LOT No. DS12B

Part – 1: Construction Phase: Improvement of Dhaka - Sylhet National Highway (N2) into 4-Lane Highway with Service Lanes on Both Side from 7-Armed Police

Battalion Headquarters, Lalabazar to Peer Habibur Rahman Chattar (Ch 211+900 to 222+600 km)

Part – 2: Maintenance Phase: Performance Based Maintenance of Improved Dhaka - Sylhet National Highway (N2) for 6 Years from 7-Armed Police Battalion Headquarters, Lalabazar to Peer Habibur Rahman Chattar (Ch 211+900 to 222+600 km)

Which includes, but is not limited to the following works: • Flexible Pavement works with Modified Bitumen • Earthwork in Road Embankment and Slope Protection • Rigid Pavement in Service Lanes, at Bus Bays • Rail Overpass – 1 No. • Culverts – 13 Nos. Misc. works items of Sign Signal, Guide Post, Road Marking etc

Completion time of the works from the commencement date is 1,095 days. Completion time for the Maintenance Phase works (Performance Based Maintenance works) from the end of defect notification period for the Lot is 2,190 days.

3. Open Competitive Bidding (international advertisement) will be conducted in accordance with ADB's Single-Stage: Two Envelope bidding procedure and is open to all Bidders from eligible countries as defined in Bidding Document.
4. Only eligible Bidders with the following key qualification should participate in this bidding:

LOT No. DS-12B

Average Annual Construction Turnover - The Bidder shall have minimum Average Annual Construction Turnover of USD 35 million (Thirty-five million) for the contract calculated as total certified payments received for contracts in progress or completed within the last five (5) years.

Financial Resources - Requirement of minimum amount of liquid assets of the Bidder shall be USD 5.8 million (Five million Eight Hundred thousand) for the contract.

Construction Experience - Participated in at least one (1) Contract that has been successfully or substantially completed within the last seven (7) years and that is similar to the proposed highway standard road and structure works, where the value of the Bidder's participation exceeds USD 56 million (Fifty-six million) for the contract. The similarity of the Bidder's participation shall be based on the physical size, nature of works, complexity, methods, technology, or other characteristics as described in Section 6, Employer's Requirements. The complete eligibility and qualification requirements are stipulated in Section 3: Evaluation and Qualification Criteria.

The qualification criteria are more completely described in the Bidding Document.

5. To obtain further information and inspect the Bidding Documents, Bidders should contact:

Attention: The Project Director (ACE, RHD),
SASEC Dhaka-Sylhet Corridor Road Investment Project
Roads and Highways Department

Telephone: +8802 41081123

Address: PD Office, SASEC Dhaka-Sylhet Corridor Road Investment Project,
Roads and Highways Department, Sarak Bhaban, Tejgaon, Dhaka-1208,
Bangladesh

E-mail: pd.dhakasylhet.rhd@gmail.com

6. To purchase the Bidding Document in English, eligible Bidders should:

- Write to the address above requesting the required Bidding Document by quoting the contract number and title and during normal office hours on all working days up to the day before the submission deadline
 - Pay a nonrefundable fee of Tk. 10,000 in cash. The Bidding Document may also be sent via courier for an additional fee of Tk. 50,000 for overseas delivery only. No liability will be accepted for loss or late delivery of the Bidding Document.
7. A Pre-Bid meeting will be held at the office of the Chief Engineer's Conference Room, Sarak Bhaban, Tejgaon, Dhaka, Bangladesh on 27 April 2023 at 11:00 hours (Bangladesh Standard Time).

8. Deliver your bid:

- to the address above
- on or before 23 May 2023 at 14:00 hours (Bangladesh Standard Time)
- along with a Bid Security in the amount as stated in the Bidding Document (Bid Data Sheet). Late Bids shall be rejected.

9. The Technical Proposal of the bids will be opened at 14:15 hours (Bangladesh Standard Time) at the address above on 23 May 2023 in the presence of the Bidders' representatives who choose to attend. The price proposal of responsive Bids will be opened in presence of the Bidder's authorized representative who choose to attend at the time, date and address to be advised by the Employer after approval of the Technical Bid Evaluation Report by the Employer with no objection from ADB.

10. The RHD will not be responsible for any cost or expense incurred by Bidders in connection with the preparation or delivery of bids.

11. The Employer reserves all the rights to accept any bid or to reject any or all bids without assigning any reasons whatsoever

12. The invitation for bids (IFB) is available in the Roads and Highways Department (RHD), Central Procurement Technical Unit (CPTU) and Asian Development Bank (ADB) websites at www.rhd.gov.bd, www.cptu.gov.bd and www.adb.org, respectively.

Construction of building & other facilities at kombolcha polytechnic college

Project ID No.: P163399

Construction of shelter buildings and fences for hydrometric station equipment

Project ID No.: P166526

Project Name: Connectivity for Rural Livelihood Improvement Project

Country: Madagascar

Funding Agency: World Bank

Last date for submission: 09/05/2023

Project Details:

No. 62- TRAV-PACT/CPGU-2023

Construction of shelter buildings and fences for hydrometric station equipment for the RN44 at Ranofotsy Bembary at PK78 and at Andranofotsy at PK 117

1. The Government of the Republic of Madagascar has requested funding from the World Bank to finance the Transport Connectivity Support Project (PACT), and intends to use part of this credit to make payments under the contract for the construction of shelter buildings and fencing of hydrometric station equipment for the RN44 at Ranofotsy Bembary at PK78 and at Andranofotsy at PK 117.

2. The Transport Connectivity Support Project under the supervision of the Ministry of Public Works (MTP) invites closed bids from eligible bidders who meet the qualifications required to carry out this work in a single lot.

3. This work is carried out without interrupting traffic.

4. The period of execution of the work is four months (4) months

5. The contract is made up of a single lot. The partial offer will not be considered and will be declared non-compliant.

6. A site visit is organized on Tuesday, April 25, 2023. The meeting place in Ambosary at PK 60, at 10:00 a.m. (local time). Site visits are highly recommended. Visiting costs are the sole responsibility of the tenderer.

7. The procedure will be conducted by national competition using an Invitation to Tender (AO) as defined in the "Procurement Regulations for Borrowers requesting the Financing of Investment Projects (FPI), applicable to Goods, Works, Services Other than Consulting Services and Consulting Services" of the World Bank, July 2016 version and its updates, and open to all bidders from eligible countries as defined in the Procurement Regulations.

8. Interested and eligible Bidders can obtain information from the Emergency Management Prevention and Support Unit (CPGU) and read the Call for Tenders file at the address mentioned below from 8:00 a.m. at 4:00 p.m. local time during working hours.

9. Tender documents may also be obtained, free of charge, by e-mail at the request of the tenderer.

10. Tenders must be delivered to the address below no later than Tuesday, May 09, 2023 at 10 a.m. local time. Electronic submission of bids will not be permitted. Any tender received after the expiry of the deadline for submission of tenders will be rejected. The tenders will be opened in the presence of the representatives of the tenderers and the persons present at the address mentioned below on Tuesday, May 09, 2023 at 10 a.m. local time.

