Security Help Desks**

*Security help desks and offices shall be located adjacent to the main entry points.*

#### **10.11.3 Police**

*The main Police office shall be located in an ideal location in discussion with them and the stadium authorities.*

#### *10.12 Event Storage*

##### *10.12.1 Cricket Equipment*

*Storage for equipment, including boundary ropes, sight-screens, and balls, will be provided on the Field Level, with direct access to the field.*

##### *10.12.2 Entertainment Equipment*

*Storage for pre-event and half time entertainment production equipment will be provided in the service level. This may be a lockable multi-purpose room, or other service level rooms not required for concert / opening ceremony use. On site storage will be required for seats removed to allow for stage set-up.*

##### *10.12.3 Rigging Store*

*Storage for rigging equipment shall be provided within the entertainment equipment stores and main facility workshops.*

#### *10.13 Grounds keeping*

*A large storage area for grounds keeping materials and equipment will be provided. This will be located adjacent to the pitch, with direct access by grounds keeping vehicles.*

#### *10.14 Janitorial*

##### *10.14.1 Central Supply Storage*

*A centralized storeroom will be provided on the Service Level for storage of bulk cleaning supplies.*

##### *10.14.2 Cleaner's Closets*

*Each pair of public toilet rooms will have a cleaner's closet, with a mop sink and space for storing toilet room supplies.*

##### *10.14.3 Rubbish Collection*

*Rubbish collection rooms will be distributed on each level for handling of waste collections.*

##### *10.14.4 Waste Compactors*

*Waste Compactor units shall be located beneath all refuse chutes. A refrigerated compactor area shall be located adjacent to the central kitchen.*

#### *10.14.5 Waste Management Office*

*A Waste Management office will be located adjacent to the main service drive*

#### *10.15 Maintenance*

##### *10.15.1 Maintenance Storage*

*A large storage room will be provided for storage of materials and supplies.*

##### *10.15.2 General Building Storage*

*A large storage room will be provided for miscellaneous building storage.*

#### *10.16 Building Services*

*Space allocation shall be allowed for the following building services.*

*Mechanical*

*Electrical*

*IT/ Communications*

*PA Systems*

*Fire*

*BMS*

*Lifts*

*Noise generating plant equipment shall be ideally located away from acoustically sensitive areas. Where possible, roof top equipment shall be attenuated and isolated to avoid noise breakout. Consideration is being given to utilizing the principles of environmentally sustainable design to minimize the use of air conditioning plants.*

#### *10.17 STADIUM CLUB FACILITIES*

##### *10.18 Lounge & Reading Area*

*The lounge/bar is an integral part of the Club and will be a space directed towards adult use. It will have a full service sit-down bar for beer, wine and mixed drinks. Provide a dedicated storage room for the lounge/bar. The lounge/bar will possibly include games such as billiards and other table games, darts, and shuffle board. Multiple TV monitors will be included as part of the interior space of the Lounge*

#### **10.19 Gymnasium & Fitness Centre**

*The fitness gym is generally separated into individual zones, determined by equipment and exercise types - Stretch area (warm up), cardiovascular area, and Resistance and/or free weights area*

##### **10.19.1 Floors**

*The floor structure must be able to resist high dead loads imposed by the equipment, along with the potential for high live loads.*

##### **10.19.2 Walls**

*Finishes should take account of the ease of cleaning and maintenance. Scuffing of walls by moving equipment and users may be a particular issue. Users may also use walls during stretching exercises. Therefore, sharp edges and wall projections should be avoided in these areas.*

##### **10.19.3 Mirrors**

*Continuous mirrors should be provided in required zones. The mirrors should be a minimum of 2m high. Mirrors should be securely fixed above skirting level, to avoid impact from loose weights or cleaning equipment. Large continuous mirrors should not be directly fixed to walls but be fixed onto a rigid plywood backing board to avoid distortion. Point fixing mirrors should be avoided. Mirrors should be bonded to their backing board or mounted onto a metal carrier frame.*

##### **10.19.4 Ceilings**

*Fully suspended ceilings with raised (or coffered) feature areas giving extra height needed for specific equipment. Support integrated or hanging fixtures e.g. loud speakers, ventilation grilles, lighting. Heavier fittings e.g. air conditioning units, screens or gantries should be supported from structural points. Allow easy access to building services located above the ceiling. Gyms are generally highly serviced areas.*

#### **10.20 Indoor Cricket Academy**

10 Nos. of Indoor Practice Pitches are provided. Coach Rooms and Discussion Rooms are provided as part of the academy. Lockers and changing rooms are provided for the players.

#### 10.21 Multipurpose Hall

Multipurpose hall is provided for recreation of the club members. Billiards, Snookers and table tennis tables are provided along with seating areas. This can be multi used for Yoga/ Meditation or some other purpose.

#### 10.22 Swimming Pool

Full Olympic Size Pool of size 50m x 25m is provided along with required surrounding pool deck areas. Concrete pool tank structure, pool hydraulics, pool equipment, special equipment and pool lighting.

#### 10.23 Cafeteria

Cafeteria cum informal seating area is provided in the club area.

#### 10.24 Club Changing and Locker Rooms

Separate sets of locker and changing rooms are provided for the club areas. One set of Dry Changing and Locker Room for male and female is provided for Indoor Cricket Academy and Fitness centre. One set of Wet Changing and Locker Room for male and female is provided for Swimming Pool and Hydrotherapy.

#### 10.25 Outdoor Courts and Recreational Areas

2 Nos. of outdoor Tennis Courts are provided on the Podium to activate it on non-match days. 2 Nos. of Basketball courts are provided in the public plaza areas along with 4.5m high fencing on east side (fixed) to be provide with two access gates. Skate park is also provided and designed to merge with the landscape of the public plaza areas. These outdoor courts and skate parks are provided to activate the public areas.

### 11 EXTERNAL FACILITIES

#### 11.10 Pitch

The quality of the turfed playing surface is to be of a standard suitable for national and international sporting events. The pitch is to have irrigation and drainage, covering the full extent of the grassed area. The pitch is to be flat with the surrounding area up to the front row sloped only for drainage. Details of the pitch drainage & irrigation system will be as per ICC Guidelines.