11. The Bid must be accompanied by a Bid Security in the form of a bank guarantee according to the model presented in Section IV – Bid Forms. In accordance with the standard guarantee included in Section IV Bid Form, Model Bid Guarantee (bank guarantee) or Bank Check payable to Transport Connectivity Support Project for an amount of: two million of Ariary (2,000,000 Ar).

12. All Offers must be accompanied by a Statement on Sexual Exploitation and Abuse (SEA) and/or Sexual Harassment (SH).

Reconstruction of the existing 72.43km two-lane, single carriageway, rural arterial highway

Project ID No.: GY1025

Project Name: Reconstruction of the Soesdyke-Linden Highway

Country: Guyana

Funding Agency: IsDB

Last date for submission: 16/10/2024

The Co-operative Republic of Guyana
Reconstruction of the Soesdyke-Linden Highway
TRANSPORTATION SECTOR
GENERAL PROCUREMENT NOTICE
Mode of Financing: Loan
Financing No. GY1025

The Government of the Co-operative Republic of Guyana has applied for financing in the amount of US\$200M equivalent from the Islamic Development Bank toward the cost of the reconstruction of the Soesdyke-Linden Highway, and it intends to apply part of the proceeds to payments for goods, works, related services and consulting services to be procured under this project. This project will be jointly financed by the Government of Guyana.

The project will include the following components:

1. The reconstruction of the existing 72.43km two-lane, single carriageway, rural arterial highway.
2. Design and construction supervision consultancy for the updating of preliminary project designs, assisting with the tendering and evaluation process, supervision of the construction and the provision of capacity building support to MoPW Project Management Unit.

Procurement of contracts financed by the Islamic Development Bank will be conducted through the procedures as specified in the Guidelines for The Procurement of Goods, Works and Related Services under Islamic Development Bank Project Financing (April 2019), and is open to all eligible bidders as defined in the guidelines. Consulting services will be selected in accordance with the Guidelines for the Procurement of Consultant Services under Islamic Development Bank Project Financing (April 2019).

Specific procurement notices for contracts to be bid under the Islamic Development Bank's international competitive bidding (ICB) and for contracts for consultancy services will be announced, as they become available, in IsDB Website, the United Nations Development Business (UNDB) Website, the Ministry of Public Works Website and in local newspapers.

Prequalification of contractors and the shortlisting of consultancy firms will be required for the following contracts:

1. The reconstruction of the existing 72.43km two-lane, single carriageway, rural arterial highway.
2. Design and construction supervision consultancy.

Interested eligible firms and individuals who would wish to be considered for the provision of goods, works and consulting services for the above-mentioned project, or those requiring additional information, should contact the Beneficiary at the address below.

Construction Supervision Services for Environmental Infrastructure Projects of BASK

Project ID No.: P161915

Project Name: Sustainable Cities Project 2

Country: Turkey

Funding Agency: World Bank

Last date for submission: 18/05/2023

Project Details:

BALIKESIR WATER AND SEWERAGE ADMINISTRATION (BASK)
REQUEST FOR EXPRESSIONS OF INTEREST
(CONSULTING SERVICES – FIRMS SELECTION)

Sustainable Cities Project 2- Additional Financing (SCP2-AF)
(Balikesir BASK - C1)

Project No: 170612

Assignment Title: Consultancy Services for Design Review, Preparation of Bidding Documents, and Construction Supervision Services for Environmental Infrastructure Projects of BASK.

Reference No: BASK - C1

ILBANK (hereinafter called “Borrower”) has received financing from the International Bank for Reconstruction and Development (IBRD) (the “Bank”) in the form of, a loan (hereinafter called “Loan”) toward the cost of Sustainable Cities Project 2 – Additional Finance (SCP2-AF), and intends to allocate a part of the Loan to Balikesir Metropolitan Municipality, Balikesir Water and Sewerage Administration (BASKI) (hereinafter called Client) through Sub-Loan. The Client intends to apply a portion of the proceeds of this Sub-Loan to eligible payments for consulting services.

Consultancy Services will include the design review of existing designs and preparation of final designs, preparation of tender package and bidding documents, providing technical support to prepare bid evaluation reports, and performing construction supervision (hereinafter called “Services”) for Environmental Infrastructure Projects of BASK.

The above Services are related to the following proposed investment:

- Construction of Ayvalık Sarımsaklı Wastewater Pump Station Displacement and Renewal of the Collector Lines Project.

The estimated duration of services is 35 (thirty-five) calendar months including Defects Liability Period of the construction works which is 12 months.

1. The Pre-Construction phase which has 7 (seven) calendar months will cover the following services.

Activity 1. Engineering design review and update.

Activity 2. Preparation of bidding documents for civil works including mechanical and electrical works; and

Activity 3. Technical assistance and support during the bidding procedure.

All activities from (1) to (3) shall be performed and paid in lump-sum basis.

2. The During & After Construction phase has the following activities.

Activity 1. Support to BASK during supervision of construction works and after successful completion construction phase, Consultant will assist BASK through the temporary acceptance which are planned for the following 16 (sixteen) calendar months,

Activity 2. Consultant will continue its services aiming to support the BASK during the defects liability period (DLP) which will cover the following 12 months that will eventually end-up with the final acceptance of the construction, supply, and installation works.

All activities from (1) to (2) shall be performed and paid in Time Based basis.

The total period of time-based services will be $16+12= 28$ calendar months.

For detailed information, Terms of Reference (ToR) for the above services can be reached at

BASK Web site: <https://balsu.gov.tr/index.php?dys=0&sid=45>

<https://balsu.gov.tr/index.php?ihale=0&sid=60>

The Client invites eligible consulting firms ("Consultants") to indicate their interest in providing the above-mentioned Services. Interested consultants should provide information demonstrating that they have the required qualifications and relevant experience to perform the Services.

The following information is required to be provided by interested consulting firms. In case of a Joint Venture all members should provide the information individually:

- Company information: name, status, address, telephone number, facsimile number, year of establishment, contact person for the project,
- Details of experience in similar assignments undertaken within last ten years, including the value of consulting services and value of works, the scope of works, location, number of staff involved in the contract, name of the Client, name of partners for contract execution and share of services, source of financing, type of services provided, contract commencement and completion dates, a brief description of the contract.

The shortlisting criteria are:

General experience:

1. At least 10 years' of general experience of as core business in Consultancy Services prior to the deadline for submission of applications prior to deadline for submission of interests;
2. Experience in successful completion of projects financed by international financing institutions; preferably under the World Bank finance, within last 10 years prior to deadline for submission of interests

Specific Experience:

1. Experience in design/design review, preparation of bidding documents and construction supervision services for the construction of environmental infrastructure projects such as

wastewater/sewage/stormwater networks/collector lines etc. that are similar to the required Services defined above in terms of their size and complexity within the last 10 years;
2. Experience in the region (Türkiye) and knowledge of local standards and regulations.

Administrative and Human Resources Capacity:

1. The Consultants should demonstrate availability of and/or access to the key experts for the performance of the services described in the TOR document,
2. The Consultants should demonstrate sound administrative and financial capacity.

Key Experts will not be evaluated at the shortlisting stage. The Client satisfaction and past performance of the Consultants in similar works will be considered in the ranking of the Consultants when establishing the shortlist.