#### *11.11 Scoreboard / Videoboard*

*Provide two video boards which will be located in opposite sides of the stadium and will provide re- play coverage to all patrons. Associated plant and equipment rooms are to be located in close proximity to the screens.*

#### *11.12 Parking*

*Parking distribution will be as follows:*

- *Public Parking (Outside the Stadium plot)*
- *People with disabilities Parking Bays*
- *Team Parking Bays:*
- *VVIP Parking*
- *Media Parking*
- *Police*
- *Ambulance*
- *Provide parking spaces for 3 Broadcast Trucks and 2 Team Coaches.*

#### *11.13 Transport*

*A strategy to address pedestrian and public transport routes will be developed in consultation with the traffic consultant and the stakeholders.*

#### *11.14 Advertising*

*Accommodations will be made for several varieties and locations of advertising:*

#### *11.15 Sports Lighting*

*Artificial Lighting levels are provided as per ICC standards. 4 Nos. of Highmast towers are considered.*

#### *11.16 Roof Design*

*The roof should be designed to be an architectural statement that reflects the aspirations of modern design within the Maldives context whilst providing an economical, lightweight structure that covers spectators. Careful consideration shall be given to ensuring that the shadow cast by the roof on the field of play is minimised to provide the optimum growing conditions for the natural grass pitch.*

#### *11.17 Roof Services and Roof Access*

*The roof will house the following services and access provisions amongst others:*

- House lighting and Emergency Lighting supported from the circumferential service zone.*
- Provision for PA Speakers supported from the circumferential service zone.*
- Architectural Lighting*

#### *11.18 Façade Design*

*The entries shall be read from the same architectural language with their own individual identity. The external façade massing and form shall be designed to mediate between the macro size of the stadium and the context at a human scale. The facades shall be designed such that they will maintain a maximum amount of visual transparency through the external envelope when viewed from both sides.*

#### *11.19 Earth Mound Seating*

*East Side of the stadium has Earth Mound (sloping) Seating acting as an informal spectator viewing areas. This mound opens up the stadium bowl from east side towards the ocean. Two staircases and ramps are provided which leads to the mound seating. The slope to be provided for the mound should be in accordance to the seating standards as per Safety Guidelines.*

#### *11.20 Amphitheater*

*Outdoor Amphitheater is provided in the east side plaza area facing the ocean. It is sloping in opposite direction of the slope of the mound. Combination of hardscape & green is used for its finish.*

## **Hydro-Agricultural Development Project in the Haut Sassandra and Fromager Regions-Phase III**

**Project ID No.:** CIV1022

**Project Name:** HYDRO-AGRICULTURAL DEVELOPMENT PROJECT IN THE UPPER SASSANDRA AND CHEESE REGIONS-PHASE III

**Country:** IVORY COAST

**Funding Agency:** Islamic Development Bank

### **Project Details:**

#### **GENERAL NOTICE OF PROCUREMENT (AGPM)**

Method of financing: ISTISNAA and ORDINARY LOAN

Funding No:CIV1022

1. The Government of the Republic of Côte d'Ivoire has subscribed to financing in the amount of 35.14 million Euros (23,050,000,000 CFA francs) in the combined form of an instalment sale and an ordinary loan from the Islamic Development Bank to finance the Hydro-Agricultural Development Project in the Haut Sassandra and Fromager Regions – Phase III and intends to use a portion of this funding to make payments for the acquisition of related goods, works and services and consultancy services required for this project.

2. The Hydro-Agricultural Development Project in the Haut Sassandra and Fromager Regions – Phase III, which aims to consolidate and capitalize on the achievements of phases I and II and to develop 812 ha to achieve the objective of 1,600 ha initially planned, should create an environment conducive to the involvement of private operators, the development of community initiatives and the empowerment of women and youth employment.

To achieve the objectives listed above, the project has been structured on the basis of the following five (05) components:

- Component A: Hydro-agricultural developments

Reinforcement work of phases 1 and 2 and development of 80 ha of extension

Construction of 6 earthen dams and development of 732 ha downstream in the Marahoué

Environmental measures and accompanying actions

- Component B: Value Chain Development

- Production support
- Socio-economic infrastructure
- Support for valorization
- Institutional support
- Component C: Support to the Project Management Unit
- Component D: Consultancy services
- Component E: Audit of the project.

#### Goods Markets:

The procurement of goods in particular, the supply of agricultural inputs and equipment, will be carried out by National Open Call for Tenders (AON). Equipment for the support of agro-industrial units (reinforcement of the technical platform of 2 tons hours) equipment related to the operation of the Project Management Unit (furniture, vehicles & motorcycles, computer equipment and accounting management software) and institutional support (computer equipment, vehicles and motorcycles), will be carried out through the consultation procedure with national suppliers.

#### Works Contracts:

The procurement of comfort works will be carried out by National Calls for Tenders (AON), the rehabilitation works of the PMU premises by consultation with national companies, while the construction of 6 earthen dams and the development of 732 ha downstream, will be carried out by International Tenders limited to IDB member countries (IOB / PM).

#### Selection of Consultants:

The selection of consultancy services for the supervision and control of the works of six (6) sites and development of 732 ha downstream will be acquired through a competitive process using the Quality and Cost Based Selection (SFQC)/PM method of consultants from IsDB member countries selected from the shortlist. In addition, consultancy services for the project procedure manual review mission will be procured through the selection of an individual consultant from the shortlist. Consultancy services for the financial audit of the project as well as marketing support will be procured through a competitive process using the Least Cost Selection (SMC) method of national consultants selected from the shortlist.

3. Acquisitions financed by the Islamic Development Bank shall be carried out in accordance with the Guidelines for the Procurement of Goods, Works and Related Services under the

Projects Financed by the Islamic Development Bank (current edition) and shall be open to all eligible bidders as defined in these Guidelines. Procurement of consultancy services will be carried out in accordance with the Guidelines for the Procurement of Consultancy Services in the Framework of Projects Financed by the Islamic Development Bank (current edition).

Specific procurement notices for International Invitation to Tender for Member Countries (ICA/PM) and calls for expressions of interest for consultancy services open to Member Countries will be published as and when they become available, on the IsDB website "www.isdb.org", in at least one newspaper with a wide international circulation and in at least one newspaper with a wide circulation of the Republic of Côte d'Ivoire.

4. Interested and eligible applicants, who wish to be considered for the supply of goods, works and consultancy services for the project, or who wish to obtain additional information, are invited to contact the Beneficiary at the address below:

Name of Organization: Ministry of State, Ministry of Agriculture and Rural Development/Agency for the Development of the Rice Sector (ADERIZ)

Name of contact person: Mr Abou- Bakar COULIBALY,

Function of the contact person: Coordinator of the Hydro-Agricultural Development Project in the Haut-Sassandra and Fromager Regions.

Phone: (+ 225) 0707930402/2735957507/2720228000

## Somali Electricity Sector Recovery Project

**Project ID No.:** P173088

**Project Name:** Somali Electricity Sector Recovery Project

**Country:** Somalia

**Funding Agency:** World bank

### REQUEST FOR EXPRESSIONS OF INTEREST

Country:

Government of Somaliland

Name of Project: Somali Electricity Sector Recovery Project

Project ID: P173088, TF No: IDA-D9310

Assignment Title: National Gender Energy Assessment (Firm)

Type of Appointment: Consultant Firm

Reference No.: SO-MOEM-310804-CS-CQS

Place of Assignment: Hargeisa, Somaliland

#### Background

The Government of Somaliland has received a grant from the World Bank to implement the Somali Electricity Sector Recovery Project (SESRP). The Project Development Objective of SESRP is to increase access to electricity services and to re-establish the electricity supply industry in the Project Areas.

The Ministry of Energy and Minerals (the Ministry) has established a Project Implementation Unit (PIU) to carry out the day-to-day activities of project planning, coordination, and implementation of the Somali Electricity Sector Recovery Project.

The project comprises of the following four components: (i) Sub-transmission and distribution network reconstruction, reinforcement, and operations efficiency in the major load centers of Hargeisa; (ii) Hybridization and battery storage systems for mini grids; (iii) Stand-alone solar off-grid access to public institutions (Health and Education); (iv) Institutional Development and Capacity Building.

The Ministry of energy and minerals intends to apply part of the proceeds of this grant to engage to competitively recruit a firm (the “Consultant”) to conduct a National Gender and Energy Assessment to understand the gender disparities that currently exist in the energy sector of Somaliland.

Under the guidance of the GoSL, the Consulting Firm will be responsible for the successful Gender and Energy assessment, launch, and submission of the final report of the National Gender and Energy assessment.

The Objective of The National Gender and Energy Assessment will provide detailed analysis on the preliminary assessed components, as well the socio-economic positioning of women, norms of assigned gender roles, sector participation rates, inheritance laws, decision making roles, challenges faced by female headed households, skill enhancement availability, and safety of vulnerable women; and how the aforementioned affects access to clean energy and meaningful participation of women in the energy sector.

The consulting firm will be engaged for a period of 12 Months from commencement.

The technical specialist shall perform all other specific tasks detailed in the Terms of Reference (TOR) for the assignment that can be found at the following website: [www.moem-sl.com](http://www.moem-sl.com) and [www.moem.govsomaliland.org](http://www.moem.govsomaliland.org) or can be provided upon submission of an application in person or by e-mail provided below.

The MINISTRY OF ENERGY AND MINERALS in Government of Somaliland now invites eligible consulting firms (“Consultants”) in providing the above services. Interested consulting firms must provide information indicating that they are qualified to perform the services (brochures, description of similar assignments, experience in similar conditions, and availability of appropriate skills etc.). The short-listing criteria are as follows:

Core business of the firm and years in business.

Experience of conducting similar assignments on Gender and Energy assessments/studies.

Experience of relevant services in an environment similar to that of Somaliland; and

The technical and managerial organization of the firm. (Provide only the structure of the organization, general qualifications, and number of key staff. Do not provide CV of staff). Key experts will not be evaluated at the shortlisting stage.

The attention of interested Consultants is drawn to paragraphs 3.14, 3.16 and 3.17 of the World Bank's Procurement Regulations for IPF Borrowers: Procurement in Investment Financing - Goods, Works, Non-Consulting and Consulting Services dated July 2016 and revised in November 2017 and August 2018, and November 2020 ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest.

Consultants may associate with other firms to enhance their qualification but should indicate clearly whether the association is in the form of a joint venture and/or a sub consultancy. In case of a joint venture, all the partners in the joint venture shall be jointly and severally liable for the entire contract, if selected.

A Consultant will be selected in accordance with the Consultant qualifications (CQS) method set out in the World Bank's Procurement Regulations.

Interested Consultant may obtain further information at the address below during office hours from 8:30am to 5:00pm Hargeisa time (Excluding public holidays).

Further information can be obtained by sending email requests at the email address below. Expressions of interest must be delivered (in person, by mail, or by e-mail) or in a written form in three (3) hard copies to the address below by not later than 5:00pm on 14th December 2022.

5. The detailed Terms of Reference (TOR) is available online on TANEPS - <https://www.taneps.go.tz>. Consulting firms will be required to register on the TANEPS to be able to participate in the expression of interest process. All requests for clarification should be sent through TANEPS and the client will send Responses to Clarifications through TANEPS - <https://www.taneps.go.tz> and an email notification will also automatically be sent to those consulting firms which have started working on this request for expression of interest. The consulting firms will be responsible for ensuring that any addenda available on the TANEPS is also downloaded and incorporated.

6. The Judiciary of Tanzania now invites eligible consulting firms (“Consultants”) to express their interest in providing the Services. Interested eligible Consulting firms should provide information demonstrating that they have the required qualifications and relevant experience to perform the Services. The shortlisting criteria are:

A: Core business and at least 10 years in the business related to the assignment.

B: Relevant similar experience which should specifically include the below;

i. Experience of at least five (5) similar assignments in the last 10 years of which at least one (1) must be the world bank or other development partners funded project - information to be provided should include the name of the assignment, name and full contact address of the client, contract value (in equivalent US dollars) and period (dates) of execution of the assignments and the role played in the assignment (Lead or JV partner).

ii. Demonstration of experience of working in similar conditions preferably in developing countries.

C: Technical and managerial capability of the firm (Provide only the structure of the organization, general qualifications and number of key staff). Do not provide CV of the key staff as Experts will not be evaluated at the shortlisting stage.

7. The REoI for this SBC-Package III is being advertised concurrently with REoIs for the other 9 packages as listed below, the assignments in all 10 packages will be executed simultaneously. Hence, in order for a firm shortlisted in more than one package to be contracted for multiple packages; it must propose separate Key Experts for each package in both Technical and Financial Proposals.

FOR IJCs

Package I: Supervision of construction works for the proposed IJCs in four (04) selected regions of Singida, Geita, Simiyu and Manyara

Package II: Supervision of construction works for the proposed IJCs in two (02) selected regions of Pwani and Lindi

Package III: Supervision of construction works for the proposed IJCs in three (03) selected regions of Katavi, Songwe and Njombe

FOR SBCs

Package I: Consultancy service to update the existing design (redesign) and standard drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in eleven (11) selected locations all around Tanzania (Phase II)

Package II: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in nine (9) selected locations all around Tanzania (Phase II).

Package IV: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in eleven (11) selected locations all around Tanzania (Phase II).

Package V: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court

buildings which will be built in four (4) selected locations all around Tanzania (Phase II)

Package VI: consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in six (06) selected locations all around Tanzania (Phase II).

Package VII: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in ten (10) selected locations all around Tanzania (Phase II).

8. The attention of interested Consulting firms is also drawn to Section III, paragraphs, 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers" Fourth Edition, November 2020 ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest.

9. The Consulting firm may associate with other firm(s) to enhance their qualifications but should indicate clearly whether the association is in the form of a joint venture and/or a sub-consultancy. In the case of a joint venture, all the partners in the joint venture shall be jointly

and severally liable for the entire contract, if selected. Therefore, each member of JV shall independently meet the requirements of the evaluation criteria. The experience, technical & managerial capability of the Sub-Consultants shall not be evaluated to enhance the qualification of the Lead Firm or JV.

10. The Consulting firms will be selected in accordance with the Quality Cost Based Selection (QCBS) method set out in the Procurement Regulations.

11. Further information can be obtained at the address below during office hours from 08.00 to 15.30 hours Local time Monday to Friday, except on public holidays.