The attention of interested Consultants is drawn to Section III, paragraphs, 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers" (July 2016, Revised November 2017 and August 2018) ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest.

A consultant will be selected in accordance with Quality and Cost Based Selection method as set out in the World Bank's Procurement Regulations for IPF Borrowers: Procurement in Investment Project Financing (Goods, Works, Non-Consulting and Consulting Services) (July 2016, Revised November 2017 and August 2018).

Consultants may associate with other firms in the form of a joint venture or a sub consultancy to enhance their qualifications. In case of a Joint Venture (JV), all members of the JV shall be evaluated jointly for the purpose of short listing and shall be jointly and severally liable for the assignment and shall sign the contract jointly in case of award is made to that JV group. Interested Consultants should clearly indicate the composition of their "association", role of lead partner, each partner and nominated sub-consultants (if any) in their application. Unclear expression of interests in terms of "in association with" and/or "in affiliation with" etc. without indicating the status of the partnership and designation of the lead partner may not be considered for short listing. The full commercial names of all Consultants and their country of registration should be specified in the expression of interest.

Interested consultants may obtain further information from BASK through the e-mail address provided below, during office hours from 10.00 am to 16.00 hours (Türkiye time), 15/05/2023 until 16.00 prior to the due date and time for submission of the Expression of Interest.

Expressions of interest to be clearly marked "Consultancy Services for Design Review, Preparation of Bidding Documents, and Construction Supervision Services for Environmental Infrastructure Projects of BASK". Expressions of interest (EOI) must be delivered in a written form (one hard copy and digital copy) to the address and e-mails below by 18/05/2023 until 17:30 hours Türkiye time. Expressions of interest may be delivered by hand or by post or by courier by the deadline specified above. The Client reserves the right to reject the applications received after the above-referenced date.

Consulting services for development of detailed design documentation and provision of design supervision

Project ID No.: P162263

Project Name: Water Services and Institutional Support Project

Country: Uzbekistan

Funding Agency: World Bank

Last date for submission: 28/04/2023

Project Details:

The Republic of Uzbekistan has received a loan from the International Development Association to fund the Water Services and Institutional Support (WASIS) Project, and intends to use a portion of the funds to hire an international consulting firm (hereinafter referred to as the "Consultant") to provide the following consulting services under the "Reconstruction and expansion of the sewerage systems in Nukus, Takhiatash and Khojeyli cities of the Republic of Karakalpakstan" project

KSP/QCBS/01 "Consulting services for development of detailed design documentation (Detailed engineering design) and provision of design supervision"

The Consultant will provide services to Uzsuvtaminot JSC for the development of detailed design documentation (detailed engineering design) and designer's supervision of facilities the reconstruction and construction of which is envisaged by the Feasibility Study of the above-mentioned project. Developed design documentation must meet all standards of international construction and national legislation in the field of construction. The tasks to be carried out by the Consultant shall be described in more detail in the Terms of Reference.

The contracting organization for the execution of this assignment is Uzsuvtaminot JSC (hereinafter referred to as the "Client"). The Project is planned to be implemented in the service areas of "Karakalpak suv taminoti" LLC (cities of Nukus, Takhiatash and Khojeyli of the Republic of Karakalpakstan).

The Client invites eligible consulting firms ("Consultants") from eligible countries to express their interest in providing the Services.

Interested Consultants must provide comprehensive information, including a brochure (company profile, contract duration, amount, total project cost, percentage of participation, start and completion date) demonstrating that they have the necessary qualifications and relevant experience to perform the Services, including:

a) General experience with consulting contracts in the construction, design, and supervision of water/wastewater facilities as a leading consulting firm over the past 10 (ten) years;

b) Experience in successful design of sewerage systems with a total construction cost of at least \$20 million in the last 10 (ten) years;

c) Specific experience with at least two consulting contracts which have included design of wastewater treatment plant with a capacity no less than 5000 m³/day and budget for consulting services of at least \$0.7 million for each contract within the last 10 (ten) years;

d) Technical and managerial structure of the firm (only the structure of the organization, general qualification and number of key personnel are indicated). CVs of key personnel shall not be submitted. Key experts will not be evaluated at the "short list" stage.

Consultants may submit their REOI as an individual firm or in association in the form of a joint venture or sub-consultancy. All the members of the joint venture shall be jointly and severally liable for the entire assignment. However, the experience of sub-consultant will not be considered while short-listing. The attention of interested Consultants is drawn to paragraphs 3.16, 3.17 and 3.21 and 3.22 of the World Bank IPF Borrower Procurement Rules dated July 2016 and revised in November 2017 and August 2018, which set forth the World Bank's conflict of interest and eligibility policies.

Consultant selection will be conducted using the Qualification and Cost Based Selection (QCBS) procurement method in accordance with the World Bank IPF Borrower Procurement Rules (July 2016, revised November 2017 and August 2018).

Interested applicants should provide information about their organization, demonstrating compliance with the criteria of this selection.

The Terms of Reference can be downloaded at the following link:

Tel: + 996 (312) 30-18-05 (ext. number 118)

E-mail: eibraev@aris.kg

The Community Development and Investment Project of Kyrgyz Republic (ARIS) now invites eligible consulting firms ("Consultants") to indicate their interest in providing the Services. Interested Consultants should provide information demonstrating that they have the required qualifications and relevant experience to perform the Services. The shortlisting criteria are (the consultant must meet the following qualifications):

- General experience in designing of buildings and structures for at least 5 years.
- Experience in preparation of BoQs for repair works.
- Experience of work in projects financed by international organization.

The attention of interested Consultants is drawn to Section III, paragraphs, 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers" July 2016 ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest. In addition, please refer to the following specific information on conflict of interest related to this assignment:

Consultants shall not be hired for any assignment that would be in conflict with their prior or current obligations to other clients, or that may place them in a position of being unable to carry out the assignment in the best interests of the Borrower. Without limitation on the generality of the foregoing, Consultants shall not be hired under the circumstances set forth below:

1. a firm that has been engaged by the Borrower to provide Goods, Works, or Non- consulting Services for a project (or an affiliate that directly or indirectly controls, is controlled by, or is under common control with that firm), shall be disqualified from providing Consulting Services resulting from, or directly related to, those Goods, Works, or Non-consulting Services. This provision does not apply to the various firms (Consultants,

contractors, or suppliers), which together are performing the contractor's obligations under a turnkey or design and build contract;

2. a firm that has been engaged by the Borrower to provide Consulting Services for the preparation or implementation of a project (or an affiliate that directly or indirectly controls, is controlled by, or is under common control with that Consulting firm), shall be disqualified from subsequently providing Goods, Works, or Non-consulting Services resulting from, or directly related to those Consulting Services. This provision does not apply to the various firms (Consultants, contractors, or suppliers), which together are performing the contractor's obligations under a turnkey or design and build contract;
3. neither a Consultant (including personnel and sub-consultants), nor an affiliate (that directly or indirectly controls, is controlled by, or is under common control with that Consultant), shall be hired for any assignment that, by its nature, creates a conflict of interest with another assignment of the Consultant;
4. Consultants (including their experts and other personnel, and sub-consultants), that have a close business or family relationship with a professional staff of the Borrower, or of the project implementing agency, or of a recipient of a part of the Bank's financing, or any other party representing or acting on behalf of the Borrower, that is directly or indirectly involved in any part of:
 1. the preparation of the TOR for the assignment;
 2. the selection process for the contract; or
 3. the supervision of the contract, may not be awarded a contract, unless the conflict stemming from this relationship has been resolved in a manner acceptable to the Bank throughout the selection process and the execution of the contract.