12. Expressions of Interest must be submitted online through TANEPS - <https://www.taneps.go.tz> on or before 14:00 Hrs Local time on 29th December, 2022. The Expression of Interests will be opened promptly thereafter through TANEPS. The System would not allow any late submission of expression of Interests. The Client shall not be held liable for any delays due to system failure beyond its control. Even though the system will attempt to notify the Consulting firms of any updates, the Client shall not be liable for any information not received by the bidder. It is the Consultants' responsibility to verify the website for the latest information related to this selection process.

13. Attention is drawn to the Procurement Regulations requiring the Borrower to disclose information on the successful Consultant's beneficial ownership, as part of the Contract Award Notice, using the Beneficial Ownership Disclosure Form as included in the Request for Proposals.

**Supervision of the construction works for the proposed Integrated Justice Centres (IJC) in four (4) selected regions – Singida, Geita, Simiyu, and Manyara**

**Project ID No.:** P155759

**Project Name:** Citizen-Centric Judicial Modernization and Justice Service Delivery

**Country:** Tanzania

**Funding Agency:** World bank

**Project Details:**

**REQUEST FOR EXPRESSIONS OF INTEREST**

FOR

PACKAGE I: CONSULTING SERVICES FOR SUPERVISION OF THE CONSTRUCTION WORKS FOR THE PROPOSED INTEGRATED JUSTICE CENTRES (IJC) IN FOUR (4) SELECTED REGIONS – SINGIDA, GEITA, SIMIYU, AND MANYARA

CONSULTING SERVICES – FIRMS SELECTION

COUNTRY: Tanzania

NAME OF PROJECT: Tanzania Citizen-Centric Judicial Modernization and Justice Service Delivery Project (P155759)

CREDIT No.: IDA 70580-TZ

Reference No.: IE 007/WB-CCP- P155759/320396/2022/23/HQ/C/13

1. This request for expression of interest (REOI) follows the General Procurement Notice for this Project that appeared in the United Nations Development Business (UNDB) No. 1738 of 09th June 2022.

2. The Government of the United Republic of Tanzania, through the Judiciary of Tanzania (JoT), has received a credit from the International Development Association (IDA) financing from the World Bank towards the cost of the Citizen-Centric Judiciary Modernization and Justice Service Delivery Project and intends to apply part of the proceeds for consulting services.

3. The consulting services (“the Services”) involve Supervision of the construction works for the proposed Integrated Justice Centres (IJC) in four (4) selected regions – Singida, Geita, Simiyu, and Manyara as detailed in the Terms of Reference (TOR). The assignment is expected to be completed within 30 months which includes 18 months of construction and 12 months of Defect Liability Period (DLP)

4. The detailed Terms of Reference (TOR) is available online on TANEPS - <https://www.taneps.go.tz>. Consulting firms will be required to register on the TANEPS to be able to participate in the expression of interest process. All requests for clarification should be sent through TANEPS and the client will send Responses to Clarifications through TANEPS - <https://www.taneps.go.tz> an email notification will also automatically be sent to those consulting firms which have started working on this request for expression of interest. The consulting firms will be responsible for ensuring that any addenda available on the TANEPS are also downloaded and incorporated.

5. The Judiciary of Tanzania now invites eligible consulting firms (“Consultants”) to express their interest in providing the Services. Interested eligible Consulting firms should provide information demonstrating that they have the required qualifications and relevant experience to perform the Services. The shortlisting criteria are;

A: Core business and at least 10 years in the business related to the assignment.

B: Relevant similar experience which should specifically include the below;

i. Experience of at least five (5) similar assignments in the last 10 years of which at least one (1) must be the world bank or other development partners funded project - information to be provided should include name of assignment, name and full contact address of the client, contract value (in equivalent US dollars) and period (dates) of execution of the assignments and the role played in the assignment (Lead or JV partner).

ii. Demonstration of experience of working in similar conditions preferably in developing countries.

C: Technical and managerial capability of the firm (Provide only the structure of the organization, general qualifications and number of key staff). Do not provide CV of the key staff as Experts will not be evaluated at the shortlisting stage.

6. The REoI for this IJC -Package I is being advertised concurrently with REoIs for the other 9 packages as listed below, the assignments in all 10 packages will be executed simultaneously. Hence, in order for a firm shortlisted in more than one package to be contracted for multiple packages; it must propose separate Key Experts for each package in both Technical and Financial Proposals.

#### FOR IJCs

Package II: Supervision of construction works for the proposed IJCs in two (02) selected regions of Pwani and Lindi

Package III: Supervision of construction works for the proposed IJCs in three (03) selected regions of Katavi, Songwe and Njombe

#### FOR SBCs

Package I: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in eleven (11) selected locations all around Tanzania (Phase II).

Package II: Consultancy service to update the existing design (redesign) and standard drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in nine (9) selected locations all around Tanzania (Phase II)

Package III: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in nine (9) selected locations all around Tanzania (Phase II).

Package IV: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in eleven (11) selected locations all around Tanzania (Phase II).

Package V: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court

buildings which will be built in four (4) selected locations all around Tanzania (Phase II)

Package VI: consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in six (06) selected locations all around Tanzania (Phase II)

Package VII: Consultancy service to update the existing design (redesign) and drawings (Phase I) and supervise the construction work for the proposed subordinate court buildings which will be built in ten (10) selected locations all around Tanzania (Phase II).

7. The attention of interested Consulting firms is also drawn to Section III, paragraphs, 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers" Fourth Edition, November 2020 ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest.

8. The Consulting firm may associate with other firm(s) to enhance their qualifications but should indicate clearly whether the association is in the form of a joint venture and/or a sub-consultancy. In the case of a joint venture, all the partners in the joint venture shall be jointly and severally liable for the entire contract, if selected. Therefore, each member of JV shall independently meet the requirements of the evaluation criteria. The experience, technical & managerial capability of the Sub-Consultants shall not be evaluated to enhance the qualification of the Lead Firm or JV.

9. The Consulting firms will be selected in accordance with the Quality Cost Based Selection (QCBS) method set out in the Procurement Regulations.

10. Further information can be obtained at the address below during office hours from 08.00 to 15.30 hours Local time Monday to Friday, except on public holidays.

11. Expressions of Interest must be submitted online through TANEPS - <https://www.taneps.go.tz> on or before 14:00 Hrs Local time on 29th December 2022. The Expression of Interest will be opened promptly thereafter through TANEPS. The System would not allow any late submission of expression of Interest. The Client shall not be held liable for any delays due to system failure beyond its control. Even though the system will attempt to notify the Consulting firms of any updates, the Client shall not be liable for any information not received by the bidder. It is the Consultants' responsibility to verify the website for the latest information related to this selection process.

12. Attention is drawn to the Procurement Regulations requiring the Borrower to disclose information on the successful Consultant's beneficial ownership, as part of the Contract Award

Notice, using the Beneficial Ownership Disclosure Form as included in the Request for Proposals.

## Second Technical Assistance to the Water and Electricity Regulatory Entity (IRSEA)

**Project ID No.:** P151224

**Project Name:** Second Water Sector Institutional Development Project

**Country:** Angola

**Funding Agency:** World bank

**Last date for submission:** 23 Dec 2022

### Project Details:

REQUEST FOR EXPRESSIONS OF INTEREST

(CONSULTING SERVICES – FIRMS SELECTION)

Country: ANGOLA

SECOND WATER SECTOR INSTITUTIONAL DEVELOPMENT PROJECT (WSIDP-2)

Credit No. IBRD-87020/ IBRD-88760/ COFN-C1560

Project ID No. P151224

Assignment Title: SECOND TECHNICAL ASSISTANCE TO WATER AND ELECTRICITY REGULATORY ENTITY (IRSEA)

Reference No.: 15ACS1/IRSEA/UCP/22

The Government of Angola has received financing from the World Bank and French Agency for Development toward the cost of the Second Water Sector Institutional Development Project (WSIDP-2) and intends to apply part of the proceeds for consulting services.

The Consulting Services (“the Services”) are for the Second Technical Assistance to the Water and Electricity Regulatory Entity (IRSEA). The scope of the services includes:

- Supporting the Regulatory Entity in the implementation of the regulatory framework and its specific regulations for the water and sanitation sector;

- Supporting the Regulatory Entity in strengthening its capacities to fulfil its mandate;

- Developing an organizational structure appropriate to the Regulator’s attribution and competence;

- Reviewing and implementing a training program for the Regulator.

The duration of the assignment is thirty-six (36) months

The detailed Terms of Reference (TOR) for the assignment can be obtained at the address given below.

The Financial and Contract Management Unit (FCMU-WB/AFD) of the Ministry of Energy and Water (MINEA) now invites eligible consulting firms ("Consultants") to indicate their interest in providing the Services. Interested Consultants should provide information demonstrating that they have the required qualifications and relevant experience to perform the Services. The shortlisting criteria are: General relevant experience (core business, years in business); Specific experience in the field of the assignment and in similar regions/condition; Technical and managerial organization of the firm. Key Experts will not be evaluated at the shortlisting stage.

The attention of interested Consultants is drawn to Section III, paragraphs, 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers" revised November 2017 and August 2018 ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest

Consultants may associate with other firms to enhance their qualifications, but should indicate clearly whether the association is in the form of a joint venture and/or a sub-consultancy. In the case of a joint venture, all the partners in the joint venture shall be jointly and severally liable for the entire contract, if selected.

A Consultant will be selected in accordance with the QCBS method set out in the Procurement Regulations.

Further information can be obtained at the address below during office hours (i.e. 0900 to 1500 hours Angola Time).

Expressions of interest must be delivered in a written form to the address below (in person, or by mail, or by e-mail) by 23 December, 2022.

## Feasibility and Engineering Studies for the Rehabilitation of 1500ha (in each Province ) of irrigated Schemes

**Project ID No.:** P159052

**Project Name:** Angola Commercial Agriculture Development Project (PDAC)

**Country:** Angola

**Funding Agency:** World bank

**Last date for submission:** 19 Dec 2022

### Project Details:

REQUEST FOR EXPRESSIONS OF INTEREST (REOI)

CONSULTING SERVICES – FIRMS SELECTION

FEASIBILITY AND ENGINEERING STUDIES FOR THE REHABILITATION OF 1500HA (IN EACH PROVINCE) OF IRRIGATED SCHEMES ON PROVINCES OF CUANZA SUL, HUAMBO, BIÉ, HUÍLA AND LUNDA SUL

Ref: 306A/CS/2/CADP-22

The Government of Angola has received financing in the amount of US\$ 230 millions from the World Bank and the French Development Agency (AFD) to finance the the Commercial Agriculture Development Project (CADP), whose objective is to increase the productivity of commercial agriculture and market access for selected beneficiaries in the project areas, intends to apply part of this funding to contracting consulting firms for Feasibility and Engineering Studies for the Rehabilitation of 1500ha (in each Province ) of irrigated Schemes on Provinces of Cuanza Sul, Huambo, Bié, Huíla and Lunda Sul.

The specific objectives of the consultancy will consist of carrying out the feasibility study, engineering projects for the works (including preliminary design and execution project), specifications for the works and Terms of Reference for the contracting of inspection companies for each work, and projects management and maintenance of the projected works, making it possible to define more precisely the modalities of support for the development of irrigated agriculture, in terms of:

1. Choosing the perimeters to be rehabilitated;
2. Definition of technical rehabilitation modalities, in the form of executive engineering projects and management projects for the operation and maintenance of the rehabilitated and/or built facilities;

3. Definition of maintenance and exploitation modalities;

4. Proposing a management consultancy device to organizations benefiting from these infrastructures;

5. The area of intervention of the contract(s) will be in the Provinces already mentioned.

The service to be performed will be divided into 5 lots, (lot 1 - Cuanza Sul Province; lot 2 - Huambo Province; lot 3 - Province of Bié; lot 4 - Huila Province; & lot 5 - Lunda Sul Province) that will be awarded independently, according to the most advantageous proposals under the terms of the tender.

The consultants must indicate for which lot they are applying.

The duration of the consultancy, for each lot, will be 12 months and the estimate of man-month, for each lot, is 95.

The detailed Terms of Reference (TOR) for the can be obtained at the e-mail address given below.

Consultants may associate with other firms to enhance their qualifications, but should indicate clearly whether the association is in the form of a joint venture and/or a sub-consultancy. In the case of a joint venture, all the partners in the joint venture shall be jointly and severally liable for the entire contract, if selected.

The project invites eligible consulting firms ("Consultants") to express their interest in providing the Services. Interested Consultants must provide information demonstrating that they have the necessary qualifications and general and relevant and specific experience to perform the Services: (i) Experience in preparing irrigation projects for areas greater than 150ha, including drawing up a base of GIS data (ii) Experience in data collection, either for social identification of communities or for classification of agricultural typologies (value chains), (iii) Experience of working in Sub-Saharan Africa, in irrigation projects. (iv) Work experience in the area of studies of environmental and social safeguards. Key Experts will not be evaluated at the shortlisting stage.

The attention of interested Consultants is drawn to Section III, paragraphs, 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers" dated July 2016, revised November 2017, August 2018 and November 2020 ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest

According to the Financing Agreement between the Government of Angola and the World Bank, the Consultant will be selected in accordance with the QCBS method set out in the Procurement Regulations.

Further information can be obtained at the address below during office hours (8H30 – 15H00).