Consultants may associate with other firms to enhance their qualifications, but should indicate clearly whether the association is in the form of a joint venture and/or a sub-consultancy. In the case of a joint venture, all the partners in the joint venture shall be jointly and severally liable for the entire contract, if selected.

A Consultant will be selected in accordance with the CQS (Consultant's Qualifications Based Selection) method set out in the Procurement Regulations.

Further information can be obtained at the address below during office hours from 9:00 am to 18:00 pm (local time).

Expressions of interest must be delivered in a written form to the address below (in person, or by mail, or by fax, or by e-mail) by 18:00 p.m. (local time) April 25, 2023.

Consultancy services for construction supervision of raw water transmission pipelines of allen town water treatment plant

Project ID No.: P-SL-E00-004

Project Name: Consultancy service for construction supervision of raw water transmission pipelines of allen tower treatment plant

Country: Sierra Leone

Funding Agency: African Development Bank

Last date for submission: 26/04/2023

Project Details:

Request for expression of interest for consultancy services for construction supervision of the design-build contracts for the construction of mortem and mongeba weirs and associated raw water transmission pipelines; expansion /rehabilitation of Allentown water treatment plant; rehabilitation of two booster stations, rising mains and five reservoirs; and construction of distribution network extension.

FREETOWN WASH AND AQUATIC ENVIRONMENT REVAMPING PROJECT

Sector: Water Supply and Sanitation

Financing Agreement Reference: 6540654001532

1.The Government of the Republic of Sierra Leone has received a grant and a loan from the African Development Fund and loans from the Kuwait Fund for Arab Economic Development, and the OPEC Fund for International Development to co-finance the Freetown WASH & Aquatic Environment Revamping Project. In addition, the Government has applied for co-financing from the Netherlands Enterprise Agency of the Ministry of Foreign Affairs, the Islamic Development Bank, the Saudi Fund, the ECOWAS Bank for Investment and Development and the Green Climate Fund toward co-financing of the project. It is intended to apply part of the financing of the OPEC Fund for International Development to eligible payments under the contract for Consultancy Services for Construction Supervision of the Design-Build Contracts for the Construction of Mortem and Mongeba Weirs and Associated Raw Water Transmission Pipelines; Expansion /Rehabilitation of Allentown Water Treatment Plant; Rehabilitation of Two Booster Stations, Rising Mains and Six Reservoirs; and Construction of Distribution Network Extension.

2. Services to be provided include but are not limited to the following:

i. Checking and approving survey data, designs, drawings, programs, and other documentation required to be submitted by the contractor and advising on design adjustments whenever such adjustments become necessary.

ii. Supervision of the site works for compliance with the approved program, specifications, and any other obligation of the contractor/supplier (including implementation of ESMP and other Environmental Safeguards)

iii. Inspection, testing, and witnessing of tests on materials, and witnessing completion and acceptance tests for the works or parts of the works.

iv. Certifying contractor's invoices or claims, dealing with variation orders, ordering works, maintaining cost control in the administration of the contracts, and monitoring cash flow to ensure that there is no unjustifiable cost over-run.

v. Monitoring progress of work, preparing and keeping daily field records, and arranging for periodic site meetings.

vi. Supervision of the arrangement for and the progress of the contractor's operation and maintenance training programme.

vii. Provision of post construction professional advice during the Defects Liability period.

viii. Preparing and delivering on schedule mandated reports.

3. GVWC now invites eligible consulting firms to indicate their interest in providing these services. Interested consultants must provide information indicating that they are qualified and experienced to perform the services. The following core expertise will be required: Water supply project management; Design of water supply infrastructure (weir, intake, treatment, transmission, storage, distribution); Supervision of construction/rehabilitation of water supply infrastructure including pumping stations and reservoirs; Quantity surveying/works measurement and valuation, ensuring compliance with ESMP and other Environmental Safeguards. Minimum qualification criteria include verifiable track record in the following:

(i) Detailed engineering design for rehabilitation/expansion/new construction of urban water supply systems;

(ii)Supervision of works and contract management of design-build water supply works contract;

(iv) Preparation and implementation of ESMP (Environmental and Social Management Plan);

(v) Work in Sub-Saharan Africa;

(vi)Work on projects funded by multilateral or bilateral donor agencies. Experience on projects funded by the African Development Bank and the OPEC Fund for International Development (OFID) will be an added advantage. Consultants may constitute joint ventures to enhance their chances of qualification.

4.Eligibility criteria, establishment of the short-list and the selection procedure shall be in accordance with the African Development Bank's "Procurement Policy and Methodology for Bank Group Funded Operations (BMP)" dated October 2015, which is available on the Bank's website at <http://www.afdb.org>.5.Interested consultants may obtain further information at the address below during office hours: 08:00 –16:00HoursSierra Leone time.

6.Expressions of interest must be delivered by email or hand copy to the address below not later than Wednesday 26April2023at 16: 00Hrs.and labelled "Consultancy Services for Works Supervision (OFID)".

Consultancy Service for the development wastewater treatment plant

Project ID No.: P-NA-E00-008

Project Name: Consultancy Service for the development of Waste water treatment plant

Country: Namibia

Funding Agency: African Development Bank

Last date for submission: 12/05/2023

Project Details:

REQUEST FOR EXPRESSIONS OF INTEREST (CONSULTING SERVICES)

-AFD

Republic of Namibia

Transaction advisory services for the development of a wastewater treatment plant & waste to energy plant through a public private partnership for Otjiwarongo municipality

Sector: Water and Energy Sector

1.The Government of the Republic of Namibia through the Otjiwarongo Municipality has applied for Grant funding from the African Development Bank as Administrator of the African Water Facility Trust Fund and Middle-Income Country Technical Assistance Fund to finance Transaction Advisory Services for the Development of a Wastewater Treatment Plant & Waste to Energy Plant through a Public Private Partnership (PPP) for Otjiwarongo municipality.

2.The overall development objective of the project is to contribute to Sustainable Water and Sanitation Management Solutions in Otjiwarongo Municipality through the construction of sustainable wastewater treatment, water supply facilities, and conversion of the waste to energy eventually leading to the creation of a Circular Economy thereby contributing to better living conditions and sustainable human development. The Municipality of Otjiwarongo now invites eligible consultants to indicate their interest in providing consultancy services as summarized in 3.1 and 3.2 below. Interested consultants must provide information indicating that they are qualified to perform the services (brochures, description of similar assignments, experience in similar conditions, availability of appropriate skills among staff, etc.). Consultants must

provide, as part of their application, names and contact details of organizations for which the consultant has completed projects in the immediate past 5 years, which are essentially equivalent to the scope of this assignment. The Summary of similar assignments executed successfully should be in form of letters of engagement and/or certification of completion or equivalent. Consultants may constitute Joint Ventures to enhance their chances of qualification.