**Last date for submission:** 27 Dec 2022

**Project Details:**

THE UNITED REPUBLIC OF TANZANIA  
UNIVERSITY OF DAR ES SALAAM

MKWAWA UNIVERSITY COLLEGE OF EDUCATION  
REQUEST FOR EXPRESSION OF INTEREST (REOI)

Country: TANZANIA

Name of Project: Higher Education for Economic Transformation (HEET)

Credit No: IDA- 68870

Project ID No: P-166415

Assignment Title: PROVISION OF CONSULTANCY SERVICES FOR DESIGNING AND SUPERVISION OF THE CONSTRUCTION OF THE PROPOSED STUDENTS' HOSTEL BUILDING, MULTIMEDIA AND SPECIAL NEEDS EDUCATION BUILDING, SCIENCE BUILDING; AND DESIGN REVIEW AND SUPERVISION OF THE CONSTRUCTION OF PHYSICS LABORATORY BUILDING AT MKWAWA UNIVERSITY COLLEGE OF EDUCATION

Reference No.: PA/058/WB-HEET-P-166415/259782/2021-23/C/02

This request for Expression of Interest follows the General Procurement Notice for this Project that appeared in the United Nations Development Business (UNDB) Issue No. WB-OP0015674 of 28.11.2021.

The Government of the United Republic of Tanzania through the Ministry of Education, Science and Technology (MoEST) has received financing from the World Bank toward the cost of the Higher Education for Economic Transformation Project (HEET) in Tanzania, and intends to apply part of the proceeds for consulting services.

The consulting services ("the Services") include carrying out Design and Construction Supervision of four (4) Buildings at Mkwawa University College of Education. The total duration for the entire assignment shall be thirty six (36) calendar months where by six months will be for design works, three months for procurement of Contractor, eighteen (18) months for construction and twelve months for defect liability period. The estimated level of effort is 85.75 Staff-Months.

The detailed Terms of Reference (TOR) for the assignment are available in the following website [www.taneps.go.tz](http://www.taneps.go.tz) and [www.muca.ac.tz](http://www.muca.ac.tz) or can be obtained at the address given below.

The Principal of Mkwawa University College of Education now invites eligible consulting firms ("Consultants") to indicate their interest in providing the services. Interested Consultants should provide information demonstrating that they have the required qualifications and relevant experience to perform the Services. The shortlisting criteria are:

Core business and 10 years in business

B. Relevant similar experience, which should specifically include the below;

Relevant similar experience, which should specifically include at least three (3) assignments of the same complexity and magnitude in the past ten years (2012-2022) - Information to be provided should include name of - assignments, names and full contact addresses of the Clients, contract value (in equivalent US dollars) and period (dates) of execution of assignments - Information to be provided should include name of assignments, names and full contact addresses of the Clients, contract value (in equivalent US dollars) and period (dates) of execution of assignments; and

Demonstration of experience of work in similar conditions.

C. Technical and Managerial Capability of the Firm

The Consultant must provide the structure of the organization, general qualifications and number of Key staffs. (Do not provide CV of the Key staff. Key Experts will not be evaluated at the shortlisting stage).

Attention of interested Consultants is drawn to Section III, paragraphs, 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers" of November 2020 ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest.

Consultants may associate with other firms to enhance their qualifications, but should indicate clearly whether the association is in the form of a joint venture and/or a sub-consultancy. In the case of a joint venture, all the partners in the Joint Venture (JV) shall be jointly and severally liable for the entire contract, if selected. Therefore, each member of JV shall independently meet the requirements of the evaluation criteria. The experience, technical and managerial capability of the Sub-Consultant shall not be evaluated to enhance the qualifications of the Lead Firm or JV.

A Consultant will be selected in accordance with the Quality and Cost Based Selection (QCBS) method set out in set out in the Procurement Regulations.

Further information can be obtained at the address below during office hours 0800 - 1600 Hours East African Time on Monday to Friday inclusive except on public holidays.

Expressions of interest should be submitted online through Tanzania National Electronic Procurement Systems (TANePS) ([www.taneps.go.tz](http://www.taneps.go.tz)) on or before 27th December, 2022 at 1000 Hour's East Africa Time. The Client shall not be held liable for any delays due to system failure beyond its control. Even though the system will attempt to notify the Consultants of any updates, the Client shall not be liable for any information not received by the Consultants. It is the Consultants' responsibility to verify the website for the latest information related to this selection process. Expression of Interests will be opened promptly through TANePS.

THE REVOLUTIONARY GOVERNMENT OF ZANZIBAR

PRESIDENT'S OFFICE FINANCE AND PLANNING

REQUEST FOR EXPRESSIONS OF INTEREST

(CONSULTING SERVICES – FIRM SELECTION)

COUNTRY: UNITED REPUBLIC OF TANZANIA

NAME OF PROJECT: BOOSTING INCLUSIVE GROWTH FOR ZANZIBAR: INTEGRATED  
DEVELOPMENT PROJECT (BIG-Z).

Loan No: IDA - 69140 –TZ

Assignment Title: Consulting Services for Integrated Tourism Development, Infrastructure and  
Livelihood Improvement in Unguja, Zanzibar (Chwaka, Makunduchi and Nungwi villages)

Reference No: TZ-POFP-249494-CS-QCBS

This request for expression of interest follows the General Procurement Notice for the  
Boosting Inclusive Growth of Zanzibar: Integrated Development Project  
(BIG-Z) that appeared in the UN Development Business online No. WB-P811333—8 of 27-08-  
2021

The United Republic of Tanzania has received financing from the World Bank toward the cost of  
the Boosting Inclusive Growth for Zanzibar Project (BIG-Z), and intends to apply part of the  
proceeds for consulting services.

The Consultancy Services (“the Services”) includes to undertake the planning and implementation of physical investments, livelihood support, tourism product development, and capacity building activities. Using participatory methods, develop Integrated Tourism Development Plans for each village that provide a framework for physical investments, livelihood support, tourism product development and capacity building; Prioritize physical investments, create spatial plans, detailed engineering and architectural designs, environmental and social safeguards due diligence, prepare bidding documents, and supervise construction for small infrastructure investments; Design and implement a Tourism Development Support Program, including a livelihood support program to build local supply chains, develop and deliver skills training and entrepreneurship development activities; Provide capacity building support to develop destination partnerships and adopting sustainable tourism standards and practices; Provide technical assistance for tourism product development, including branding, management models and training for new tourist attractions and assets, and sustainable waste management; Ensure strong coordination between community and stakeholders within each village, across the three villages, with other tourism centers in Zanzibar and with relevant central government agencies on tourism – related matters.

The assignment shall be for thirty-six (36) calendar months: 12 months for Phase 1 and 24 months for Phase 2.

Phase 2 includes 12 months for construction of physical works and a 12-month defects liability period. Tourism Development Support activities will be implemented over the entire 24-month period.

The detailed Terms of Reference (TOR) for the assignment can be found at the following website: [www.mofzanzibar.go.tz](http://www.mofzanzibar.go.tz) or upon request to the following email: [bigzpmt@gmail.com](mailto:bigzpmt@gmail.com)

The Principal Secretary, President’s Office Finance and Planning now invites eligible consulting firms (“Consultants”) to indicate their interest in providing the services. Interested Consultants should provide information demonstrating that they have the required qualifications and relevant experience to perform the services. The shortlisting criteria are:

A: Core business and 10 years in business.

B: Relevant similar experience as specified below

At least ten (10) years of experience in the urban infrastructure development sector including relevant experience in at least two global regions (one of which should be in developing countries);

At least ten (10) years of experience in the design and implementation of livelihood support programs in urban or rural areas of developing countries;

At least five (5) years of experience in tourism product development and marketing for natural and cultural tourism, including at least three (3) projects in developing countries;

Experience in urban designing, architectural designing, landscape and streetscape design, improvement of open spaces, environmental planning, conservation planning, adaptive re-use of historic buildings, placemaking etc. through a participative approach.

Demonstrated experience in environmental and social safeguards due diligence and supervision of Environmental and Social Management Plans (ESMPs).

Successful completion of similar assignments involving integrated infrastructure development and livelihood support in developing countries will be a clear advantage.

C: Technical and managerial capability of the firm (Provide only the structure of

the organization, general qualifications, and number of key staff). Do not

provide CV of the key staff. Key Experts will not be evaluated at the shortlisting stage.

The attention of interested consultants is drawn to section III, paragraph 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers" Fourth Edition, November 2020 ("Procurement Regulations"), setting forth the World Bank's Policy on conflict of interest.

17	Tender Last Selling Date	01.01.2023 During Office Hours		
18	Tender Closing Date and Time	02.01.2023 at 11.00 A.M. (Tenders can be submitted on any date before closing time during Office Hours)		
19	Tender Opening Date and Time	02.01.2023 at 11.30 A.M		
Name & Address of the Office (s)				
20	Selling Tender (Principal)	Directorate of Purchase, BPDB, WAPDA Building (9th floor) 12-Motijheel C/A, Dhaka.		
	Selling Tender Document (Others)	Not Applicable		
	Receiving Tender Document	Directorate of Purchase, BPDB, WAPDA Building (9th floor) 12-Motijheel C/A, Dhaka.		
	Opening Tender Document	Directorate of Purchase, BPDB, WAPDA Building (9th floor) 12-Motijheel C/A, Dhaka.		
21	Place/Date/Time of Pre-Tender Meeting (Optional)	Not Applicable		
<b>INFORMATION FOR TENDERER</b>				
22	Eligibility of Tenderer	Tenderers from all countries except the countries specified in TDS.		
23	Brief Description of Goods or Works	Procurement of MOV Actuators for STG, HRSG, CW System etc. of Shahjibazar 330 MW CCPP, BPDB, Hobiganj, Bangladesh.		
24	Brief Description of Related Services	As per Tender Document		
25	Tender Document Price	Non refundable BD Taka 3,000.00 (Three thousand) only in the form of Pay Order in favour of Director, Directorate of Purchase, BPDB, Dhaka.		
26	Lot No	Identification of Lot	Location	Tender Security Amount
	-	Procurement of MOV Actuators for STG, HRSG, CW System etc. of Shahjibazar 330 MW CCPP, BPDB, Hobiganj, Bangladesh.	Shahjibazar 330 MW CCPP, BPDB, Hobiganj, Bangladesh.	USD 5,000.00 or BDT 5,15,000.00
Completion Time				
As mentioned in the tender document				
<b>PROCURING ENTITY DETAILS</b>				
27	Validity of Tender and Tender Security	150 & 178 days respectively from Tender opening date		
28	Name of Official Inviting Tender	Rubina Haque		
29	Designation of Official Inviting Tender	Director		
30	Address of Official Inviting Tender	Directorate of Purchase, BPDB, WAPDA Building (9th floor), 12-Motijheel C/A, Dhaka.		
31	Contact details of official Inviting Tender	Tel. 02223383081 e-mail: dir.purchase@bpdb.gov.bd		
32	Special Instruction	The Purchaser reserves the right to accept any tender or to annul the Tender Process, or to reject any or all tenders at any time prior to contract award.		
This Tender will be performed according to "The Public Procurement Rules-2008".

**Procurement of Works for the Repair of FAPs and FGPs in Uzgen, Kara -Suu and Nookat districts of Osh oblast within the framework of the AF PPMS.**

**Project ID No.:** P163592

**Project Name:** CASA1000 Community Support Project - Kyrgyz Republic

**Country:** Central Asia

**Funding Agency:** World bank

**Last date for submission:** 26 Dec 2022

**Project Details:**

Special Procurement Notice

Request for Bids

Small works

(Single envelope bidding procedure)

Country: Kyrgyz Republic

Name of the project : Additional funding for the CASA -1000 Local Community Support Project (PCSP AF) .

Contract name : Procurement of works for the repair of FAPs and FGPs in Uzgen, Kara-Suu and Nookat districts of Osh oblast under the AF PPMS.

Loan#/Credit#/Grant#: Credit no.: 6219- KG ; Grant No: D 294- KG / TF 0 A 6612

ZPKZ No. ARIS-CASA-CSP-AF-WORKS-RFB-2022-15\_Retender

The Kyrgyz Republic has received financial assistance from the World Bank to cover the costs of the Additional Financing of the CASA-1000 Local Community Support Project (AF PPCP) and intends to use part of the funds to make payments under the Contract for the Procurement of Works for the Repair of FAPs and FGPs in Uzgen, Kara -Suu and Nookat districts of Osh oblast within the framework of the AF PPMS. Under these Contracts, the Borrower will make

payments using the direct payment method as defined in the World Bank Disbursement Guidelines for Investment Project Financing.

The Community Development and Investment Agency of the Kyrgyz Republic hereby invites eligible bidders to submit bids in sealed envelopes for capital repairs:

Lot No. 1 - Procurement of works for the repair of FGP No. 20 in the village of Kara-Tash, village of Kara-Tash, Nookat district, Osh region:

Lot No. 2 - Procurement of works on the repair of the FAP in the village of Kyzyl-Tuu, a / o Papan, Kara-Suu district, Osh region:

Lot No. 3 - Purchase of work on the repair of the FAP in the village. Kors-Etti A/A Iyri-Suu, Uzgen district, Osh region:

Lot No. 4 - Procurement of works for the repair of the building of the FAP in the village of Kosh-Eter, a/okmotu Salam-Alik, Uzgen district, Osh region:

Bidding will be conducted through international competitive procurement using a Request for Proposals ( RFB ) as specified in the World Bank's Procurement Regulations for HMO Borrowers set out in the World Bank's Procurement Regulations for FIP Borrowers issued in November 2020. ("Purchase Rules") and is open to all eligible bidders as defined in the Purchasing Rules.

Interested eligible participants may obtain additional information from the Community Development and Investment Agency of the Kyrgyz Republic, Executive Director, Naspekov Mars Damirovich, e-mail: [zakupki@aris.kg](mailto:zakupki@aris.kg) (with a copy to: [iturdaliev@aris.kg](mailto:iturdaliev@aris.kg) , [mismailova@aris.kg](mailto:mismailova@aris.kg) and [njeenbekov@aris.kg](mailto:njeenbekov@aris.kg) ) and study the tender documentation during working hours from 09-00 to 18-00 at the address below.

Interested eligible Bidders can obtain a full package of Tender Documents in English and/or Russian after registration/authorization on the ARIS website [www.aris.kg](http://www.aris.kg) .