3. The services included under this project are:

3.1. Assessment of the feasibility of the project, preparing tender documentation for competitive bidding and provision of advisory services during the bidding process until financial close of the Project. The services will investigate authentically and in detail whether the project is a desirable, viable and an achievable investment, given that such a decision is likely to have long-term implications starting from the choice of the procurement option and specifically include Feasibility analysis, output specifications, PPP structuring, financial structuring, Request for Qualifications, Request for Proposals, Draft PPP Agreement, Off-Taker agreements, a project implementation schedule and transaction process management. This shall be the basis for development and implementation of the Otjiwarongo Municipality Wastewater Treatment (OMWWTP) and the Waste to Energy Project.

3.2. Prepare the Environmental and Social Impact Assessment (ESIA) with a detailed Environmental Social Management Plan, Resettlement Action Plan (RAP)/ and Livelihood Restoration Plan, Stakeholder Engagement Plan and a Grievance Redress Mechanism and obtain the Namibia Environmental Management Licenses for the project.

4. The Consultant will, based on the data provided by the Client and proposed works, liaise with the client and other relevant stakeholders, his own experience and internationally accepted standards and practice undertake all the assignments to ensure that the project objectives are met. The consultancy services will be carried out over a period of 18 (Eighteen) months.

5. Eligibility criteria, establishment of the short-list and the selection procedure shall be in accordance with the Quality Cost Based Selection (QCBS) method procedures set out in the African Development Bank's "Procurement Policy for Bank Group Funded Operations", dated October 2015, which is available on the Bank's website at <http://www.afdb.org>.

6. Interested consultants may obtain further information at the address below during office hours 07H30–16H30 from Monday to Friday.

7. Expressions of interest must be hand delivered in a single sealed envelope to the address below by 12 May 2023 at 17H00 GMT +2 and mention “Expression of Interest for The Procurement of Transaction Advisory Services for the Development of a Wastewater Treatment Plant & Waste to Energy Plant Through A Public Private Partnership for The Municipality of Otjiwarongo”.

Consultant services for the supervision and control of the Works of six (6) sites and developement of 732 ha down Stream

Project Name: HYDRO-AGRICULTURAL DEVELOPMENT PROJECT IN THE UPPER SASSANDRA REGIONS AND FROMAGER-PHASE III

Country: Ivory Coast

Funding Agency: IsDB

Last date for submission: 31/05/2023

HYDRO-AGRICULTURAL DEVELOPMENT PROJECT IN THE UPPER SASSANDRA REGIONS AND FROMAGER-PHASE III

GENERAL PROCUREMENT NOTICE (AGPM)

Country : IVORY COAST

Project Name : HYDRO-AGRICULTURAL DEVELOPMENT PROJECT IN THE HAUT SASSANDRA AND FROMAGER REGIONS-PHASE III

Sector : AGRICULTURE

Mode of financing : ISTISNAA and PRET ORDINAIRE

Financing No. : No. CIV1022

1. The Government of the Republic of Côte d'Ivoire has subscribed to financing in the amount of 35.14 million Euros (23,050,000,000 CFA Francs) in the combined form of an installment sale and a loan from the Islamic Development Bank to finance the Hydro-Agricultural Development Project in the Haut Sassandra and Fromager Regions – Phase III and intends to use part of this financing to make payments for the acquisition goods, works and related services and consultancy services required for this project.

2. The Hydro-Agricultural Development Project in the Haut Sassandra and Fromager Regions – Phase III, which aims to consolidate and capitalize on the achievements of phases I and II and to develop 812 ha to achieve the objective of 1,600 ha initially planned, should make it possible to create an environment conducive to the involvement of private operators, the development of community initiatives and the empowerment of women and youth employment.

To achieve the objectives listed above, the project was structured on the basis of the following five (05) components:

- Component A: Hydro-Agricultural Developments

- Reinforcing works of phases 1 and 2 and development of 80 ha of extension
- Construction of 6 earth dams and development of 732 ha downstream in Marahoué
- Environmental measures and accompanying actions

- Component B: Development of the value chain
 - Production support
 - Socio-economic infrastructure
 - Valuation support
 - Institutional support
- Component C: Support to the Project Management Unit
- Component D: Consultancy service
- Component E: Audit of the project.

Goods Markets :

Procurement of goods, in particular the supply of agricultural inputs and equipment, will be carried out by National Open Tender (AON). Equipment to support agro-industrial units (reinforcement of the 2-ton hour technical platform) equipment related to the operation of the Project Management Unit (furniture, vehicles & motorcycles, computer equipment and accounting management software) and institutional support (computer equipment, vehicles and motorcycles), will be carried out through the Consultation procedure with national suppliers.

Works contracts :

The procurement of comfort works will be carried out by National Call for Tenders (AON), the rehabilitation works of the PMU premises by consultation with national companies, while the construction of 6 earth dams and the development of 732 ha downstream, will be carried out by International Competitive Bidding limited to IDB member countries (AOI/PM).

Selection of Consultants :

The selection of consultant services for the supervision and control of the works of six (6) sites and development of 732 ha downstream , will be acquired by competitive bidding using the Quality and Cost-Based Selection (SFQC) method/ PM of consultants from shortlisted IDB member countries. Furthermore, the services of consultants for the revision mission of the project procedures manual will be procured through the selection of an individual consultant from the national consultants retained on the shortlist. Consulting services for the financial audit mission of the project as well as marketing support will be procured through competitive bidding using the Least Cost Selection (LCS) method of selection of shortlisted national consultants.

3. Procurements financed by the Islamic Development Bank will be carried out in accordance with the Guidelines for the Procurement of Goods, Works and Related Services under Projects Financed by the Islamic Development Bank (current edition) and are open to all bidders eligible,

as defined in these Guidelines. Procurement of consultancy services will be carried out in accordance with the Guidelines for the Procurement of Consultant Services for Projects Financed by the Islamic Development Bank (current edition).

Specific procurement notices for procurements to be made by International Competitive Bidding reserved for member countries (ICB/PM) and calls for expressions of interest for consultancy services open to member countries will be published as they become available. as they become available, on the IsDB website "www.isdb.org", in at least one newspaper with wide international circulation and in at least one newspaper with wide circulation in the Republic of Côte d'Ivoire.

4. Interested and eligible candidates, who wish to be considered for the supply of goods, works and consulting services for the project, or who wish to obtain additional information, are invited to contact the Beneficiary at the address below:

Name of Organizations: Ministry of State, Ministry of Agriculture and Rural Development / Agency for the Development of the Rice Sector (ADERIZ)

Name of the person to contact: Mr. Abou-Bakar COULIBALY,

Function of the person to contact: Coordinator of the Hydro-Agricultural Development Project in the Haut-Sassandra and Fromager Regions.

Construction Logistics: Building Blocks of Success

Construction logistics, often overlooked as a critical component of the building process, plays a crucial role in ensuring that construction projects are executed efficiently, safely, and on schedule. Construction logistics involves the planning, coordination, and management of all the resources, materials, equipment, and personnel involved in a construction project. From site preparation to final delivery, construction logistics is responsible for optimizing the flow of resources and information, and overcoming various challenges to ensure that construction projects are completed successfully.

Efficient construction logistics are essential to the success of any construction project, regardless of its size or complexity. Here are some key reasons why construction logistics are of paramount importance in the building process:

Resource Optimization: Construction logistics involve careful planning and coordination of resources, such as materials, equipment, and labor. Efficient utilization of resources is critical to minimizing waste, reducing costs, and maximizing productivity. Construction logistics ensure that the right resources are available at the right time, in the right quantity, and in the right condition to avoid delays, rework, and additional costs.

Time Management: Time is a precious resource in construction projects, and delays can result in significant financial losses. Construction logistics help manage time effectively by ensuring that resources are available when needed, schedules are coordinated, and activities are sequenced in the most efficient manner. By streamlining the flow of materials, equipment, and labour, construction logistics can minimize downtime, prevent project delays, and improve overall project timeline.

Safety and Compliance: Construction sites are inherently hazardous environments, and safety is a top priority in the construction industry. Construction logistics play a vital role in ensuring that safety regulations are followed, and all necessary permits and licenses are obtained. Proper handling, transportation, and storage of materials and equipment are essential to prevent accidents, injuries, and environmental hazards. Construction logistics also ensure that construction projects comply with local building codes, zoning regulations, and other legal requirements, reducing the risk of costly penalties and delays.

Communication and Collaboration: Construction projects involve multiple stakeholders, including contractors, subcontractors, suppliers, architects, engineers, and other parties. Construction logistics facilitate effective communication and collaboration among all parties involved, ensuring that everyone is on the same page and working towards the same goal. Clear communication channels, timely information sharing, and coordination of activities are critical to preventing misunderstandings, resolving issues, and keeping the project on track.

Risk Management: Construction projects are exposed to various risks, such as weather disruptions, supply chain disruptions, labour shortages, design changes, and unforeseen events. Construction logistics involve proactive risk management, including contingency planning, alternative sourcing, and mitigation strategies. By identifying and addressing potential risks in advance, construction logistics help minimize the impact of unforeseen events on the project, reducing delays, costs, and disruptions.

Cost Control: Construction projects are complex and involve significant costs, including labour, materials, equipment, permits, and overheads. Efficient construction logistics help control costs by optimizing the use of resources, reducing waste, preventing delays, and avoiding rework. Construction logistics also involve accurate tracking and management of costs, budgets, and financial transactions, enabling effective cost control and financial management throughout the project.

Sustainability: With increasing global focus on sustainability and environmental responsibility, construction logistics play a crucial role in promoting green practices in construction projects. Efficient management of materials, waste, energy, and emissions can significantly reduce the environmental impact of construction projects. Construction logistics can also facilitate the use of sustainable materials, recycling practices, and other environmentally friendly practices, contributing to a more sustainable construction industry.

Construction logistics is a complex network of deliveries and collections that need to follow certain safety and efficiency standards. To ensure timely and accurate delivery of materials from one construction site to another, you need to develop your own construction logistics plan to follow and execute.

The most important aspect of construction logistics is movement. The movement of materials, equipment, and workforce all need to be coordinated to the appropriate locations in order for construction activity to begin. Here is a straightforward example of construction logistics when precast concrete structures, for example, are a critical project component:

-
- Precast concrete structures must be moved from the plant to the project site and arrive on time and undamaged.
 - Once on-site, a crane needs to be available to hoist the precast structures into the coordinated position.
 - Workers need to be coordinated so they are available once the structures are in place and ready to be used

A negative cost impact is likely if one component is not in position and ready. On a construction project, the workforce gets an hourly wage, and if equipment is not in position or the material is delayed or arrives damaged, the workforce can't perform the work. Anytime this happens, it is detrimental to a construction project.

The purpose of construction logistics is to support the procurement and transportation of materials, workers, and other resources required in a construction process.

Effective logistics management is important and can greatly enhance efficiency and productivity. On a construction project, the three main factors for success that every contractor values are:

- Cost
- Time
- Work quality

Good logistics management helps teams perform well in all three areas by ensuring that the workforce can carry out the project's requirements immediately and with the best quality.

What is the importance of logistics in construction?

1. Better waste management
2. Consistent deliveries
3. Efficient material storage
4. Safer work area

The importance of logistics solutions in the construction industry shouldn't be undermined in keeping worksites clean and organized. On the surface, logistics seems to play only a small role in construction. Instead, much of the work seems to come from the material **manufacturers**

and fabricators themselves. After all, without the materials, site management would not be possible.

However, one should not overlook the role that logistics solutions providers play in this type of industry. Defined as the processes of procuring, managing, distributing, storing, and **shipping of materials**, logistics is crucial in meeting the deliverables needed for construction sites.

More than that, this is also important in aiding sites to increase productivity, minimize waste production, store materials efficiently, become a safer work environment, and improve collaboration among key players.

Better Waste Management

Construction site works produce a great deal of waste, no matter what it is. Although many factors can be attributed to this, one main culprit is the lack of management.

For example, materials like excess concrete, wood, cut pipes, and other unwanted substances can easily be scattered around a worksite. If site employees are just left to their devices and are not reporting to an on-site manager, they wouldn't really be able to report to someone who can instruct them on waste disposal, reuse, and recycling — if possible.

This is where one of the most important roles of a logistics solutions provider, or a logistics manager can be clearly spotted. With their presence, they can coordinate with the workers and plan a sound strategy for managing all the different types of waste produced on the site. This not only helps keep the area organized, but it also allows other employees present to focus on their core operations.

Consistent Deliveries

Coupled with an experienced and professional project manager, logistics solutions are also essential in acquiring all the **construction materials** needed for a particular job. Courier services like trucks, tow trucks, and the like, are the transport units that can house and carry various materials such as beams, pipes, scaffolding components, sheet plates, and a range of other fittings and large parts. Without them, it can be fairly difficult for any construction job to start off without a hitch.

Usually, the logistics manager and project manager are constantly coordinating together to make sure that all the materials that are planned for use on a specific day in a worksite, are delivered on-time and without any damages. They're also ensuring that there are no missing items in the deliveries.

In poorly-managed construction worksites, it's easy for materials to be lacking in quantity and quality. By investing in logistics services, the construction industry can avoid this and also secure materials that are due for shipping to the target locations.

Efficient Material Storage

There are some cases wherein construction materials aren't necessarily stored on-site. Instead, they're housed in a facility that's located nearby. This is suitable for locations that are small in size and may not have the right warehousing capabilities to store equipment, heavy machinery, and a range of other construction profiles.

The situation above is another excellent example of just how important it is to incorporate logistics into any kind of construction work, be it small-scale, medium-scale, or large scale. **Logistics management** enables the industry to conduct all the best practices in material handling and storage, to make sure that the workplace is efficient and organized.

Even if the materials have to be procured on the same day, proper logistics ensures that all the demands of the specific job will be met for that time period. There is no compromise on the speed of deliveries, even if there is a need to meticulously load, unload, and transport a range of structural materials from one place to another.

Safer Work Area

As much as possible, all stakeholders involved in a construction job see to it that there are no safety hazards during the duration of the project. This is done by ensuring all employees are following strict implementations on health and safety. They're also mandated to wear personal protective equipment and other safety gears on the job.