Bids must be delivered no later than 16:00 (Bishkek time) on December 26, 2022. Trading in electronic form is not provided. Tender proposals submitted after the specified deadline will be rejected . Bids will be opened in the presence of members of the tender commission and authorized representatives of bidders, and all those who wish to be present in person at the address indicated in ITB 25.1, Section II "Bid Information Card" at 16-05 hours (Bishkek time) December 26, 2022.

All bids/offers must be accompanied by a warranty declaration for a competitive offer ;

ADDRESS: COMMUNITY DEVELOPMENT AND INVESTMENT AGENCY OF THE KYRGYZ REPUBLIC;

## Innovative Construction Materials Changing Building Landscape – Part I

Ultra-modern building materials are changing the way construction is done. Today's materials are environmentally friendly, reliable and durable, while airy and light-weight. We would be presenting 15+ such materials in this multi part article:

Modern materials science has advanced noticeably in recent years. Today, there are truly revolutionary new building materials on the market. Innovative synthetic materials are being created — building materials that are lighter, stronger, and more environmentally friendly than traditional materials. These advances stimulate new architecture, totally different from what we are used to and more environmentally friendly.

### Innovative materials: solving past problems

When cement cracks, it is a much more serious problem than many people think. It's not just about aesthetics, although that is certainly important. No, this problem is structural: water will get into the crack and begin to undermine the integrity of the concrete. In an environment with unstable temperatures, this problem is exacerbated by the effect of freezing and unfreezing. The water in the crack expands during freezing winters, pushing each side of the crack a little further apart. And then, when the ice unfreezes in spring, the water will seep deeper into the cement, deepening the crack and undermining the structural integrity of the building.

But what if concrete could heal itself? Or asphalt, or even metal? It would be possible to save billions of pounds on repairs and restoration work alone, not to mention reducing harm to the environment that comes from replacing damaged materials.

Some modern building materials will find their place, perhaps, in small niches, but a number of innovative construction materials have the potential to become widely used. Buildings with traditional brick and concrete structures will gradually become a thing of the past because humanity's requirements are obvious: we need eco-friendly, energy-efficient, durable, and lightweight buildings that will look nice and be highly functional at the same time.

## **The most innovative construction materials**

It has been our endeavor to collect & present the most interesting and innovative materials in construction that are already in use and some that are promising concepts being tested within pilot projects. A number of building materials are not necessarily brand new ones — that is, the technology was developed and tested a long time ago, but it is still used selectively and isn't widespread. New building materials are used both for decorative finishes and as core materials in building structures.

### **TRANSPARENT WOOD**

The invention of the newest eco-friendly material — transparent wood — was announced back in 2016. However, it was only in 2020, that the scientist, who invented a method to make wood transparent in collaboration with a team from the University of Maryland at College Park, stated that the tests were completed and that they had achieved a stable result. Transparent wood is at least 5 times stronger and lighter than glass, as well as being more thermally efficient. It is these characteristics that make it an interesting potential replacement for plastic or glass windows. Other advantages: the raw material is renewable and eco-friendly. The balsa tree grows quickly, with a tree growing to adulthood in just 5 years. Production costs are also much lower than in glass production, where there is a noticeable carbon footprint due to the high temperatures required and electricity used in the process.

Transparent wood is quite flexible, as it contains natural cellulose. In order to achieve transparency, balsa wood is soaked in a special solution and then epoxy resin is added to the structure. Transparent wood or wooden glass can be used instead of traditional glass units or other elements in building structures that have to be transparent, but also durable, eco-friendly, and energy-efficient.

### **CARBON FIBRE**

Carbon fibre, is truly a material of the future – albeit one that has long been used in different sports! However, this innovative material has been more and more frequently used in construction, an industry that often demands a combination of strength and lightness. Carbon fiber is 75% lighter than iron and 30% lighter than aluminium. It is used to reinforce traditional building materials to improve their strength — bricks, reinforced concrete blocks, wooden structures — as well as to reduce the thickness of panels and, accordingly, lower their weight.

Carbon fibre reinforcement for concrete also provides excellent thermal insulation. The only disadvantage that restricts its widespread application is the high cost of the material.

## **SENSITILES — DECORATIVE ACRYLIC TILE**

Innovative building materials are not always materials with innovative physical properties like strength or safety. These can also be materials which integrate technology to deliver spectacular decoration and the implementation of the most extravagant design ideas. A new type of finishing building material is a sensitive tile with acrylic fiber which reacts to your movements, touch, or light sources. The optical fiber transmits light and reacts: the tile can twinkle, light up, catch and scatter neighboring colours on its surface. Decorating with this material provides new opportunities in architecture and interior design.

## **SELF-HEALING CONCRETE**

The term “self-healing concrete” sounds more than a little fantastical. Back in 2015, inventor Henk Jonkers from Delft University of Technology showed an innovative method to repair cracks in concrete using bacteria. The principle of the technology is simple: capsules containing specific bacteria and nutrients for them were added to the concrete: the bacteria were activated as soon as water hit. Cracked concrete was rebuilt with moisture, filled with limestone produced by the bacteria.

In addition to this bio-technology, there is another alternative from Korean researchers in which capsules of a certain polymer are added to concrete. Under the influence of moisture and sunlight, it also begins to react, swelling and filling the crack.

Traditional concrete is a very reliable and well-established building material, but it loses its properties when cracked. Many materials science specialists around the world are working on giving the base material a modern upgrade.

Recently, American scientists from Worcester Polytechnic Institute (WPI) have also presented evidence that they have developed bio-concrete. In this case, an enzyme is added to react with CO<sub>2</sub>-releasing calcium carbonate crystals — their properties are similar to concrete. As a result, all the cracks are filled, and the strength of the concrete strength improves. This method can restore a 1 mm crack in one day.

Another development by scientists from the University of Colorado is based on the photosynthesis of bacteria. T Bioconcrete is made up of a mixture of cyanobacteria –

photosynthesising bacteria – gelatin and sand. They react to water and increase in size to fill any cavities.

## AEROGEL

The hardest and the lightest material in the world is made of 99.8% air!

This synthetic porous ultralight material is derived from a gel in which the liquid component of the gel is replaced by a gas. The result is a very solid body with extremely low density and low thermal conductivity. To the touch, it resembles brittle polystyrene foam. Aerogels can be made of a variety of chemical compounds. It was first produced in 1931 as the brainchild of Samuel Stephens Kistler. He argued that he could replace liquid with gas without shrinking the structure. The first aerogels were made of silica gels. Kistler's later work concerned aerogels based on aluminium oxide, chromium oxide and tin dioxide. Carbon aerogels were first developed in the late 1980s. A special feature of aerogels is that they can have a lower thermal conductivity than that of the gas they contain. This material is an excellent thermal insulator, so it is widely used for environmentally friendly and efficient thermal insulation on an industrial scale. Due to the high and fine porosity of the structure, aerogels can be used as a collecting matrix for the smallest dust particles.

To be continued....