Keeping this, safety is also one aspect of the construction industry which logistics focus on. Aside from constantly monitoring the proper inflow/outflow or ingress/egress of large equipment and construction components, this aspect also monitors the safety of the employees and the site as a whole.

For example, many accidents can occur in certain activities, such as setting up a tower crane or a scaffolding framework. These accidents may potentially end up causing injury to the persons involved — or in extreme cases, even death.

To avoid this, contractors, site managers, and all the employees present are in constant coordination with the logistics services they have. These groups are always reminded of any **safety policies** and are even required to undergo further safety training before undertaking work.

Construction logistics operates on several levels.

- Planning and transportation of workers.
- Movement of material.
- Maintenance of vehicles and other equipment.

Construction is an industry that requires complex logistics solutions because of the number of contractors involved, as well as the safety requirements, and multiple other regulations to be met and observed, not to mention quality control and business development.

Let's look at some of the key logistical challenges specific to the construction and manufacturing industries.

Challenges of construction logistics

Construction logistics involves high stakes - this is true both for workers' safety and project deadlines which have a direct implication on overall costs and business continuity. Let's see what kind of logistical challenges you need to be prepared for as a construction business.

Planning

Planning is the #1 challenge when managing a construction project. Material and transport planning, supply, demand, and procurement, infrastructure, and local access - everything needs to be planned in advance to be delivered on time.

As far as site-to-site logistics is concerned, we're talking about route planning and workforce management, i.e. knowing how many drivers you need and how many hours of service (HOS) you're looking at on any given site and day.

To create an efficient team schedule and ensure continuous transportation service, construction businesses usually hire a transportation manager. This is a dedicated person who is in charge of implementing the construction logistics plan.

Construction logistics is impossible without a transportation management system (TMS). It's used for route planning (including recurring routes), automatically dispatching jobs to drivers, and supporting fleet management.

An effective transportation management system will complement and coordinate with your back-office software.

Resource optimization

Resource optimization - material and human - is a huge part of supply chain management, and construction logistics is no exception.

Not all construction projects are created equal, and it's the job of the construction project manager to ensure minimum waste and efficient resource optimization.

For example, no transport resources can be wasted when it comes to cost reduction. Since so many people and vehicles are involved in the supply chain, it's crucial that all working hours are cost-efficient and the job gets done.

To guarantee that all vehicles are used to the maximum capacity and that the materials are transported safely and efficiently, managers use **route optimization software**.

In addition to planning the fastest and safest routes, a software solution like that will match your vehicles with materials to be transported, as well as the drivers' working hours.

The result: you have control of your mobile workforce and vehicles without spending hours in Excel sheets and Google Maps.

Equipment maintenance

Equipment is a huge part of any construction project. It's a universal thing across the construction industry, which means that every company has to figure out how to manage machinery to minimize the downtime risk and promote safety.

Usually, equipment management, much like fleet management, happens according to a schedule developed within the company depending on the scope of the construction project and quality standards set by regulations and the larger management.

The construction industry is a perfect example of an industry that benefits a lot from vehicle check solutions like Track-POD's. The key thing it helps to ensure is proactive vehicle maintenance in the form of daily safety inspections.

Once the fleet manager has created a vehicle checklist and made it obligatory for drivers to fill in before and/or after every route, the team is equipped to conduct proactive maintenance.

This is an advanced but simple solution that helps cut repair costs and promote safety in the workplace.

Safety compliance

Speaking of safety, it's a major concern for any construction manager.

The risk of injury is high; therefore, the health of the workforce is a key priority. In addition to injury risks, there are environmental concerns to be observed.

Depending on the local regulations, safety procedures can be very different. Regardless, a construction logistics plan needs to include safety measures that extend to the entire operation and ensure compliance across the infrastructure.

Vehicle and equipment safety will create a safer working environment. However, there's much more to be done. For example, contactless delivery is an industry standard in logistics.

Contactless operations will always win because they come with reduced costs and no unnecessary contact on-site. Contactless delivery management software helps you upgrade your construction projects to paperless and **promote safety while keeping your costs low.**

Workforce training

To manage a construction site is to manage people. Managing people requires onboarding and training, and that extends to regulations (environmental, safety, etc.), as well as processes related to materials handling process, services, data processing, etc.

Training on-site is delivered by the manager and usually implies in-person training as a team. Logistics training doesn't have to take tons of time and can be reduced to deploying a comprehensive mobile solution that can be used by your field staff both online and offline.

The tool in question is the Track-POD mobile app for delivery drivers. It's synced with the web dispatcher dashboard to ensure smooth data flow and support instant dispatching, vehicle checks, Proof of Delivery, etc.

Paperless driver apps is also how your drivers can keep in touch with dispatchers, conduct load checks with QR and barcode scanning, and collect delivery confirmation.

Contractors' management

Logistics - be it construction site logistics or e-commerce delivery - involves working with contractors and suppliers. The difference is in the complexity of supplier networks: the greater the number of suppliers, the more complex your system becomes.

Supplier management can take tons of time and require substantial involvement from your side, which doesn't always fit your logistics plan.

The good news, managing a supplier network doesn't have to be as hard as building one.

A transport management system like Track-POD offers a neat solution to supplier management. Namely, you can give your suppliers access to the Customer Portal, which is a place for shippers to **manage and track** the transportation of materials from their side.

By using a platform like that, you can greatly reduce your team's involvement in supplier management and free up time for the on-site process.

Monthly Commercial Report for the month of March 2023 - Algeria

Name of the Mission (Country): **Algeria**

A. Trade in goods

a) Total trade in goods during: **January to June 2022**

	Export (US\$ Million)	Import (US\$ Million)	Status (P) Provisional/(F) Final
Algeria's trade with India	445 (export to India)	517 (import from India)	P
Algeria's total global trade	25 922	20 223	P

b) Preferential trade in goods during: NIL

c) Top 10 items of import from India: **January to June 2022**

S. No.	Commodity (6-digit HS tariff line)	Value (US\$ million)	Quantity	Unit of Measurement	% share in total import of the commodity
1.	Polyethylene terephthalate 3907610	35	24 220	Tons	6.64
2.	Semi-milled or wholly milled rice, whether or not polished or glazed 10063	34	44 987	Tons	6.62
3.	Heterocyclic compounds with nitrogen hetero-atom[s] only 293399	14	52	Tons	2.85
4.	Heterocyclic compounds with nitrogen hetero-atom[s] only, containing an unfused pyridine ring, whether or not hydrogenated 293339	14	193	Tons	2.84
5.	Squared granite in blocks or slabs	14	22 438	Tons	2.80

	251612				
6.	Antisera and other blood fractions 30021	12	5.78	Tons	2.45
7.	Vaccines for human medicine 30024	12	130	Tons	2.40
8.	Medicaments consisting of mixed or unmixed products for therapeutic or prophylactic purposes 30049	11	62	Tons	2.20
9.	Frozen, boneless meat of bovine animals 020230	9	2 736	Tons	1.76
10.	Multi-ply paper and paperboard, coated on one or both sides with kaolin or other inorganic substances, in rolls or in square or rectangular sheets, of any size 481092	8	7 693	Tons	1.71

d) Top 10 items of export to India: **January to June 2022**

S. No.	Commodity (6-digit HS tariff line)	Value (US\$ million)	Quantity	Unit
1.	Petroleum oils and oils obtained from bituminous minerals, crude 270900	297	518 523	Tons
2.	Urea 310210	66	117 911	Tons
3.	Natural Gas	40	80 000	Tons
4.	Natural calcium phosphates 251020	20	252 828	Tons
5.	Methanol	5	15 749	Tons
6.	Recovered "waste and scrap" paper or paperboard 470790	4	14 423	Tons

7.	Recovered "waste and scrap" paper or paperboard of unbleached kraft paper, corrugated paper or corrugated paperboard 470710	4	18 215	Tons
8.	Recovered "waste and scrap" paper or paperboard, incl. unsorted waste and scrap 470790	3	14 821	Tons
9.	Fresh or dried dates 080410	1	1 586	Tons
10.	Tiles of any shape, blocks, plates, sheets and strip, solid cylinders, incl. discs, of agglomerated cork 450410	0.697	627	Tons

e) Potential products of imports from India

S. No.	Commodity (6-digit HS tariff line)	Rationale (Max. 200 words)
1.	Pharmaceutical products 300	<p>Algeria imported pharmaceutical products worth US\$ 1.704 billion in 2021, most of which was imported from France (US\$ 423 million), China (US\$ 301 million), Germany (US\$ 229 million), Belgium (US\$ 205 million), Netherlands (US\$ 173 million), Switzerland (US\$ 76 million). India ranked at 7th position in terms of exports of pharmaceuticals to Algeria with US\$ 69 million.</p> <p>As India is the world's largest provider of pharmaceuticals products and the largest vaccine provider, exports of these products can easily be increased, if good quality contacts are established with Algerian importers.</p> <p>The Embassy is already providing all sorts of information, including lists of Algerian importers to Indian exporters.</p>
2.	Machinery, mechanical appliances, nuclear reactors, boilers 84	Algeria imported these products worth US\$ 4.262 billion in 2021, most of which were imported from China (US\$ 969 million), Italy (US\$ 758 million), France (US\$ 599 million), German (US\$ 309 million), Turkey (US\$ 231 million), USA

		<p>(US\$ 199 million). Imports from India were US\$ 177 million. It ranked at 7th position in terms of exports of these items to Algeria.</p> <p>As India's export target for engineering goods is US\$ 286 million for 2022-23, India can easily reach this target if more efforts are made by Indian exporters.</p> <p>The Embassy is already providing all sorts of information, including lists of Algerian importers to Indian exporters.</p>
3.	Electrical machinery 85	<p>Algeria imported US\$ 2.376 billion of electrical machinery in 2021, among which US\$ 663 million from China, US\$ 519 million from Russia, US\$ 262 million from France, US\$ 151 million from Italy, US\$ 116 million from Spain, US\$ 99 million from Turkey, US\$ 91 million from Hong Kong, US\$ 80 million from Sweden etc. India ranked at 15th position in terms of export of electrical machinery to Algeria with an export value of US\$ 21 million.</p> <p>Indian companies can increase their exports to Algeria as it is a product that is not concerned by any ban by Algerian authorities, unlike electronic items.</p> <p>The Embassy is already providing all sorts of information, including lists of Algerian importers to Indian exporters.</p>

B. QUALITATIVE

1. Market Access Alerts :

a. Alerts on customs tariff changes : **Nil**

b. Alerts on non tariff measures (SPS/TBT import and export procedures/restrictions/prohibitions, licensing/STEs etc) : **Nil**

c. Alerts on standards, technical regulations and conformity assessment procedures : **Nil**

d. Alerts on trade defense measures taken by respective country : **Nil**
(safeguards including special safeguard, antidumping, CVD or anti-subsidy)

e. Alert on services, regulatory regime, qualification requirement, licensing procedures, visa regime, barriers etc. **Nil**

2. Feedback

a. Feedback from major Indian Industries/other commercial concerns and Indian trade visitors to Algeria **during the month of March 2023:**

Three Indian companies took part to the International Exhibition of Spare Parts, Equi Auto Algeria from 13 to 16 March 2023 at SAFEX, Algiers.

In March 2023, Mr. Ravindra Vyas from Euro Vistaa India Limited visited Algeria in connection to the trade issue that his company is facing with his client in Algeria Sarl Abbes Abdellah & Cie. Euro Vistaa exported two containers of cotton yarns worth US\$ 225 230 in September and November 2022 but due to non availability of import authorization document, the Algerian authorities did not allow the clearance of these goods. The Embassy provided assistance to M/s Euro Vistaa India Limited for the re-export of these two containers to a new customer in Tunisia.

b. Feedback on major trade activities including logistic events (trade fairs/BSM including Indian participation) **during the month of March 2023:** As in a.

c. Feedback from local commercial visitors to trade fairs in India, including under BSM, Business Visas issued **March 2023:**

S. No.	Activity (trade fair)	Date and venue	Number of participants from Algeria	List of large / key participants from Algeria	Number of Business Visas issued	Feedback received (Max. 200 words)
01	International gem & jewellery Show	1-3 April 2023, at Meridien Hote	02	Kamel benhala Abdelkrim Meguellati	02	to participate at the International gem & jewellery Show , 1-3 April 2023, at Meridien Hote
02	India Steel Expo 2023	19-21 April 2023 at Bombay Convention Center	03	SihamLazreg Mohamed Lamine Adlane Boudib	03	To participate at India Steel Expo 2023 from 19-21 April 2023 at Bombay Convention Center

Number of Business Visas issued during the month of March 2023: 34

3. Trade and Investment :

a. Significant trends in trade and investment (Source)

S. No.	Category	Details of significant trends (Max. 200 words)	Analysis (Max. 200 words)
1	Trade in Goods	<p>In 2021, foreign trade of merchandise recorded the following :</p> <p>A global value of imports increased by 8.73%, it was US\$ 34.391 billion in 2020 and US\$ 37.683 billion in 2021.</p> <p>Algeria's exports increased by 65.06%, they were US\$ 23.796 billion in 2020 and US\$ 39.280 billion in 2021. This increase is due to the rise of oil prices in the International market.</p>	Due to the increase of oil prices in the International market, Algeria's economy could recover a little bit. Indeed, Algeria's exports increased by 65.06% in 2021.
2	Trade in Services	Figures not available	/
3	Investment	Figures not available	<p>Leading sectors for potential Indian investment :</p> <p>-Hydrocarbons -Oil and Gas</p> <p>-Energy and renewable energy</p>

			-Phosphate, fertilizers and minerals - Information and Communication Technology -Public Works and Infrastructure Development -Healthcare -Agricultural sector - Electronics and household items - Electrical vehicles
--	--	--	---

b. Opportunities for investments/assets on offer/major company divestment : **Nil**

c. Information on tender Notices for projects and procurements of interest to Indian project exporters/suppliers (US\$ 15 million & above) : **Nil**

Following tender notices were uploaded on FIEO's trade portal during the month of **March 2023**:

1) Establishment of a short list of international suppliers to ensure the supply of instant milk powder.

2) Pre-selection relating to the supply of frozen boneless beef.

d. Trade queries from India for imports/exports (if not updated on the Indian trade portal)
March 2023:
